<i>Preface</i>	<i>xiii</i>
<b>PART I. BACTERIAL CLONING VECTORS</b>	<b>1</b>
<b>General Cloning Vectors for Gram-Negative Bacteria</b>	<b>3</b>
1. The Plasmid, pBR322      5 <i>Paulina Balbas, Xavier Soberon, Francisco Bolivar, and Raymond L. Rodriguez</i>	
2. Bacteriophage Lambda Cloning Vectors      43 <i>Joseph A. Sorge</i>	
3. Filamentous Phages as Cloning Vectors      61 <i>George P. Smith</i>	
4. Chimeric Single-Stranded DNA Phage-Plasmid Cloning Vectors      85 <i>David A. Mead and Byron Kemper</i>	
5. Phage-Plasmid Hybrid Vectors      103 <i>Gianni Cesareni</i>	
6. Cosmids      113 <i>Barbara Hohn, Z. Koukoliková-Nicola, W. Lindenmaier, and John Collins</i>	

<b>Specialized Cloning Vectors for Gram-Negative Bacteria</b>	<b>129</b>
7. Plasmid Positive Selection Vectors 131 <i>Frank H. Stephenson and Irene Kuhn</i>	
8. Vectors for Cloning Promoters and Terminators 153 <i>William C. Nierman</i>	
9. A Survey of Vectors for Regulating Expression of Cloned DNA in <i>E. coli</i> 179 <i>David T. Denhardt and Joseph Colasanti</i>	
10. Expression Vectors Employing Lambda-, <i>trp</i> -, <i>lac</i> -, and <i>lpp</i> -Derived Promoters 205 <i>Jürgen Brosius</i>	
11. Vectors with Adjustable Copy Numbers 227 <i>Nikos Panayotatos</i>	
12. Specialized Plasmid Vectors for Cloning cDNA 237 <i>David T. Denhardt, Dylan R. Edwards, Jacek Kowalski, Craig L.J. Parfett, and Paul Waterhouse</i>	
13. Vectors for the Synthesis of Specific RNAs in Vitro 253 <i>George A. Mackie</i>	
14. Improved Suppressor tRNA Cloning Vectors and Plasmid-Phage Recombination 269 <i>Henry V. Huang, Peter F.R. Little, and Brian Seed</i>	
<b>Cloning Vectors with Broad-Host-Range Capability</b>	<b>285</b>
15. Broad-Host-Range Plasmid Cloning Vectors for Gram-Negative Bacteria 287 <i>Thomas J. Schmidhauser, Gary Ditta, and Donald R. Helinski</i>	
16. Specialized Vectors for Members of Rhizobiaceae and Other Gram-Negative Bacteria 333 <i>Daniel R. Gallie, Philippe Gay, and Clarence I. Kado</i>	
<b>Cloning Vectors for Gram-Positive Bacteria</b>	<b>343</b>
17. Generalized Cloning Vectors for <i>Bacillus subtilis</i> 345 <i>Jeff Errington</i>	
18. Promoter Probe Plasmids for Gram-Positive Bacteria 363 <i>Paul S. Lovett and Skorn Mongkolsuk</i>	
<b>PART II. FUNGAL CLONING VECTORS</b>	<b>385</b>
19. Molecular Cloning Vectors of <i>Saccharomyces</i> : Generalized Cloning Vectors 387 <i>Robert W. West, Jr.</i>	

20. Plasmid Vectors for the Analysis of Regulatory Sequences in Yeast 405

*Michael R. Altherr and Raymond L. Rodriguez*

21. Molecular Cloning Vectors for *Aspergillus* and *Neurospora* 419

*Daniel Cullen, Gregory L. Gray, and Randy M. Berka*

**PART III. INSECT AND ANIMAL CELL CLONING VECTORS 435**

22. Vectors for P-Mediated Transformation in *Drosophila* 437

*Vincenzo Pirrotta*

23. Baculoviruses for Foreign Gene Expression in Insect Cells 457

*Lois K. Miller*

24. Mammalian Expression Vectors 467

*Anthony A.G. Ridgway*

25. Retroviral Vectors 493

*Jean-François Nicolas and John L.R. Rubenstein*

**PART IV. PLANT CLONING VECTORS 515**

26. *Agrobacterium tumefaciens* Ti Plasmid-Derived Plant Vectors for Dicotyledonous and Monocotyledonous Plants 517

*Paul J.J. Hooykaas*

27. Current Vectors for Plant Transformation 539

*Stephen G. Rogers, Robert B. Horsch, Robert T. Fraley, and Harry J. Klee*

*Index* 559
