

Injection & Sprays (I)

Chairman: W. Knecht. Iveco Motorenforschung (SWITZERLAND)

Keynote Address:

From Concept to end Product - Prediction and Experiment in Diesel Injection Systems

C. Soteriou. Delphi Diesel Systems (UK).....5

Correlation of Spray Symmetry with Mass and Momentum Distribution of Multihole Diesel Nozzles

E. Kull and C. Krüger. Siemens. VDO Automotive (GERMANY).....7

Nozzle Hole Geometry a Powerful Instrument for Advanced Spray Design

J. Winter, B. Dittus, A. Kerst, O. Muck, R. Schulz and A. Vogel. Robert Bosch. (GERMANY).....19

Analysis of the Influence of the Injection Strategy on Cavitating Nozzle Flow, Spray Formation and Combustion in a Heavy Duty Truck Engine. Effects on Spray and Mixture Formation

U. Michels, C. Krüger, G. König, M. Blessing, V. Schwarz. DaimlerChrysler (GERMANY)
 G. Merker. Universität Hannover (GERMANY).....35

Injection & Sprays (II)

Chairman: J. Affenzeller. AVL (AUSTRIA)

Cavitation Modelling in Single-Hole Diesel Injector Based on Eulerian-Lagrangian Approach

E. Giannadakis and H. Roth. Imperial College, London (UK)
 M. Gavaises and C. Arcoumanis. City University (UK).....47

Influence of the Nozzle Geometry on Diesel Injector Internal Flow: A Computational Approach

B. Argueyrolles, D. Maligne and D. Passerel. Renault (FRANCE).....61

Experimental and Numerical Investigation of Transient Sprays Formation

C. Méndez, B. Giménez, F. Castro and F. Tinaut. Universidad de Valladolid (SPAIN).....77

Prediction of Diesel Spray Penetration with Short Injections in Low Density Gas

L. Araneo. Politecnico di Milano (ITALY).....87

Air Management & Turbocharging (I)

Chairman: D. Ivaldi. Centro Ricerche Fiat (ITALY)

Keynote Address:

The Evolution of Turbocharging in Diesel Engines

H. Tennant. Holset Turbochargers (UK).....101

Influence of Various Compressor Inlet Designs on Compressor Performance

- H. Schulte, N. Schorn and H. Kindl. Ford Aachen (GERMANY)
J. R. Serrano, X. Margot and C. Donayre. Universidad Politécnica de Valencia (SPAIN).....103

Simulation and Analysis of the Transient Behaviour of a Turbocharged Common Rail Diesel Engine

- S. Breuer. PSA - Peugeot Citroën (FRANCE).....117

Turbocharger Compressor Flow Range Improvement for Future Heavy Duty Diesel Engines

- B. Nikpour. Holset Turbochargers (UK).....125

Air Management & Turbocharging (II)

Chairman: X. Boncompie. Iveco Pegaso (SPAIN)

1D Computational Model for the Prediction of the Thermo-Fluid Dynamic Behaviour of Diesel Particulate filters

- G. Montenegro, G. Ferrari and A. Onorati. Politecnico di Milano (ITALY).....147

A Novel Computational Approach for Simulation of Particle Deposition in Foam Filters

- W. Brandstätter and B. F. Gschaider. University of Leoben (AUSTRIA)
C. Wassermayr. Veitsch-Radex & Co. (AUSTRIA).....161

In-Cylinder Flow Characterization of Modern HSDI Diesel Engines – Numerical and Experimental Evaluation of Current Practices

- B. van den Heuvel, W. Willems, E. Karvounis and H. Schulte. Ford Aachen (GERMANY).....171

Turbocharger Turbine Unsteady Computational Study

- D. Palfreyman and R. Martínez-Botas. Imperial College, London (UK).....191

Combustion & Emissions (I)

Chairman: A. Coghe. Politecnico di Milano (ITALY)

Keynote Address:

