

1997 International Symposium on Electromagnetic Compatibility Proceedings

1997, Beijing , China

Edited by
Zhang, Linchang
Zhou, Kesheng

電子工業出版社

CONTENTS

1A EMC Measurement(1)

Large Scale Computing System EMI Test Philosophy

Kwok M. Soohoo, Changyu Wu 1

Accurate Measurement for Radiated Susceptibility of Electronic Equipment Using a ATEM Cell

Shengxiang YANG 5

Design and Construction of Stripline for Measuring Electromagnetic Immunity of Vehicular Electrical Cables

Yeon—choon Chung, Tae—Won Kang 9

NSA and Resonance in a Semi—Anechoic Chamber in Low Frequency

Chen LIU, Yinghong WEN, Linchang ZHANG 13

Development of Coupling and Decoupling Networks Below 150 kHz

Nobuo Kuwabara, Yoshihiro Hiroshima 17

1B EMC in Communication System(1)

Optical Signal Processing of Interference and Fading Effects in High Bit Rate Mobile Communication

Yasumitsu Miyazaki 21

Interference Effects for PICO—CELL Indoor Personal Communication Systems

J. Gavan 25

VHF Sporadic E—A Significant Factor for EMI

Ernest K. Smith, Kiyoshi Igarashi 29

Effect of Chirp on Light Pulse Propagation in Dispersive Media

Zihua ZHANG, Zhiying ZHONG 33

The Use of GPS in Mobile Field Strength Measurement System

Shouning JIANG 37

1C Standards in EMC

IEC Standardization of Immunity to High Altitude Nuclear Electromagnetic Pulse (HEMP)

William A. Radasky, Manuel W. Wik 40

Comparing Euro—Norms to Military Standards

Diethard Hansen, Detlef Ristau 43

The New EEC Directive on EMC in Motor Vehicles(95/54 EEC/Nov. 95)(for Road Vehicle and Electric/Electronic Components)

Uwe Birnbaum 47

Electromagnetic Compatibility of Broadcast Receivers

Wei CHEN 57

Some Aspects Concerning the international and Russian EMC Standardization in the Field

of Radio Communication

G. V. Vodopianov, V. S. Karmashov, I. A. Nikitin, A. N. Balachov, M. Ianoz	60
The Current Status of the IEC 1000—4—x Basic EMC Standards	
Michael Hopkins	64

1D Seismo— Electromagnetic Phenomena

Nature of the Geoelectric Field Associated with GIC in Long Conductors Such as Power System, Pipelines, and Phone Cables

D. H. Boteler, R. J. Pirjola	68
On the Precursory Signature of Kobe Earthquake on VLF Subionospheric Signals	
M. Hayakawa, O. A. Molchanov, T. Ondoh, E. Kawai	72
The Study of Higher Frequency Seismogenic EM Emissions Based on The Observation Results of "Kobe Earthquake"	
Takeo Yoshino	76
Plasmon—Decay Model for Origin of Electromagnetic Wave Noises in the Earthquakes	
Yoshi Hiko Ohtsuki, Masashi Kamogawa	80
Dipole—Image Model for Origin of Electromagnetic Wave Noises in the Earthquakes	
Masashi Kamogawa, Yoshi—Hiko Ohtsuki	83

2A Shielding and Grounding

EMI Shielding—Common Problems and Containment Strategies

Louis Ferraris, Changyu Wu	86
Practical Guide to Large System SE(Shielding Effectiveness)Test	
Kwok M. Soohoo, Changyu Wu	90
Recent Developments in Elastomeric EMI Shielding Gasket Design	
Shu H. Peng, W. S. Vincent Tzeng	94
Analysis of Multiband Electromagnetic Shielding Effectiveness	
Tao TIAN, Shiming DU	98
Metallization of plastics for Shielding	
A. Sidhu, J. Michelsen, U. Messinger, R. Habiger, E. und Wolf, J.	102
Low Frequency Screening Effect in Urban Areas and the Engineering Measurement Technology	
Hong LIU, Weihai WU, Huimin CHEN, Qingbo MENG	106
Characterization of Electromagnetic Shield	
Gary Wong, Jacques Rollin, Riyaz Bhanji	110
EMI Caused By a Grounding Loop	
Guangfu LIU	114

