

FARM EQUIPMENT INNOVATIONS IN EASTERN AND CENTRAL SOUTHERN AFRICA

**Edited by
Iftikhar Ahmed and Bill H. Kinsey**

**A study prepared for the International Labour Office
within the framework of the World Employment Programme**

Preface	xv
Acknowledgements	xvii
1 Introduction	1
Iftikhar Ahmed and B.H. Kinsey	
Background and objectives	1
Approach and methodology	7
Broad patterns displayed by the studies	12
2 Farm equipment innovations in Eastern Africa: policy considerations	19
Bruce F. Johnston	
Introduction	20
Economic, demographic, structural and agricultural characteristics	24
The role of farm equipment and tillage innovations in East Africa: Kenya, Tanzania and Uganda	28

	Some implications of the structural and demographic characteristics of late-developing countries	49
	Policy analysis and the importance of a learning approach	63
3	Farm equipment innovations for smallholders in semi-arid Kenya	89
	Gichuki Muchiri	
	Introduction	90
	Methodology	98
	Field trials with farm equipment	106
	Description of the modelling technique	112
	Results of the analysis	116
	Concluding remarks	
4	Farm equipment innovations, agricultural growth and employment in Zambia	129
	B.H. Kinsey	
	Introduction	129
	Objective	131
	Source of data and characteristics of survey area	132
	Study design and methodology	135
	Patterns of farm equipment use and innovation	136
	Criteria of technological appropriateness	149
	Impact of farm equipment innovations	153
	Conclusions and broader policy dimensions	168
5	Agricultural equipment innovations and rural transformation in Tanzania	179
	B.H. Kinsey	
	Introduction	180
	Government policy	182
	Patterns of use of farm equipment	185
	R & D for farm equipment	196
	Domestic manufacture of agricultural implements	200
	Conclusions	204

6	Equipment innovations in cotton-millet farming systems in Uganda	209
	B.H. Kinsey	
	Background	210
	The cotton-millet zone and Lango district	215
	Principal characteristics of Lango farming system	218
	The potential impact of farm equipment innovations	234
	Conclusions	245
7	Agricultural equipment and innovation in Southern Sudan	253
	J.D. de Coninck, A. Duncan and P.E. Winter	
	Introduction	254
	Background	254
	Existing patterns of farm equipment use and innovation	258
	Sources and supply of farm tools	261
	Options for technical change	267
	Conclusions	268
8	The potential for farm equipment innovations in Malawi	273
	B.H. Kinsey	
	Introduction	274
	The policy environment for agricultural equipment innovations	276
	Dominant farming systems in Malawi	277
	Pattern of equipment use on small farms	287
	Supply and distribution of agricultural equipment	292
	R & D for farm equipment	295
	Conclusions and factors affecting the future supply of equipment innovations	299
9	Major issues raised by the studies	305
	Iftikhar Ahmed and B.H. Kinsey	
	Introduction	305

	Research and development: equipment for small farms	306
	Extension and diffusion of farm equipment innovations	309
	Policies for the promotion of appropriate agricultural equipment	313
10	Summary and conclusions Iftikhar Ahmed and B.H. Kinsey	317
	Lessons from the case studies and directions for further research	317
	Highlights of the major findings of the studies	318
	The lessons from recent experience	322
	Implications for further research	324
	Index	335
