DEVELOPMENT 1993 SUPPLEMENT

SIGNALS, POLARITY AND ADHESION IN DEVELOPMENT

EDITED BY

PHILIP INGHAM, ANTHONY BROWN
and ALFONSO MARTINEZ ARIAS

Papers presented at a meeting of the
British Society for Developmental Biology
at the University of East Anglia
April 1993

THE COMPANY OF BIOLOGISTS LIMITED
CAMBRIDGE

Contents

1993 Supplement

Preface

- Williams, J., Hopper, N., Early, A., Traynor, D., Harwood, A., Abe, T., Simon, M. N. and Véron, M.**
Interacting signalling pathways regulating prestalk cell differentiation and movement during the morphogenesis of *Dictyostelium* 1-7
- Hill, R. J. and Sternberg, P. W.**
Cell fate patterning during *C. elegans* vulval development 9-18
- Cagan, R.**
Cell fate specification in the developing *Drosophila* retina 19-28
- Simpson, P., Ruel, L., Heitzler, P. and Bourouis, M.**
A dual role for the protein kinase *shaggy* in the repression of *achaete-scute* 29-39
- Hafen, E., Dickson, B., Raabe, T., Brunner, D., Oellers, N. and van der Straten, A.**
Genetic analysis of the sevenless signal transduction pathway of *Drosophila* 41-46
- Lu, X., Perkins, L. A. and Perrimon, N.**
The torso pathway in *Drosophila*: a model system to study receptor tyrosine kinase signal transduction 47-56
- Courtneidge, S. A., Fumagalli, S., Koegl, M., Superti-Furga, G. and Twamley-Stein, G. M.**
The Src family of protein tyrosine kinases: regulation and functions 57-64
- Baumann, P. and Skaer, H.**
The *Drosophila* EGF receptor homologue (DER) is required for Malpighian tubule development 65-76
- Pruitt, R. E., Hülkamp, M., Kopczak, S. D., Ploense, S. E. and Schneitz, K.**
Molecular genetics of cell interactions in *Arabidopsis* 77-84
- Moon, R. T., Christian, J. L., Campbell, R. M., McGrew, L. L., DeMarais, A. A., Torres, M., Lai, C.-J., Olson, D. J. and Kelly, G. M.**
Dissecting *Wnt* signalling pathways and *Wnt*-sensitive developmental processes through transient misexpression analyses in embryos of *Xenopus laevis* 85-94
- Ramakrishna, N. R. and Brown, A. M. C.**
Wingless, the *Drosophila* homolog of the proto-oncogene *Wnt-1* can transform mouse mammary epithelial cells 95-103
- van den Heuvel, M., Klingensmith, J., Perrimon, N. and Nusse, R.**
Cell patterning in the *Drosophila* segment: *engrailed* and *wingless* antigen distributions in segment polarity mutant embryos 105-114
- Forbes, A. J., Nakano, Y., Taylor, A. M. and Ingham, P. W.**
Genetic analysis of *hedgehog* signalling in the *Drosophila* embryo 115-124
- Besmer, P., Manova, K., Duttlinger, R., Huang, E. J., Packer, A., Gyssler, C. and Bachvarova, R. F.**
The *kit*-ligand (steel factor) and its receptor *c-kit/W*: pleiotropic roles in gametogenesis and melanogenesis 125-137
- Tata, F. and Hartley, D. A.**
The role of the *Enhancer of split* complex during cell fate determination in *Drosophila* 139-148
- Bate, M., Rushton, E. and Frasch, M.**
A dual requirement for neurogenic genes in *Drosophila* myogenesis 149-161
- Peifer, M., Orsulic, S., Pai, L.-M. and Loureiro, J.**
A model system for cell adhesion and signal transduction in *Drosophila* 163-176
- Brown, N. H., Bloor, J. W., Dunin-Borkowski, O. and Martín-Bermudo, M. D.**
Integrins and morphogenesis 177-183
- Watt, F. M. and Jones, P. H.**
Expression and function of the keratinocyte integrins 185-192
- Simmons, D. L.**
Dissecting the modes of interactions amongst cell adhesion molecules 193-203
- Bernfield, M., Hinkes, M. T. and Gallo, R. L.**
Developmental expression of the syndecans: possible function and regulation 205-212
- Howard, K., Jaglarz, M., Zhang, N., Shah, J. and Warrior, R.**
Migration of *Drosophila* germ cells: analysis using enhancer trap lines 213-218
- Kiernan, B. W. and French-Constant, C.**
Oligodendrocyte precursor (O-2A progenitor cell) migration; a model system for the study of cell migration in the developing central nervous system 219-225
- Broadie, K., Sink, H., Van Vactor, D., Fambrough, D., Whittington, P. M., Bate, M. and Goodman, C. S.**
From growth cone to synapse: the life history of the RP3 motor neuron 227-238
- Bryant, P. J., Watson, K. L., Justice, R. W. and Woods, D. F.**
Tumor suppressor genes encoding proteins required for cell interactions and signal transduction in *Drosophila* 239-249
- Ring, J. M. and Martinez Arias, A.**
puckered, a gene involved in position-specific cell differentiation in the dorsal epidermis of the *Drosophila* larva 251-259
- Knust, E., Tepass, U. and Wodarz, A.**
crumbs and *stardust*, two genes of *Drosophila* required for the development of epithelial cell polarity 261-268
- Gubb, D.**
Genes controlling cellular polarity in *Drosophila* 269-277
- Goldstein, B., Hird, S. N. and White, J. G.**
Cell polarity in early *C. elegans* development 279-287
- Snell, V. and Nurse, P.**
Investigations into the control of cell form and polarity: the use of morphological mutants in fission yeast 289-299
- Index of Authors** 301-302
- Subject index** 303-306