2B EM Sensor, Probe Antenna

Research on Near Field of Airborne Short Wave Antenna

Zhenghui XUE, Benqing GAO, Ruixiang LIU, Xin LU, Yang LI	118
A High—Quality Ultra—Wideband Omni—direction Antenna	
Mingyu LU, Changsheng SHI	122
Development of a Fractional Loop Antenna for EMC Measurement	
P. K. Saha, N. M. Alam Chowdhury	126
Calibration Method and Device of Surface Current Probe	
Shiping TANG, Quanxin JIANG	130
Development of Standard Monopole Antenna for Antenna Factor Measurement	
Jeong Hwan Kim, Jeong Il Park	134
A Study of 12GHz Band Circularly Polarized High—Gain Radial Line Slot Antenna	
Zhilan ZHANG, Zhenyi JIA	138
Directional Antennas Standardization	
Hubert Trzaska	142
Antenna Model for EMI Evaluation	
Yonghe YANG, Ying LI	146
Highly Sensitive Humidity Sensor for Dielectric Measurement (Water Absorption) in Glass—Fiber Resins	
V. Matko, D. Donlagic	150
A 12GHz Band Linearly Polarized High —gain Microstrip Array Antenna Study	
Zhenyi JIA, Zhilan ZHANG	154
The Application of the CPD Method in the Analysis of the EM Field Excited by Vertical Electric Dipoles Over Horizontally Stratified Media	
Qingyi ZHANG, Jianming ZHU	158

2C EMI Prediction, Analysis and Reduction Technique

Modelling and Prediction of EMI Coupling Through Antennas Mounted on a Cylindrical Body	
S. Sengupta ,G. K. Deb	162
Case Study: Prediction of RFI Effects of Electrified Railways on Aeronautical Radio Navigation Stations	
Fei SHA, Zhongyong JIANG, Shouning JIANG	167
Reduction of EM Radiation from Electronic Equipment at Design Stage	
P. K. Saha, Jim Dowling	171
Electromagnetic Environment of an Automobile Controlled by Computer and Raising Reliability Measure	
Yongfeng JU, Lingju LI	175
On the Equivalence between Radiation and Injection in BCI Testing	
S. Pignari, F. G. Canavero	179
Interference and Elimination Techniques in the Infrared Remote Control System(IRCS)	
Hejie XU, Xiaojun XING, Yu ZHOU	183
Interference Suppression in Cochanel Relay Television System	
Liyi ZHANG, Deli LIU	187

Measurement and Analysis of Electromagnetic Radiation of City Rapid Guided Transit Systems	
Chen ZHANG, Yianting ZHOU	190
The Suppression Technique of Electromagnetic Interference of Motor Vehicle	
Chun YUAN, Zhifu SHEN, Bin LEI	194
A Study of Automobile Electromagnetic Disturbance or Noise Source	
Qianjiao WU	199

