

PACIFIC STRUCTURAL STEEL CONFERENCE 1989

STEEL 2001

28th – 31st MAY 1989

**Gold Coast
Queensland
Australia**

**UNIVERSITÄTSBIBLIOTHEK
HANNOVER
TECHNISCHE
INFORMATIONSBIBLIOTHEK**

PAPERS

AUSTRALIAN INSTITUTE OF STEEL CONSTRUCTION

**UB/TIB Hannover 89
101 223 919**

RR 1111(2)

General Index

(arranged in the sequence of the Conference Programme)

KEYNOTE PAPER:

Education for Steel – Prospects and Problems

W. McGUIRE, *Cornell University, Ithaca NY*

3

SESSION ONE, Strand One – Composite Design

A New Floor Slab System composed of Lipped Large Channel Steel and Concrete

B. KATO, *University of Tokyo*, K. SATO and M. KOBAYASHI, *Kajima Corporation, Japan*

113

Design of Continuous Composite Slabs – the Issue of Ductility

M. PATRICK and S. L. POON, *BHP Melbourne Research Laboratories*

121

Composite Beam Web Penetration Design Methods – a Parametric View

M. PATRICK and A. J. O'MEAGHER, *BHP Melbourne Research Laboratories*

122

SESSION ONE, Strand Two – Computers

CAD/CAM System for the Steel Construction Industry

K-M YEP, K. B. WATSON, D. P. BUCHHORN, A. N. DRUTCHININ and P. J. CAYZER,
BHP Steel International Group, Melbourne

123

Expert System for Steel Connection Design

S. ELHOUAR and T.M. MURRAY, *Virginia Polytechnic Institute and State University, USA*

134

Application of Computers to Steel Design and Drafting

L. J. McGRATH, *ENS Consulting Engineers, Ballarat, Vic.*

143

KEYNOTE PAPER:

Background to the Draft Australian Limit States Steel Structures Code

N. S. TRAHAI, *University of Sydney*

and T. J. HOGAN, *Stigter Clarey & Partners, Sydney*

11

SESSION TWO, Strand One – Codes I

A User-Friendly Program for the Limit State Design of Steel Structures

J. P. PAPANGELIS and N.S. TRAHAI, *University of Sydney*

155

The Philosophy of Limit States Design of Steel Connections for Simple Construction

L. PHAM, *CSIRO Division of Building, Melbourne*, and D. S. MANSELL, *University of Melbourne*

170

SESSION TWO, Strand Two – Case Studies I

Capita Building, Sydney – a Case Study

A. BIRZULIS, *Miller Milston & Ferris, Sydney*

179

Pinjarra Mud Thickener for Alcoa

W. M. NEWMAN and V. P. MURDOCCA, *Newman Murdocca & Partners, Sydney*

189

SESSION THREE, Strand One – Codes II

Limit State Design of Columns fabricated from Slender Plates

K. J. R. RASMUSSEN and G. J. HANCOCK, *University of Sydney*

A. J. DAVIDS, *Wargon Chapman & Partners, Sydney*

215

Design Examples using Tiers in the Draft Limit States Code

R. Q. BRIDGE, *University of Sydney*

230

Limit States Design Requirements for Torsional Stiffness of Shear Connections

L. PHAM, *CSIRO Division of Building, Melbourne*
and D. S. MANSELL, *University of Melbourne*

231

SESSION THREE, Strand Two – Bins, Silos

Corrugated Steel Silos – Stressed Skin Design

I. D. MILLER, *I. D. Miller & Associates, Brisbane*

236

Buckling Analysis of Steel Bins with Eccentric Discharge – a Case Study

A. PARSANEJAD and A. CURRIE, *University of Technology, Sydney*

249

End of Day 1

KEYNOTE PAPER:

