Contents

| | |
|---|-------------|
| Foreword | xi |
| Preface | xiii |
| Acknowledgments | xix |
| 1 Natural Resources and the Environment in the Malaysian Context | 1 |
| Malaysia: key features | 3 |
| Natural resources and development during the colonial period | 8 |
| The New Economic Policy | 10 |
| Trends in natural resource utilization and environmental quality during the NEP period | 15 |
| Institutional aspects of natural resource and environmental management | 23 |
| Questions for research | 27 |
| 2 Natural Resources and Economic Sustainability | 29 |
| Introduction | 29 |
| Resource rents and sustainability | 30 |
| Resource depletion and economic sustainability in Malaysia | 40 |
| Conclusions | 50 |
| Appendix 2.1: Mineral consumption allowances | 58 |
| Appendix 2.2: Timber consumption allowances | 61 |
| Appendix 2.3: Capital consumption allowances | 68 |
| | vii |

| | |
|---|------------|
| 3 Petroleum | 73 |
| Introduction | 73 |
| Basic analytics of oil contracts | 78 |
| Development of institutional arrangements in the oil sector | 80 |
| Economic analysis of production-sharing contracts | 89 |
| Conclusions | 98 |
| | |
| 4 Forests | 105 |
| Introduction | 105 |
| Basic concepts in forest economics | 109 |
| Deforestation | 113 |
| Timber depletion | 124 |
| Conclusions | 141 |
| Appendix 4: Deforestation regressions | 146 |
| | |
| 5 Agricultural Land | 151 |
| Introduction | 151 |
| Emergence of the idle land issue | 154 |
| The extent of idle land | 160 |
| The policy response to idle land | 163 |
| Socioeconomic and institutional explanations for idle land | 170 |
| Conclusions | 173 |
| | |
| 6 Marine Fisheries | 181 |
| Introduction | 181 |
| Fundamental concepts of fisheries economics | 185 |
| Development of west coast fisheries during the 1970s and 1980s | 189 |
| Economic analysis of catch and effort in west coast fisheries during the 1980s | 210 |
| Conclusions | 223 |
| Appendix 6: Bioeconomic model of west coast fisheries | 227 |
| | |
| 7 Freshwater | 233 |
| Introduction | 233 |
| Economics of water resource development | 237 |
| Water resource development in Malaysia | 244 |
| Conclusions | 261 |

| | | |
|-----------|--|------------|
| 8 | Pollution and Economic Development | 267 |
| | Introduction | 267 |
| | Cross-country studies of the pollution/development relationship | 269 |
| | The pollution/development relationship in Malaysia | 274 |
| | Conclusions | 285 |
| | Appendix 8: Analysis of ambient environmental quality and development | 287 |
| 9 | Air Pollution and Health | 295 |
| | Introduction | 295 |
| | Valuing lives saved | 298 |
| | Development of air pollution policies in Malaysia | 303 |
| | Mortality-related benefits in urban areas in Malaysia in 1991 | 308 |
| | Conclusions | 314 |
| 10 | Water Pollution Control | 319 |
| | Introduction | 319 |
| | The economic approach to pollution control | 322 |
| | Palm-oil effluent charges in Malaysia | 328 |
| | Cost savings of the effluent charges in the Sungai Johor basin | 337 |
| | Conclusions | 341 |
| | Appendix 10: Estimation and solution of the simulation model for CPO mills on the Sungai Johor | 344 |
| 11 | Conclusions | 351 |
| | What were the links between natural resources and economic growth? | 351 |
| | Were natural resources managed to maximize net benefits? | 352 |
| | What were the links between economic development and environmental quality? | 359 |
| | Was environmental quality managed to maximize net benefits? | 360 |
| | Bibliography | 365 |
| | Contributors | 401 |
| | Index | 403 |
