

# Engineering Seismology and Site Response

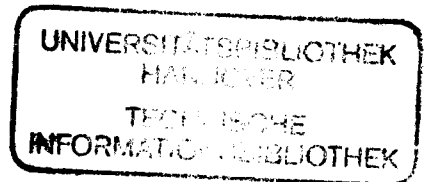

Proceedings of the fourth International Conference  
on Soil Dynamics and Earthquake Engineering,  
Mexico City, Mexico, October 1989

Editors:

A.S. Cakmak

I. Herrera

Computational Mechanics Publications  
Southampton Boston

## CONTENTS

### PREFACE

### SECTION 1 - ENGINEERING SEISMOLOGY

- Microseismic Borehole Breakout Measurements to Determine Stresses in the Earth's Crust 3  
*G. Borm*
- Natural and Induced Seismicity in Ohio 13  
*Joseph A. Fischer*
- Mexico 1985: The Case for Gravity Waves 27  
*C. Lomnitz*
- A Time Domain Study of Strong Ground Motions in Mexico City 37  
*M.A. Santoyo, C. Calderón, M. Suarez, F.J. Sánchez- Sesma, M.A. Bravo and S. Chávez-Pérez*
- The Great 1985 Michoacan Earthquake: A Unified Approach Considering Source, Path and Site Effects 53  
*F.J. Sánchez-Sesma, M. Campillo, P.-Y. Bard, J.C. Gariel, and K. Aki*
- Lessons from Low Intensity Earthquakes in Mexico City 77  
*J.A. Otero, J. Prince and A. Reyes*

### SECTION 2 - GROUND MOTION

- Comparison of Matrix Methods in One-Dimensional Amplification Problems 89  
*J.L. Urrutia-Galicia, S.E. Ruiz and R. Diederich*
- Use of Gaussian Beams to Model Refraction of Elastic Waves by Two-Dimensional Inclusions of Arbitrary Shape 101  
*J.L. Rodríguez-Zúñiga, F.J. Sánchez-Sesma, M.A. Santoyo and M.A. Bravo*
- Regression Analyses of Strong-Motion Spectra in terms of a Simplified Faulting Source Model 113  
*Makoto Kamiyama*

Relations Between Soil Conditions in Mexico City and Ground Motions of the 1985 Mexico Earthquake <i>Makoto Kawamura, Tomotaka Ozawa and Tomomi Arai</i>	127
Dynamic Behavior of Reinforced Earth Retaining Walls <i>Makoto Kawamura, Keisuke Sano and Koziro Okabayashi</i>	135
A Numerical Analysis Method for the Wave Equations in Visco-Elastic Medium <i>H. Yokoyama</i>	143
Hysteretic Damping in the Seismic Analysis of an Earth Dam <i>D.V. Griffiths and J.H. Prevost</i>	155
An Efficient Three-Dimensional Dynamic Analysis of Gravity Dams <i>Ahmed Rashed and Kumarasamy Kandasamy</i>	167
<b>SECTION 3 - SITE RESPONSE</b>	
A Hybrid Approach to Study the Seismic Response of Soft-Soil Sedimentary Basins <i>M.A. Bravo, F.J. Sánchez-Sesma, and S. Chávez-Pérez</i>	183
Seismic Response of Three-Dimensional Alluvial Basins of Axisymmetric Shape <i>Sergio Chávez-Pérez, Jaime Ramos-Martínez and Francisco J. Sánchez</i>	195
Ground Motion on Stratified Alluvial Basins <i>F.J. Sánchez-Sesma, J.-F. Heitz, and M.A. Bravo</i>	209
Dynamic Amplification of Seismic Waves by Alluvial Valleys in Layered Medium <i>M. Bouden, S.K. Datta and A.H. Shah</i>	221
Validity of Two Dimensional Modeling for Scattering of Elastic Waves by Three Dimensional Surface Topography of Arbitrary Shape <i>Hossein Eshraghi and Marijan Dravinski</i>	233
Effect of Random Thickness Variations on the Seismic Response of a Soft Soil Layer: Applications to Mexico City <i>Francisco J. Chávez-García and Pierre-Yves Bard</i>	247
Geologic Resonators of Arbitrary Geometry: Chaotic Behavior of Trapped Seismic Waves <i>J.A. Rial</i>	263
Numerical Modelling of the Radiation Condition of Unbounded Media <i>M.O. Al-Hunaidi</i>	279
Ground Response Characterization of the Valley of Mexico <i>A.H. Hadjian and R.B. Fallgren</i>	293