2D EMI Coupling and Crosstalk

Time— and Frequency—Domain Coupling Analysis of Field—to—Nonuniform Transmission Lines	
M. Omid, Y. Kami, M. Hayakawa	203
Magnetic Field of Transmission Line above Uniform Earth	
Lifang YU, Lixi WAN, Yougang GAO	207
Calculation of Conductive effects on Earth Return Circuits	
W. Machczynski	211
Reduction of Stress Voltages at Control Equipment Terminals in a Substation Through Inductive Coupling Between Cable Core and Sheath	
R. D. Southey, Jinxi Ma, F. P. Dawalibi	215
A New Method to Predict the Crosstalk of Multiconductor Transmission Lines	
Ming YIN, Wenbin DONG	219
Crosstalk Between Non—Parallel Transmission Lines of Finite—Length	
Weikun Liu, Yoshio Kami	223
Educational Comments on the Wide Band Transmission Characteristics of an Inserted Different Line	
Hiroshi Hata	227
Validation of Field—to—Transmission Line Coupling Models	
M. Ianoz, D. Orzan, F. Rachidi	231
Electromagnetic Compatibility of Antennas on a Mobile Board	
E. A. Ibatoulline	235
EMC Considerations in Spacecraft Harness Design	
K. S. Dayashankara, V. K. Hariharan, M. N. Rao, G. V. C. Rajan, A. A. Bokil ...	
.....	239
Transient Simulation of Lossy Multiconductor Interconnects	
F. Canavero, I. Maio	243

3A EMC Measurement(2)

Experimental Verification of OATS Field Distribution Predicted by Mutual Impedance Coupling Model	
Paul Derry, Tee G. Tang	247
Development of Low Cost and High resolution APD Measuring Equipment	
Masaharu Uchino, Yoshinobu Hayashi, Takashi Shinozuka, Risaburo Sato	253

Simulation of The Field Characteristics of The TEM Cell by TLM Method	
Yunhua ZHANG , Jingshan JIANG	257
Determining Radiation Characteristics of a Practical Source with a TEM Cell	
C. M. Chi, W. T. Shay, R. R. Lao, M. T. Ma	261
TEM Horn Antenna for the Time Domain Shielding Effectiveness Measurement	
Jeong Hwan Kim, Jeong Il Park	265
Measurement Uncertainty in EMI Emission Measurements	
Manfred Stecher	270
The Use of Detectors Instead Power Meters: A Simple and Cheap Option in Microwave Measurement	
Alfredo Gomes Neto, Alexandre Scaico	274
A Automatic Measurement System of Mobile Communication Field Strength	
Shouning JIANG	277
The TEM Cell Test Method(for Road Vehicle Electronic Components)	
Uwe Birnbaum	281
Effective Testing of Computerized Equipment for EMC Immunity to Fast Electrical Transients	
S. Wendsche, E. Habiger	288

3B EMC in Communication System(2)

A Simple Approach for Estimating the Radiation Envelope of an Entire Short Wave Broadcast Station	
Elya B. Joffe	292
Experimental Evaluation of MSK and GMASK with Differential Detection in Non—Gaussian Impulsive Noise Environment	
Jianqing WANG, Osamu Fujiwara, Tasuku Takagi	296
Experimental Investigation of Electromagnetic Compatibility Between GSM—900 Cellular Networks and Ree of the Aeronautical Radionavigation Service	
M. Bykhovsky, V. Vysochin, Y. Lougovskoy, V. Tikhinski, P. Mamchenkov ...	300
Simulations of Time Selective Fading Mobile Radio Channel	
Hongbo ZHU, Yougang GAO	304
Performance of Radio Communication Systems under Microwave Oven Interference Environment	
Shinichi Miyamoto, Norihiko Morinaga	308
Power Frequency Interference Rejection in Power Line Carrier Communication	
Huakui WANG, Liyi ZHANG, Yingzheng HAN	312
Receiver Design of CDMA System for Impulsive Radio Noise Environment	
Sakda Unawong, Shinichi Miyamoto, Norihiko Morinaga	316
The Study on Electromagnetic Noise of Satellite Ground Station	
Ping LIU, Qingbin WANG	320
Electromagnetic Scattering by Shielding Object in Mobile Communication System	
Yasumitsu Miyazaki, Tadahiro Masuda	324

The Affection on CDMA System Caused by Electromagnetic Environment of 800MHz

Cellular Frequency

Ruiting HOU	328
-------------------	-----

3C1 Biological Effects

A Primary Study on Near Field Distribution of Hand—Held Transceivers on the Horizontal Plane

