

Carbon Abatement Costs and Climate Change Finance

William R. Cline

PETERSON INSTITUTE FOR INTERNATIONAL ECONOMICS
Washington, DC

July 2011

Contents

Preface	ix
Acknowledgments	xiii
1 Overview	1
Policy Context	1
Method and Plan of the Study	2
Principal Findings	3
2 Baseline Emissions under Business as Usual	7
Framework	7
Decomposing Emissions Trends, 1990–2006	9
Baseline through 2030	12
Extending the Baseline through 2050	16
3 Abatement Initiatives in the Copenhagen Accord and Cancún Agreements	19
Copenhagen Accord Pledges	20
Cancún Agreements	23
4 Abatement Cost Functions	25
Top-Down and Bottom-Up Models	25
RICE Model	26
EMF 22 Models	27
McKinsey Model	30

5	Abatement Costs through 2050	33
	Copenhagen Convergence	34
	Abatement Costs under the Copenhagen Convergence Scenario	39
	Other Model-Based Estimates	48
	Alternative Abatement Paths	50
6	Trade and Timing	57
	Shadow Price of Carbon Dioxide	58
7	Estimating Investment Requirements and Adaptation Costs	71
	International Energy Agency	72
	World Bank	74
	Investment Levels Implied by Abatement Cost Estimates	75
	Adaptation	79
8	Synthesis	81
	The \$100 Billion Copenhagen Commitment	81
	Estimates of This Study	83

Appendices

Appendix A	Data Sources and Further Statistical Tables	91
Appendix B	Estimating Atmospheric CO ₂ Concentrations under Alternative Emissions Paths	99
Appendix C	Other Greenhouse Gases and Aerosols	103
Appendix D	Alternative Policy Paths for CO ₂ Emissions, 2010–50	107
Appendix E	Abatement Costs of the Alternative Policy Paths	113
Appendix F	Cost-Minimizing Reallocation of Abatement over Time	117
Appendix G	Abatement Cost Function Estimates Based on EMF 22	121
