

Julia Bendul

Integration of Combined Transport into Supply Chain Concepts

Simulation-based Potential Analysis
and Practical Guidance

Springer Gabler

Table of Contents

Table of Contents	IX
List of Figures	XIII
List of Tables	XVI
List of Abbreviations	XIX

1	Integration of Combined Transport into Supply Chain Concepts from a Performance Perspective: Need for Action	1
1.1	<i>Problem Formulation and Research Questions</i>	1
1.2	<i>Scientific-Theoretical Positioning and Research Design</i>	5
1.3	<i>Research Process and Thesis Outline</i>	9
2	Problem Concretisation - SCP Orientation Encourages the Integration of CT into SC Concepts	13
2.1	<i>Needs, Challenges and Instruments for SC Integration</i>	13
2.1.1	Need for SC Integration	14
2.1.2	Central Elements and the Fields of SC Integration	18
2.1.3	Normative, Operative and Strategic Challenges of SC Integration	19
2.1.3.1	Overview on SC Integration Challenges	19
2.1.3.2	Challenge 1: Main Objectives of Integrated SCs – Problems of SCM Conception	20
2.1.3.3	Challenge 2: Differing Operative Objectives and Problems of Shippers and CT Actors	25
2.1.3.4	Challenge 3: Focus on Individual Company Value Growth	29
2.1.4	Vulnerability of Integrated SC Concepts	30
2.1.5	Measures and Instruments for SC Integration	33
2.2	<i>Coping with CT Complexity in SCs</i>	40
2.2.1	Application Fields of CT	40
2.2.2	Service Complexity of Combined Transport Concepts	45
2.2.2.1	Inherent Challenges of Combined Transport	45
2.2.2.2	Diversity of CT Services	46
2.2.2.3	Diversity of CT Actors	48
2.2.2.4	Processes and Structure of CT Services	52
2.2.2.5	Service Character of CT Services	54
2.2.3	External Factors Increasing the Complexity of CT	55
2.2.3.1	Changing Shippers' Performance Requirements Challenging CT Services	55
2.2.3.2	Impact of Transport Policy on CT	57
2.2.3.3	Competitive Situation of CT and Unimodal Road Transport	64
2.2.4	Integrated Management of CT Concepts	66
2.3	<i>SCP Orientation – Consideration of Strategic and Operational Key Figures</i>	71
2.3.1	Fundamentals of Performance Orientation	72
2.3.2	Performance Understanding in a SC Context	75
2.3.3	Suitability of SCP as a Target System for the Integration of CT into SC Concepts	79
2.3.4	Development of a Target System for the Evaluation of CT Integration into SC Concepts	85
2.4	<i>Configuration Theory as Theoretical Research Approach for Integrating CT into SC Concepts</i>	87
2.4.1	Meaning of Theory Application for Application-Oriented Research	87
2.4.2	Theoretical Solution Approaches towards SC Integration	88
2.4.3	Selection of Theoretical Approaches with regard to the Research Problem and Perspective	91