Weiping DOU , Linchang ZHANG	332
------------------------------------	-----

Cellular Sectorial Radio Relay Stations—Radiation Safety to Personnel

Moshe Z. Netzer, Oren Hartal	336
------------------------------------	-----

Threshold of Perception for Capacitor Discharge on the Human Body

Yongxin LIU, Zhancheng WU, Shanghe LIU	340
--	-----

Some Experimental Results for the Head/Hand Effects in Personal Communications

Alfredo Gomes Neto, Joabson Nogueira de Carvalho , Jefferson da Costa e Silva ...	344
---	-----

Measurement of Near Field Around Hand—held Transceiver

Yun ZHU, Linchang ZHANG , Fei SHA	348
---	-----

3C2 EMC in Microelectronics

IC Models for the Simulation of the Emission Radiated from PCB

Chiharu Miyazaki, Naoto Oka, Takeshi Uchida, Shuichi Nitta	352
--	-----

Estimation of Internal Impedances of Digital ICs

Satoshi Kazama, Shinichi Shinohara, Risaburo Sato	356
---	-----

The Improvement of Non—Selection Characteristics on Semiconductor Digital Multiplexer

Shuichi Nitta, Yingjian Niu, Yoshio Maehana	360
---	-----

EMC—Driven Placement for MCM

Wushiung FENG, Yawhua TSENG	364
-----------------------------------	-----

The Measurement and Analysis of Radiated Power from Program Control Mini—Switchboard

Changlin ZHOU, Jinsong MIAO, Xianghua FENG, Daopeng XU	368
--	-----

4A EMC in Computer and PCB's

Installation of EMI Mitigation Information Technology Environments

Brian P. Rawson, Changyu Wu	371
-----------------------------------	-----

EMC Design in a Microprocessor Based System

A. K. Ghose, G. K. DEB	374
------------------------------	-----

The Electromagnetic Leakage and Protection for Computer

Ling LIU, Yan NIE, Hongjin ZHANG	378
--	-----

The Dependence of The Immunity of Digital Equipment on The Hardware and Software Structure

Ralf Vick, Ernst Habiger	383
--------------------------------	-----

The Measurement Study of Radiated Emission for Chip Microcomputer Development System

Changlin ZHOU, Xuebing QIN, Zhongyi ZHU, Qingmei CHANG	387
--	-----

The Effect of Segmented Metal Plane in Microstrip Structure

Akihisa Sakurai, Takashi Asano, Hideki Kabayama	389
On the Effects of Bianisotropic Covers on PCB Radiation	
Paola Pirinoli, Riccardo E. Zich	393
General Strategy for Designing a Low—Radiation Computer	
Tungyun BAI	397

4B1 EMC in Power Engineering

Assessing How Safe are the Rural Tin—shed Houses in the Vicinity of EM Fields of the Cross—Country Power Lines

S. Shahnawaz Ahmed , Rezaul Haque	401
---	-----

Mathematical Model of Predicting Power Frequency Electric Field Round the Corner of High Voltage Transmission Lines

Peng ZOU , Xiaoping ZHOU	405
--------------------------------	-----

Computation and Measurement of Electrical Interference Effects in Aqueducts due to Nearby Parallel Transmission Line

J. Ma, F. P. Dawalibi, R. D. Suthey	409
---	-----

A Study of Second Reflection effects of High Voltage Transmission Line on HF Antenna Radiation Characteristics by Scaling Model

Kesheng ZHOU, Linchang ZHANG, Wei YAN	413
---	-----

4B2 Spectrum Management and Education

Electromagnetic Interference Problems in Mobile Wireless Communication System and ITS Efficient Frequency Management

G. K. Deb	417
-----------------	-----

Spectrum Management and Electromagnetic Compatibility for Today's Communication

Xiaoting SONG	421
---------------------	-----

Fast Channel Assignment in Irregular Radio Systems

Robert A. Leese	426
-----------------------	-----

Experience in The Implementation of The Basic Automated Spectrum Management System(BASMS) of The International Telecommunication Union(ITU)