Bridges in Steel – Japan

Y. FUKUMOTO, *Osaka University*

23

SESSION FOUR, Strand One – Bridges

Composite Cable Stayed Bridges – the Concept with the Competitive Edge

P. R. TAYLOR, *Buckland & Taylor, Vancouver*

259

Fatigue Assessment of Orthotropic Steel Decks of Box Girder Bridges

K. YAMADA, M. KATO, *Nagoya University, Japan*, A. KONDO, *Meijiyo University, Japan*
and H. ISHIZAKI, *Hanshin Expressway Public Corporation*

273

SESSION FOUR, Strand Two – Fabrication I

How Efficient Fabrication and Modern Welding Processes ensured the Viability of Steel
for the Port Kembla Grain Terminal

R. JONES, *Transfield, Port Kembla*, and R. G. SIM, *The Lincoln Electric Company, Sydney*

283

An Expert System for improving Arc Welding Productivity

R. SEIDEL, *University of Auckland, NZ*, and W. SCHOLZ, *New Zealand Welding Centre*

285

KEYNOTE PAPER:

Floor Vibration in Buildings- State of the Art Summary

T. M. MURRAY, *Virginia Polytechnic Institute & State University, USA*

39

SESSION FIVE, Strand One – Seismic Design

Lessons learned for Steel Seismic Design from the 1987 Edgecumbe Earthquake

G. D. CLIFTON, *NZ Heavy Engineering Research Association, Auckland*

297

Inelastic I-shaped Beam-Columns in Earthquake Resistant Structures

G. A. MacRAE, A. J. CARR and W. R. WALPOLE, *University of Canterbury*

309

Cyclic Bending of Steel I-shaped Beam-Columns

G. A. MacRAE, W. R. WALPOLE and A. J. CARR, *University of Canterbury*

320

SESSION FIVE, Strand Two – Fabrication II

The Economics of Structural Shop Automation

C. B. JENSEN, *Jensen Drilling Systems, Fort Wayne, Indiana*,
and J. H. BUSCH, *Haven Busch, Grandville, Michigan*

333

Fabrication Technology in Singapore

LIM SOON HENG, *Keppel Engineering, Singapore*,
and T. J. MacGINLEY, *Nanyang Technological Institute, Singapore*

349

KEYNOTE PAPER:

Structural Applications of Quenched and Tempered Steels

G. HAAIJER and F. R. BECKMAN, *American Institute of Steel Construction, Chicago*

52

SESSION SIX, Strand One – Materials I

The Use of High Strength Quenched and Tempered Steels in Structures in Australia

J. E. CROLL, *Bunge Industrial Steels, Wollongong, Australia*

363

Newly Developed Thermo-Mechanical Control Process for Thick Steel Plates for High Rise Buildings

N. NAKANO, S. SUZUKI, K. OHNISHI and Y. KAMADA, *Sumitomo Metal Industries, Japan*

375

SESSION SIX, Strand Two – Fabrication III

Steel Erection of Multi-storey Steel Framed Buildings

L. J. O'BRIEN, *BHP Steel International Group, Perth*

383

Cold Bending of Circular and Rectangular Hollow Sections

D. BHATTACHARYYA and J. Q. WANG, *University of Auckland, NZ*

401

KEYNOTE PAPER:

Marketing Steel Framed Buildings – an Introspective View

J. K. RITCHIE, *Canadian Institute of Steel Construction, Toronto*

65

SESSION SEVEN, Strand One – Research I

Geometric Non-linear Analysis of Thin-walled Structures using One Element per Member

F. G. A. AL-BERMANI and S. KITIPORNCHAI, *University of Queensland, Brisbane*

415

Inelastic Behaviour of High Strength Steel Members with Low Yield Ratio

H. KUWAMURA, *Nippon Steel Corporation, Japan*, and B. KATO, *University of Tokyo*

429

SESSION SEVEN, Strand Two – Fabrication IV

Micaceous Iron Oxide Pigmented Coatings for Long Term Corrosion Prevention of Steel Bridges

S. WIKTOREK, *C-Ramic Australia, Wollongong*

438

End of Day 2

KEYNOTE PAPER:

