

PAUL B. STARES

---

SPACE AND  
NATIONAL SECURITY

THE BROOKINGS INSTITUTION  
*Washington, D.C.*

# Contents

<b>1. Introduction</b>	<b>1</b>
The Evolution of the Antisatellite Issue	2
Organization of the Study	7
<b>2. U.S. and Soviet Military Space Programs</b>	<b>8</b>
General Comparisons	9
The Military Applications of Satellites	15
Future Military Space Systems	39
Conclusion	43
<b>3. The Value of Military Satellites</b>	<b>45</b>
Assessing the Importance of Satellites	45
Peacetime Missions	47
Conventional War Missions	53
Nuclear Operations	66
Conclusion	72
<b>4. The Threat to Space Systems</b>	<b>73</b>
Generic Threats and Countermeasures	73
Soviet ASAT Capabilities and U.S. Vulnerabilities	85
U.S. ASAT Capabilities and Soviet Vulnerabilities	99
Potential U.S. and Soviet ASAT Systems	113
Conclusion	118
<b>5. The Utility of ASAT Weapons</b>	<b>120</b>
Client State Conflicts	121
Client State versus Superpower Conflicts	123
Superpower versus Superpower Regional Conflicts	125
ASAT Use as a Catalyst to Nuclear War	136
ASAT Use during Nuclear War	139
Conclusion	140

<b>6. Arms Control in Space</b>	<b>142</b>
The Current Space Arms Control Regime <i>143</i>	
Recent Initiatives <i>146</i>	
The Obstacles to ASAT Arms Control <i>152</i>	
The Benefits of ASAT Arms Control <i>156</i>	
ASAT Arms Control Options <i>157</i>	
Conclusion <i>172</i>	
<b>7. Summary and Recommendations</b>	<b>174</b>
Does the United States Really Need an ASAT System? <i>174</i>	
What Are the Likely Consequences of ASAT Development? <i>177</i>	
Are ASAT Constraints Feasible? <i>178</i>	
What About the SDI? <i>181</i>	
What Should the United States Do? <i>182</i>	
<b>Appendixes</b>	
A. U.S. and Soviet Space System Survivability Measures <i>187</i>	
B. U.S. and Soviet Space Surveillance Capabilities <i>201</i>	
<b>Glossary</b>	<b>209</b>
<b>Index</b>	<b>211</b>
<b>Tables</b>	
2-1. Deployment of U.S. and Soviet Military Satellites, 1987	16
2-2. Comparison of U.S. Navigation System Accuracies	34
2-3. Single Satellite Coverage Requirements (Polar Orbit)	40
4-1. Threats to Space Systems and Associated Countermeasures	84
4-2. Soviet Antisatellite Tests, 1968–82	86
4-3. Success Rate of the Soviet ASAT Test Program, by Guidance System, 1968–82	88
4-4. U.S. Military Satellites within Reach of the Soviet ASAT System	90
4-5. Estimates of Soviet ASAT Shots Required to Disable a Range of U.S. Satellite Target Sets, by Probability of Kill	94
4-6. Estimates of Days Required to Disable a Range of U.S. Satellite Target Sets, by Probability of Kill	94
4-7. U.S. ALMV Antisatellite Tests, 1984–86	103
4-8. Soviet Satellites within Reach of the Current and Potentially Upgraded U.S. ALMV Antisatellite System	105
4-9. Estimates of U.S. ASAT Shots Required to Disable a Range of Soviet Satellite Target Sets, by Probability of Kill	108
4-10. Estimates of Days Required to Disable a Range of Soviet Satellite Target Sets, by Probability of Kill	108
4-11. Potential Near-Term and Far-Term ASAT Weapons	114

<b>CONTENTS</b>	<b>xiii</b>
<b>6-1. The Space Arms Control Regime, 1987</b>	<b>147</b>
<b>6-2. Current and Potential National Technical Means of Verification (NTM) for Monitoring a Comprehensive ASAT Test Ban</b>	<b>164</b>
<b>A-1. Dedicated U.S. Satellite Ground Stations</b>	<b>188</b>
<b>A-2. U.S. Space System Survivability Measures</b>	<b>198</b>
<b>B-1. U.S. Ground-Based Space Surveillance Systems</b>	<b>204</b>
 <b>Figures</b>	
<b>2-1. U.S. and Soviet Space Launches, 1960–85</b>	<b>10</b>
<b>2-2. U.S. and Soviet Space Program Expenditures, 1965–84</b>	<b>10</b>
<b>2-3. Approximate Earth Coverage of U.S. Defense Support Program Early Warning Satellites</b>	<b>26</b>
<b>2-4. Approximate Earth Coverage of a Typical Soviet Early Warning Satellite near Apogee</b>	<b>28</b>
<b>2-5. Projected Evolution of U.S. Military Space Programs, 1986–2000</b>	<b>38</b>
<b>3-1. Earth Coverage of U.S. Fleet Satellite Communications System, with Sites of U.S. Navy Antisubmarine Operations Centers</b>	<b>61</b>
<b>4-1. Soviet ASAT Co-orbital Interception Technique</b>	<b>87</b>
<b>4-2. U.S. ASAT Mission Profile</b>	<b>100</b>
<b>B-1. Sites of U.S. Ground-Based Space Surveillance Sensors</b>	<b>206</b>
<b>B-2. Sites of Soviet Ground-Based Space Tracking Stations</b>	<b>207</b>
