About the structure of this book xix

PART I INTRODUCTION 1

1 DEVELOPMENT OF THE CONCEPT OF BASIC NEEDS AND VARIOUS CRITICISMS 3

1.1 Introduction 3
1.2 Some examples of an early application of a basic needs approach 7
1.3 Interpretation of basic needs policies 10
1.4 Elements of a basic needs approach 11
1.5 Criticisms of the basic needs approach 13
1.6 Conclusions 19

2 SOME REMARKS ON MODELLING BASIC NEEDS AND AN OVERVIEW OF THE KENYA BASIC NEEDS MODEL 23

2.1 Questions to be answered by a basic needs model ... 23

2.2 A brief overview of some macro models applied in Kenya 27
2.3 Introduction to the Kenya basic needs model 32

3 AN OVERVIEW OF KENYA'S DEVELOPMENT SINCE INDEPENDENCE 39

3.1 Main characteristics of development planning 39
3.2 Income distribution and basic needs in Kenya's development process 43

PART II DETAILED DESCRIPTION OF THE MODEL 51

4 THE BASIC NEEDS SUBSYSTEM 53

4.1 Input indicators 55
4.2 Output indicators 60
4.3 Education 63
4.4 Health 68

5 THE DEMOGRAPHIC SUBSYSTEM 71

5.1 Fertility 72
5.2 Mortality 76
5.3 Migration 79
5.4 Labour force participation 84
5.5 Population projections 89

6 EFFECTS OF BASIC NEEDS AND DEMOGRAPHIC VARIABLES ON THE OTHER PARTS OF THE MODEL 95

6.1 Skill composition of the labour force 95
6.2 Labour productivity 99
6.3 Value added share in gross output 99
6.4 Changes in patterns of consumption 100

7 SUPPLY OF PRODUCTS AND FACTORS 101

7.1 Labour supply 101
7.2 Supply of capital 105
7.3 Determination of potential value added 106

8 DEMAND ON THE PRODUCT MARKET 113

8.1 Consumption by socio-economic group 113
8.2 Investment 119
8.3 Government expenditure and revenue 120
8.4 Imports 123
8.5 Exports 125

9 CONVERGENCY MECHANISMS 129

9.1 Introduction 129
9.2 Convergence on the foreign exchange market 131
9.3 Convergence on the product market 131
9.4 Convergence on the labour market 137
9.5 Convergence on the capital market: Determination of investment 139
9.6 Stability of the convergency mechanism 145

10 BEHAVIOUR ON THE FOREIGN EXCHANGE MARKET 151

11 INCOME DISTRIBUTION, THE SOCIAL ACCOUNTING MATRIX AND POVERTY DETERMINATION 155

11.1 Determination of the different employment categories and socio-economic groups 155
11.2 Value added components 161
11.3 Distribution of primary and secondary income among socio-economic groups 164
11.4 Distributional effects of changes in rural-urban terms of trade 170
11.5 The social accounting matrix 172
11.6 Determination of poverty 172

PART III RESULTS OF THE ANALYSIS 181

12 EXPERIMENTING WITH THE MODEL: SCENARIO DESIGN AND THE BASE RUN 183

12.1 Introduction 183
12.2 Scenario design in the model 187
12.3 Base run: Introduction 189
12.4 Base run: General economic characteristics 191
12.5 Base run: Demographic and basic needs characteristics 192

12.6 Base run: Employment and income distribution characteristics 194
12.7 Base run: Convergency mechanisms and social accounting matrix 196
12.8 Validation 200

13 EXPERIMENTING WITH THE MODEL: DOMESTIC SCENARIOS 209

13.1 Introduction 209
13.2 Increase in government expenditure (scenario 1) ... 210
13.3 Changes in government expenditure (scenario 2) 213
13.4 Land redistribution (scenario 3) 214
13.5 Other agricultural policies (scenario 4) 216
13.6 Efficiency in basic needs delivery 220
13.7 Policies to stimulate growth (scenario 5) 224

14 EXPERIMENTING WITH THE MODEL: SCENARIOS REFLECTING EXTERNAL INFLUENCES AND DOMESTIC RIGIDITIES 229

14.1 External aid and capital inflow (scenario 6) 229
14.2 Policy experiments under rigid internal and external circumstances (scenarios 7 and 8) 232

15 CONCLUSIONS 235

15.1 Interpretation of the results of the various policy scenarios 235
15.2 Lessons drawn: Reflections on results 242
15.3 Lessons drawn: Future research activities 245
Annex Results of the various scenarios and the base run for some important social and economic variables 248

APPENDICES 267

1 DETERMINATION OF VALUE ADDED, EMPLOYMENT AND CAPITAL 269

A1.1 Value added and employment 269
A1.2 Determination of capital stock and depreciation by sector 273

2 A COMPARISON BETWEEN THE OFFICIAL 1976 SOCIAL ACCOUNTING MATRIX AND THE SOCIAL ACCOUNTING MATRIX BUILT FOR THE MODEL 277

3 THE INPUT-OUTPUT STRUCTURE OF THE MODEL 281

A3.1 Introduction 281
A3.2 Determination of the various input-output tables used in the model 282
A3.3 Methodology used to split a given sector in an input-output table into two or more subsectors ... 293

4 PRODUCTION FUNCTIONS 297

A4.1 The choice of the production function 297
A4.2 The sectoral production functions 300
A4.3 Skilled and unskilled labour inputs 303
A4.4 Determination of the coefficients of the production functions used in the model 303

5 AN ANALYSIS OF SMALL-SCALE FARMING BASED ON RURAL SURVEY DATA 307

A5.1 Introduction 307
A5.2 Relation between basic needs and agricultural production 309
A5.3 Aspects of small farm production 314
A5.4 Farm production functions 323
A5.5 Indirect effects on production 326
A5.6 Determination of the coefficients for agricultural production functions 327

6 CALCULATION OF UNIT COSTS OF BASIC NEEDS 331

List of variables used 335

Bibliography 343

Author index 367

Subject index 371