B. Nurmatov, A. Pavliouk	430
--------------------------------	-----

Multimedia in EMC Education

A. A. Worshevsky	434
------------------------	-----

PULP, an Educational Software Package for Line Parameters Calculation

S. Grivet—Talocia S. Salio, F. Canavero	438
---	-----

4C EM Calculation

A Hybrid Method on Calculating EM Coupling in Large Problem Spaces

Jiaying WANG, Benqing GAO	442
---------------------------------	-----

Calculation of the Electric and magnetic Fields Near of the Energy Objects

I. P. Vereshchagin, A. A. Beloglovsky, M. M. Bumistrov, V. N. Vinokurov	446
Electric Field Strength Distribution around Man Model Exposed to the Radiation of Cellular Phones	
Yinghong WEN, Fenglan WANG, Linchang ZHANG	450
Numerical Dispersive Characteristics and Stability Condition of the Multi—Resolution Time—Domain (MRTD) Method	
IcPyo Hong, Namll Yoon, Hankyu Park	455
Electromagnetic Scattering from Multiple Slots in Thick Conducting Screen Terminated by a Common Load	
Yinghua LU, Xinwei WANG, Jian CUI	459
Models of A Cable Bunch Formed by Twisted Three—Phase Cables	
Matthias Ehrich, Joachim Kuhlmann, Dirk Netzler	463
An Improved Characteristic Based Methods for the Time —Domain Maxwell Equations	
Yi LIU, Li TANG, Benqing GAO	467
Reflection Method Generalization for Solution of Electromagnetic Compatibility Pulse Problems for Non—Rectangular Cavities	
S. Tkatchenko, G. Vodopjanov, L. Martynov	471
Gaussian and Non—Gaussian Statistics	
Jozef J. Pawelec	475

5A Lightning, EMP and ESD

Does an Overhead Lightning Protection System Protect Structures Against Nearby Strikes

J. C. Chai, A. O. Britting, Jr.	480
---------------------------------	-----

Lightning Protection in Chinese Railway Traffic Control System

Qiangong AN, Juzhen WANG	484
--------------------------	-----

Measurement of Voltage Rise Curves due to Gap Discharge Using Coupled Transmission Lines in Distributed Constant Line System

Ken Kawamata, Shigeki Minegishi, Akira Haga, Risaburo Sato	489
--	-----

The Research of Protection from EMP of Civil Shelter

Deju Li, Youliang CONG	493
------------------------	-----

Lightning Radiation Field due to Channel Tortuosity and Branching

G. Vecchi, R. E. Zich and F. C. Canavero	496
--	-----

Direction Finding on Far—Distance Lightnings

Linhua Hu, Wenbing Fu, Wenfong DONG	500
-------------------------------------	-----

A Fractal Model for the Lightning Induced Current on a Transmission Line

S. Salio, F. Canavero, G. Vecchi	502
----------------------------------	-----

5B Filter, Absorbing Material

Design of Antijamming in Microwave Remote—vision System

Liyi ZHANG, Huakui WANG	506
-------------------------	-----

Absorbing Materials Optimization on Characteristics Parameters	
Xinwei WANG, Yinghua LU	509
Studies on Characteristics of Absorbing Materials	
Xinwei WANG, Yinghua LU	512
Adaptive Filter Using Decision—Feedback to Suppress BPSK Interference in Spread Spectrum Systems	
Hongyu SUN, Libing DU	515
Increased Surge Voltage Caused by EMC Chokes	
M. J. Maytum, K. Howard	519
Effect of Ferrite Core Attachment to Coaxial Cable on Differential Mode Noise Caused by Braided Shield Current	
Osamu Fujiwara, Takeshi Ichikawa, Hiroyuki Kawada	523
A Study on Design of EMI Line Noise Filters	
Mitsuhiko Kanda, Katsumi Tomiyama	527
A study on the Resistor Array Networks for the Optimum Termination of a Modified Large TEM Cell	
Joong Geun Rhee, Moon soo Kang	531