Steelwork Connections – Current State of the Art in Australia

T. J. HOGAN, *Stigter Clarey & Partners, Sydney*and I. R. THOMAS, *BHP Melbourne Research Laboratories*

80

SESSION EIGHT, Strand One – Connections I

Fatigue Test Data Base of Steel Structural Elements and Allowable S-N Diagrams

K. YAMADA, H. SHIGETOMI and S. UTSUNOMIYA, *Nagoya University, Japan*

441

SESSION EIGHT, Strand Two – Research II

Evaluation of Ultimate Strength of Steel Plates under In-plane Combined Loading

S. NARA, *Gifu University, Japan*, and Y. FUKUMOTO, *Osaka University, Japan*

450

Design of Steel Storage Rack Columns against Distortional Buckling

S. C. W. LAU, *Ove Arup & Partners, Sydney*, and G. J. HANCOCK, *University of Sydney*

461

SESSION NINE, Strand One – Connections II

Flexible Steel and Composite Joint Design

T. J. MacGINLEY and P. ANG THIEN CHONG, *Nanyang Technological Institute, Singapore*

479

Recent Developments in High Strength Swage Lock Fastening Systems and Tooling

M. WILLIAMS, *Huck Australia, Melbourne*

497

SESSION NINE, Strand Two – Research & Testing

Portal Frame Eaves Joints using Cold Formed C-Sections

L. M. NASH, C. GILBERT and W. VAATSTRA, *SA Institute of Technology, Adelaide* 499

Charpy Impact Tests on Cold Formed RHS manufactured from Continuous Cast Fully Killed Steel

H. M. DAGG, K. DAVIS and J. W. HICKS, *Tubemakers of Australia* 508**KEYNOTE PAPER:**

Fire Engineering for Steel Buildings – Progress in Australia

I. R. THOMAS and I. D. BENNETTS, *BHP Melbourne Research Laboratories* 99**SESSION TEN, Strand One – Fire**

Experimental Study on Fire Resistance of Concrete-filled Square Tubular Steel Columns without Fireproof Coating

H. MATSUMURA and H. SAKUMA, *NKK Corporation, Japan* 521

Fire Resistant Design of Steel Beams – Recent Developments in the UK

J. T. ROBINSON, *British Steel* 532**SESSION TEN, Strand Two – Structural Systems I**

Active Control Systems for Slender Structures

B. SAMALI, *University of Technology, Sydney*
and G. FORREST-BROWN, *Maunsell & Partners, Sydney* 544

Structural Tests on the Top Chord of Strarch (Stressed Arch) Frames

G. J. HANCOCK and M. CLARKE, *University of Sydney*
P. KEY and C. OLSEN, *Strarch International* 557

Vibration in Steel Structures

I. D. MILLER, *I. D. Miller & Associates, Brisbane* 571**SESSION ELEVEN, Strand One – Case Studies II**

Case Study – 101 Collins Street Development, Melbourne

D. P. HAWORTH and E. L. SMIT, *Ove Arup & Partners, Melbourne* 589

Steel Core Construction in Three Tall Buildings

J. J. PEYTON, B. K. DEAN and O. MARTIN, *John Connell & Associates, Melbourne* 599

The Toronto SkyDome Retractable Roof Stadium

C. M. ALLEN and D. P. J. DUCHESNE, *Adjeleian Allen Rubeli, Toronto, Canada* 614

Space Frame Roof to City Plaza

B. J. BROWN, *Murray-North, Auckland, NZ* 624**SESSION ELEVEN, Strand Two – Structural Systems II**

Tubelok – Adjustable Space Frame

G. HART, *Tubelok, Jindalee, Qld* 639

Design of Tension Chord Joints in Triangular Trusses

D. BAUER, *Royal Military College of Canada, Kingston*
and R. G. REDWOOD, *McGill University, Montreal* 674

Economical Design and Fabrication of Hollow Section Trusses

N. MURRAY, *Palmer Tube Mills, Brisbane* 689

Recent Developments in the Design and Construction of Offshore Production Platforms

C. J. BILLINGTON, *The Steel Construction Institute, UK* 699

End of Day 3

Tear-out sheets for participation in discussion can be found at the end of this volume
