Contents

Part I Introduction

1	Man	agement in the Age of Risk	3
2	Stoc	hastic Management Approach	11
	2.1	3M&I and Stochastic Approach	11
	2.2		10

Part II Stochastic Management Model

3	Management Cycle Model		
	3.1	Process Cycle Model	29
	3.2	Limit-Cycle Model	37
4	Man	agement with Sales Risk	49
	4 1	Manazamant Cama/Stratagia View	10
	4.1		49
	4.2	Service Versus Manufacturing Model	-63

Part III Stream Risk Processes

5	Continuous Risk Stream			
	5.1	Line Design Without Stoppers	75	
	5.2	Line Design with Stoppers	87	
6	Poin	t-Wise Risk Processes	95	
6	Poin 6.1	t-Wise Risk Processes Periodic Type Strategy	95 95	

~

Part IV Flexible Risk Processes

Flexible Cell System		
7.1	Flexible Assembly System (FAS) 121	
7.2	FAS with Generalized CSPSs 129	
Job/ 8-1	Customers Routing	
8.1 8.2	FMS/EAS and Optimal Routing	
	Flex 7.1 7.2 Job/ 8.1 8.2	

Part V Ellipse Management with Risks

9	Assembly Enterprise	
	9.1	Efficient Assembly and Reconfiguration
	9.2	Mixed Line Design with Look-Ahead
10	Non	Assembly Type
	10.1	Job-Shop Enterprise and Ellipse Strategy

Part VI Demand and Supply Risk Chain

11	2MGM Chains and Balancing		
	11.1	Serial SCM and Balancing	
	11.2	Make-or-Buy and Retail SCMs	
12	Man	ufacturing SCM	
	12.1	Push Versus Pull System	
	12.2	Toyota Versus Dell Strategy	
Part	VII	Emerging Challenge	
13	Pair-	Strategic Map Issues	
14	Sum	mary and Remarks