2.4.4	Configuration Theory as an Explanation Approach for the Performance-oriented CT Integration into SC Concepts	92
2.4.4.1	Basics of Situative Theory	93
2.4.4.2	Configuration Theory as an Advancement of Situative Theory	94
2.4.4.3	Application of Configuration Theory to the Problem of the Performance-oriented Integration of CT into SC Concepts	97
2.5	<i>Intermediate Findings</i>	98
3	CT as an Element of SC Concepts	100
3.1	<i>SC Concepts as the Operationalisation of SC Strategies</i>	100
3.1.1	SC Strategies as the Basis for SC Concept Configuration	101
3.1.2	Classification Approaches for SC Strategies	104
3.1.3	Impact of SC Strategy on the Configuration of SC Sub-Concepts	108
3.1.4	Elements and Structures of SC Concepts	108
3.1.4.1	SC Concept Configuration in a Lean SC	111
3.1.4.2	SC Concept Configuration in an Agile SC	113
3.1.4.3	SC Concept Configuration in a Leagile SC	115
3.2	<i>Development of a Classification of SCP Requirements regarding Transport Concepts</i>	117
3.3	<i>Configuration of SC Concepts</i>	124
3.3.1	Transport Concepts as Linking and Embedded Elements of SC Concepts	124
3.3.2	Impact of Procurement Concepts on the Configuration of Transport Concepts	129
3.3.2.1	Meaning of the Procurement Concepts for SCP	129
3.3.2.2	Structures and Processes of Procurement Concepts	131
3.3.2.3	Classification and Configuration of Procurement Concepts – Identification of Design Variables relevant for CT Integration	133
3.3.3	Impact of Production Concept Configuration on Transport Concepts	138
3.3.3.1	Meaning of the Production Concept for SCP	139
3.3.3.2	Structures and Processes of Production Concepts	139
3.3.3.3	Classification and Configuration of Production Concepts – Identification of Design Variables relevant for CT Integration	140
3.3.4	Impact of Distribution Concepts on the Configuration of Transport Concepts	145
3.3.4.1	Meaning of the Distribution Concept for SCP	145
3.3.4.2	Structures and Processes of Distribution Concepts	147
3.3.4.3	Classification and Configuration of Distribution Concepts – Identification of Design Variables relevant for CT Integration	150
3.4	<i>Development of a CT Concept Typology - Classification using SCP Profiles</i>	153
3.5	<i>Intermediate Findings</i>	158
4	Conceptual Research Framework of Performance-oriented CT Integration into SC Concepts	160
4.1	<i>Central Aspects of the Development of Research Propositions on the Performance- oriented CT Integration</i>	160
4.2	<i>Development of a Conceptual Research Framework and Deduction of Propositions on the Performance-oriented CT Integration into SC Concepts</i>	162
4.2.1	Identification of Central Constructs and Framework Conditions	162
4.2.2	Middle Range Constructs — Elements and Dimensions of Central Constructs	164
4.2.3	Manifest, Observable Variables	166
4.2.4	Moderating Variables of CT Integration into SC Concepts	168
4.3	<i>Cause-and-Effect Relationships between the Elements of CT and SC Concepts - Deduction of Methodological and Instrumental Implications</i>	170
4.3.1	Step 1: Identification of Integration Points for CT into SC Concepts	170

4.3.2	Step 2: Impact of SC Strategy, SC Concept Configuration and SCP Requirements Profiles on CT Integration	172
4.3.3	Step 3: Identification of Adaptation Points for CT Concept Integration	175
4.3.4	Step 4: Situation-specific Choice of Integrative Measures and Instruments for Performance-oriented CT Integration into SC Concepts	179
4.4	<i>Intermediate Findings</i>	188
5	Performance-oriented Integration of Combined Line Transport into a Lean SC - A Simulation Study	190
5.1	<i>Research Design for the Simulation Study</i>	191
5.1.1	Scientific-theoretical Positioning of the Simulation Methodology	191
5.1.2	Advantages, Restrictions and Application Fields of Simulation Methodology	192
5.1.3	Quality Criteria for Simulation Studies	195
5.1.4	Structure and Classification of Simulation Models	197
5.1.5	Application Fields of the Simulation Methodology in Transport and SCM Science	198
5.1.6	Discrete Event Simulation as the Research Methodology for the Analysis of Performance-oriented Integration of CT into SC Concepts	201
5.2	<i>Process Model for the Simulation Model Development</i>	203
5.3	<i>Step 1: Problem Formulation and Target Definition</i>	205
5.3.1	Scope and Target Definition	205
5.3.2	Problem Formulation - Understanding the Initial SC Concept	206
5.3.3	CT Integration Scenarios	208
5.3.4	Performance Indicators for the Evaluation of Simulation Scenarios	211
5.3.5	Development of Statements on Expected Simulation Results	213
5.4	<i>Step 2: Data Gathering and Editing for Model Configuration and Validation</i>	216
5.5	<i>Step 3: Development, Validation and Verification of the Simulation Model</i>	225
5.5.1	Conceptual Model	226
5.5.2	Simulation Model	231
5.5.3	Validation and Verification	235
5.6	<i>Step 4: Experimental Plan and Setup of Experiments</i>	237
5.7	<i>Step 5: Description and Analysis of Simulation Results</i>	239
5.7.1	Basic Scenario – Modelling the ‘as-is’ Situation	239
5.7.2	CT Scenario I - Integration without Adaptation to the SC Concept	249
5.7.3	CT Scenario II – Production Concept Adaptation	260
5.7.4	CT Scenario III – Distribution Concept Adaptation	267
5.7.5	Discussion of Simulation Results	276
5.7.6	Limitations, Validity and Generalisability of Findings	284
5.8	<i>Intermediate Findings</i>	288
6	Implications for Science and Practice on the Performance-oriented Integration of CT into SC Concepts	290
6.1	<i>Management Implications</i>	290
6.2	<i>Scientific Implications</i>	294
6.3	<i>Limitations and Further Research</i>	295

Appendix A – Conducted Interviews	354
Appendix B – Simulation Model - Demand per Store and Weekday for Non-prioritized Goods	355
Appendix C – Activity Diagrams – Simulation Study	356