Aspects of Soot Formation in Diesel Fuel Jets

- D. Siebers and M. Pickett. Sandia National Laboratories (USA).....213

Investigation of Early Soot Formation Process in a Transient Spray Flame Via Spectral Measurements of Laser-Induced Emission

- T. Aizawa, H. Kosaka and Y. Matsui. Tokyo Institute of Technology (JAPAN).....229

Modelling of Soot Concentration and Morphology from Smoke Opacity Measurements

- M. Lapuerta, O. Armas, R. Ballesteros. Universidad Castilla-La Mancha (SPAIN)
F. J. Martos. Universidad de Málaga (SPAIN).....239

Combination of High Injection Pressure and EGR to Control Nitric Oxide and Soot in DI Diesel Engines

- D. Hountalas and E. G. Pariotis. National Technical University of Athens (GREECE)
 J. Benajes and C. A. González. Universidad Politécnica de Valencia (SPAIN).....253

Combustion & Emissions (II)

Chairman: R. Krieger. General Motors Corp. (USA)

Prediction of Turbulence Controlled Combustion in Diesel Engines

- F. Chmela, M. Engelmayer, G. Pirker and A. Wimmer. Large Engines Competence Center (AUSTRIA).....275

Isotopic Tracing Potential for Pollutant Formation Investigation on Engines

- K. Lombaert, L. Le Moyne and P. Guibert. Université Pierre et Marie Curie (FRANCE)
 J. Amouroux. ENSCP (FRANCE).....289

Combustion Diagnostics of a Diesel Engine with Multiple Injection

- F. E. Corcione, S. Di Iorio, S. Merola and B. M. Vaglieco. Istituto Motori (ITALY)
 E. Mancaruso. Università di Napoli Federico II (ITALY).....297

Modelling of a Six-Mode Diesel Test Cycle Using the CFD Code Fluent

- U. Schmidt, W. Seibert and M. Ehlen. Fluent (GERMANY)
 X. Hu. Fluent Inc. (USA).....309

Combustion & Emissions (III)

Chairman: C. Angelberger. Institut Français du Pétrole (FRANCE)

Keynote Address:**The Future of High Speed Compression Ignition (Diesel) Engines**

- S. El Tahry. General Motors (USA).....319

Advanced Combustion System Design; Control and Optimisation to Meet the Requirements of Future European Passenger Cars

- B. Cooper, N. Jackson, I. Penny, D. Rawlins, A. Truscott and J. Seabrook. Ricardo Consulting Engineers UK).....321

Laser Optical Diagnostics and Numerical Analysis of HSDI Combustion Systems

- P. Adomeit. FEV Motorentechnik (GERMANY)
 S. Pischinger, M. Becker and H. Rohs. VKA, RWTH Aachen (GERMANY)
 A. Greis. LTFD (GERMANY).....331

Diagnosis of Combustion with Water Injection Using High-Speed Visualization and CFDs

- H. Tajima, K. Takasaki, A. Strom and R. Masuda. Kyushu University (JAPAN)
 L. Goldsworthy. Australian Maritim College (AUSTRALIA)
 T. Takishi. Mitsubishi Heavy Industries (JAPAN).....341

Experimental Techniques

Chairman: T. Kamimoto. Tokai University (JAPAN)

Application of PIV Technique and Use of Fluorescent Tracers to Direct Measurements of Air Entrainment in Diesel Sprays

A. Arbeau, R. Bazile and G. Charnay. Institut de Mécanique des Fluides de Toulouse (FRANCE)
 L. Ben. CEMAGREF (FRANCE)
 P. Gastaldi. Renault (FRANCE).....355

Simultaneous Measurements of Velocity and Size of Diesel Fuel Droplet near Nozzle Orifice by Laser 2-Focus Velocimeter with Micro-Scale Probe Volume

