

A GUIDE TO ECONOMETRICS FOURTH EDITION

PETER KENNEDY

Simon Fraser University

 **BLACKWELL**
Publishers

CONTENTS

<i>Preface</i>	xi
1 Introduction	1
1.1 What is Econometrics?	1
1.2 The Disturbance Term	2
1.3 Estimates and Estimators	4
1.4 Good and Preferred Estimators	5
General Notes	6
Technical Notes	9
2 Criteria for Estimators	10
2.1 Introduction	10
2.2 Computational Cost	10
2.3 Least Squares	11
2.4 Highest R^2	13
2.5 Unbiasedness	13
2.6 Efficiency	15
2.7 Mean Square Error (MSE)	16
2.8 Asymptotic Properties	18
2.9 Maximum Likelihood	21
2.10 Monte Carlo Studies	22
2.11 Adding Up	25
General Notes	25
Technical Notes	33
3 The Classical Linear Regression Model	42
3.1 Textbooks as Catalogs	42
3.2 The Five Assumptions	43
3.3 The OLS Estimator in the CLR Model	44
General Notes	47
Technical Notes	50

4	Interval Estimation and Hypothesis Testing	54
4.1	Introduction	54
4.2	Testing a Single Hypothesis: the t Test	54
4.3	Testing a Joint Hypothesis: the F Test	55
4.4	Interval Estimation for a Parameter Vector	57
4.5	LR, W, and LM Statistics	60
4.6	Bootstrapping	62
	General Notes	63
	Technical Notes	69
5	Specification	73
5.1	Introduction	73
5.2	Three Methodologies	74
5.3	General Principles for Specification	77
5.4	Misspecification Tests/Diagnostics	78
5.5	R^2 Again	81
	General Notes	83
	Technical Notes	91
6	Violating Assumption One: Wrong Regressors, Nonlinearities, and Parameter Inconstancy	94
6.1	Introduction	94
6.2	Incorrect Set of Independent Variables	94
6.3	Nonlinearity	96
6.4	Changing Parameter Values	99
	General Notes	101
	Technical Notes	108
7	Violating Assumption Two: Nonzero Expected Disturbance	113
	General Notes	115
8	Violating Assumption Three: Nonspherical Disturbances	116
8.1	Introduction	116
8.2	Consequences of Violation	117
8.3	Heteroskedasticity	119
8.4	Autocorrelated Disturbances	121
	General Notes	126
	Technical Notes	132

9	Violating Assumption Four: Measurement Errors and Autoregression	137
	9.1 Introduction	137
	9.2 Instrumental Variable Estimation	139
	9.3 Errors in Variables	140
	9.4 Autoregression	143
	General Notes	146
	Technical Notes	150
10	Violating Assumption Four: Simultaneous Equations	157
	10.1 Introduction	157
	10.2 Identification	159
	10.3 Single-equation Methods	163
	10.4 Systems Methods	166
	10.5 VARs	167
	General Notes	168
	Technical Notes	174
11	Violating Assumption Five: Multicollinearity	183
	11.1 Introduction	183
	11.2 Consequences	184
	11.3 Detecting Multicollinearity	186
	11.4 What to Do	187
	General Notes	189
	Technical Notes	193
12	Incorporating Extraneous Information	194
	12.1 Introduction	194
	12.2 Exact Restrictions	194
	12.3 Stochastic Restrictions	195
	12.4 Pre-test Estimators	195
	12.5 Extraneous Information and MSE	197
	General Notes	198
	Technical Notes	203
13	The Bayesian Approach	205
	13.1 Introduction	205
	13.2 What is a Bayesian Analysis?	205
	13.3 Advantages of the Bayesian Approach	209

13.4	Overcoming Practitioners' Complaints	210
	General Notes	212
	Technical Notes	217
14	Dummy Variables	221
14.1	Introduction	221
14.2	Interpretation	222
14.3	Adding Another Qualitative Variable	223
14.4	Interacting with Quantitative Variables	225
14.5	Observation-specific Dummies	226
14.6	Fixed and Random Effects Models	226
	General Notes	228
	Technical Notes	232
15	Qualitative Dependent Variables	233
15.1	Dichotomous Dependent Variables	233
15.2	Polychotomous Dependent Variables	235
15.3	Ordered Logit/Probit	236
15.4	Count Data	236
	General Notes	237
	Technical Notes	243
16	Limited Dependent Variables	249
16.1	Introduction	249
16.2	The Tobit Model	250
16.3	Sample Selection	251
16.4	Duration Models	252
	General Notes	254
	Technical Notes	257
17	Time Series Econometrics	263
17.1	Introduction	263
17.2	ARIMA Models	264
17.3	SEMTSA	265
17.4	Error-correction Models	266
17.5	Testing for Unit Roots	268
17.6	Cointegration	269
	General Notes	271
	Technical Notes	277

18	Forecasting	288
	18.1 Introduction	288
	18.2 Causal Forecasting/Econometric Models	289
	18.3 Time Series Analysis	290
	18.4 Forecasting Accuracy	291
	General Notes	292
	Technical Notes	297
19	Robust Estimation	298
	19.1 Introduction	298
	19.2 Outliers and Influential Observations	299
	19.3 Robust Estimators	300
	19.4 Non-parametric Estimation	302
	General Notes	304
	Technical Notes	306
	Appendix A: Sampling Distributions, the Foundation of Statistics	313
	Appendix B: All About Variance	317
	Appendix C: A Primer on Asymptotics	322
	Appendix D: Exercises	328
	Appendix E: Answers to Even-numbered Questions	384
	Glossary	406
	Bibliography	411
	Author Index	000
	Subject Index	000
