Contents

Abbreviations

Executive Summary	1
1 Introduction	11
1.1 Renewable energy from the MENA region	11
1.2 Building domestic technological capabilities in renewable energy in Egypt	14
1.3 Laying out the argument	20
2 Renewable energy in Egypt's energy system	23
3 Domestic technological capabilities in renewable energy	27
3.1 Production and project execution capabilities	30
3.1.1 The wind power sector	33
3.1.1.1 Local capabilities for production and project execution	36
3.1.1.2 Job profiles for the emerging local market	49
3.1.2 Concentrated solar thermal power (CSP) sector	57
3.1.2.1 Local capabilities for production and project execution	60
3.1.2.2 Job profiles for the emerging local market	68
3.2 Innovation capabilities	70
3.2.1 Renewable energy education and research	74
3.2.2 The internationalization of innovation activities and organizational decomposition of innovation activities: opportunities for Egypt?	83

3.2.3	Key challenges for acquiring innovation capabilities and potential solutions	88
4	Political economy perspectives on the expansion of technological capabilities	93
4.1	The social contract and the need to change it	95
4.2	The irrationality of the energy subsidies regime and opportunities for reform	98
4.2.1.	High, overburdening and politically important	99
4.2.2.	Political obstacles to reform in Egypt	102
4.2.3.	Difficult but not impossible to reform	104
4.3	Constrained decision-making with respect to renewable energy	109
4.3.1.	The Ministry of Electricity and Energy (MoEE)	110
4.3.2.	The New and Renewable Energy Authority (NREA)	112
4.4	Alliances for renewable energy?	114
4.4.1	The East Asian experience: change is possible – but it requires a strong state	115
4.4.2	The Egyptian state is strong but not developmental	115
4.4.3	Challenges to building development alliances for renewable energy	119
5	Policy recommendations	123
5.1	Guidelines for Egyptian policy-makers	124
5.1.1	Disseminating a new narrative	124
5.1.2	Targeted recommendations	125
5.1.2.1	Developing a roadmap for renewable energy and the necessary technologies	126

5.1.2.2	Reforming fossil-fuels subsidy regimes	127
5.1.2.3	Unbundling the NREA services	127
5.1.2.4	Developing the supply chain	128
5.1.2.5	Expanding renewable energy education and training	130
5.1.2.6	Expanding renewable energy R&D	131
5.2	German partnership in energy transition	132

Bibliography	139
---------------------	------------

Annexes

Annex 1	List of interviews in Egypt	153
Annex 2	Electric energy prices in Egypt	158
Annex 3	Approximate amount of Egypt's energy subsidies in FY 2009/2010	162