H. Ueki, M. Ishida, D. Sakaguchi and M. Naganuma. Nagasaki University (JAPAN).....369

Spray Structure of Multi-Component Fuels on Evaporating Transient Diesel Sprays

K. Myong, H. Suzuki, J. Senda and H. Fujimoto. Doshisha University (JAPAN).....381

New Combustion Concepts (I)

Chairman: J-P. Fayolle. Volvo Powertrain-Renault Division (FRANCE)

Keynote Address:

New Concepts for Diesel Combustion

P. Pinchon, B. Walter, B. Réveillé and M. Miche. Institut Français du Pétrole (FRANCE).....395

Development and Application of Detailed Chemistry-Based CFD Models for Diesel PCCI Engine Simulations

S-C. Kong, A. Patel and R. D. Reitz. University of Wisconsin-Madison (USA).....415

Rate-Limiting Processes in Late-Injection, Low-Temperature Diesel Combustion Regimes

P. C. Miles, D. Choi and L. M. Pickett. Sandia National Laboratories (USA)
 I. P. Singh and N. Henein. Wayne State University (USA)
 B. A. RempelEwert, H. Yun and R. D. Reitz. University of Wisconsin-Madison (USA).....429

Investigations on Methods to Control the Rate of Heat Release of HCCI Combustion in Diesel Engines by Numerical Simulation Using Reduced Chemical Kinetics of n-Heptane with a Multidimensional CFD Code

F. Maroteaux and L. Noel. Université Pierre et Marie Curie (FRANCE)
 A. Ahmed and E. Brieç. Renault (FRANCE).....449

New Combustion Concepts (II)

Chairman: I. Magnusson. Volvo Technological Dev. Corp. (SWEDEN)

New Developments of the NADI™ Concept to Improve Operating Range, Exhaust Emissions and Noise

A. Ranini, S. Potteau and B. Gatellier. Institut Français du Pétrole (FRANCE)..... 469

A Computational Study of the Impact of Mixing on Homogeneous Charge Compression Ignition

R. Jhavar and C. J. Rutland. University of Wisconsin-Madison (USA).....483

Homogeneous Charge Compression Ignition Engine with Two-Stage Diesel Fuel Injection

S. Kook, J. Kong and C. Bae. Korea Advanced Institute of Science and Technology (KOREA)
K. Min. Seoul National University (KOREA).....497

Enhancement of the Pre-Mixed Combustion in a HD Diesel Engines by Adjusting Injection Conditions

J. Benajes, S. Molina, J. M. Riesco and R. Novella. Universidad Polit cnica de Valencia (SPAIN).....511

Engine Optimisation

Chairman: P. Marez. PSA Peugeot Citro n (FRANCE)

Keynote Address:

The Evolution of Heavy Duty Engines and Strategies for Compliance to the Emission Legislation

G. Wirmark. Volvo (SWEDEN).....527

Computer-Aided Optimisation of Engine Control Unit Transient Maps

I. Balloul and M. Lejeune. Renault V. I. (FRANCE).....529

An Experimental Validation of a Genetic Algorithm Coupled with a CFD Code for Combustion Chamber Design

C. Choi, R. M. McDavid, S. S. Still and C. R. Gherke. Caterpillar (USA)
P. K. Senecal. Convergent Thinking LLC (USA).....537

An Evolutionary Methodology for the Design of a D.I. Combustion Chamber for Diesel Engines

A. De Risi, T. Donato, D. Laforgia, G. Aloisio, E. Blasi and S. Mocavero. University of Lecce (ITALY).....545

Noise Control

Chairman: V. Padilla. Nissan Technical Center Europe (SPAIN)

Acoustic Source Characterisation for Diesel Engine Exhaust Systems

H. Bod n. KTH-Royal Institute of Technology (SWEDEN).....563

Idle Noise Reduction of Light, Medium and Heavy Duty Diesel Engines

P. Scarth. Iveco Motorenforschung (SWITZERLAND)
D. Ortiz. Iveco Pegaso (SPAIN).....579

Index of authors.....592
