## Wind Energy in Colombia

A Framework for Market Entry

Walter Vergara Alejandro Deeb Natsuko Toba Peter Cramton Irene Leino

## Contents

Preface	viii
Acknowledgments	ix
Acronyms and Abbreviations	x
Executive Summary	xiii
Objective	xiii
General Context	
Alternative Options for Colombia's Power Mix	xiv
Wind Energy Capital Costs Are Expected to Decrease	xiv
Wind and Hydro Energy Resources Are Complementary	
Options to-Address Barriers to Entry	xv
Impact of Policy Options	xvii
Lessons Learned	xviii
1. Introduction	1
Context	1
Structure of the Report	3
2. Summary of Findings from First Stage Report: Nonconventional Renewab Energy Barrier Analysis	
3. Cost Comparison of Alternative Power Sources Based on the Expansion Pl	
for 2008–2025	
Methodology for Technology Cost Comparison	
Least (Levelized) Cost Comparison	
4. Wind Power Costs Outlook	
Technical Viability of Wind Power	
Efficiency Gains over Time	
Capital Cost Evolution	
Operation and Maintenance Costs Are Decreasing	
Wind Power Grid Integration	
Outlook	
5. Wind and Hydro in Colombia: Complementarity Analysis	18
Complementarity of the Wind and Hydro Regimes	18
Firm Energy and Joint Operation of Wind and Hydroelectric Projects	
6. Options to Aid Market Entry of Wind Energy in the Country's Power Mix.	
Introduction	
Options to Facilitate Market Entry of Wind Energy	
Proposal to Address the Reliability Issue for Wind Energy	

7. Assessing the Effectiveness of Policy Instruments and Policy Options: Impac on a 300 MW Wind-Powered Power Plant Operating in the Wholesale	ct
Energy Market	36
Baseline Information	37
Baseline Results	39
Impact of Selected Policy Options	40
Key Findings: Options to Foster Investment in Wind Power	47
Conclusions of the Estimated Impact of Alternative Policy Options for a	
300 MW Wind Energy Power Plant in the MEM	48
3. Conclusions	50
Wind Energy Resources Could Become an Important Energy Option in Colombia	50
Policy Instruments	51
Policy-Options	51
Other Findings	
Applicability of the Analysis Conducted	52
References	
APPENDIXESAppendix 1. Technology Cost Comparison	
Appendix 1. Technology Cost Comparison	56 58
Appendix 1. Technology Cost Comparison	56 58 60
Appendix 1. Technology Cost Comparison  Appendix 2. Use of Earth Simulator to Estimate the Likelihood of Extreme  Weather Events  Appendix 3. Pool Prices under Various Scenarios  Appendix 4. Results of the Expected Returns on Investments with the  Individual Application of the Policy Instruments for Different Market  Scenarios	56 58 60
Appendix 1. Technology Cost Comparison  Appendix 2. Use of Earth Simulator to Estimate the Likelihood of Extreme  Weather Events  Appendix 3. Pool Prices under Various Scenarios  Appendix 4. Results of the Expected Returns on Investments with the  Individual Application of the Policy Instruments for Different Market	56 58 60
Appendix 1. Technology Cost Comparison  Appendix 2. Use of Earth Simulator to Estimate the Likelihood of Extreme  Weather Events  Appendix 3. Pool Prices under Various Scenarios  Appendix 4. Results of the Expected Returns on Investments with the  Individual Application of the Policy Instruments for Different Market  Scenarios  Appendix 5. Exempting CERE Payments by 50 or 100 Percent	56 60 62
Appendix 1. Technology Cost Comparison  Appendix 2. Use of Earth Simulator to Estimate the Likelihood of Extreme  Weather Events  Appendix 3. Pool Prices under Various Scenarios  Appendix 4. Results of the Expected Returns on Investments with the  Individual Application of the Policy Instruments for Different Market  Scenarios  Appendix 5. Exempting CERE Payments by 50 or 100 Percent  Appendix 6. Complementarity between Wind Power and Hydroelectric	56 60 62 65
Appendix 1. Technology Cost Comparison  Appendix 2. Use of Earth Simulator to Estimate the Likelihood of Extreme  Weather Events  Appendix 3. Pool Prices under Various Scenarios  Appendix 4. Results of the Expected Returns on Investments with the  Individual Application of the Policy Instruments for Different Market  Scenarios  Appendix 5. Exempting CERE Payments by 50 or 100 Percent  Appendix 6. Complementarity between Wind Power and Hydroelectric  Resources	56 58 60 62 67 68
Appendix 1. Technology Cost Comparison  Appendix 2. Use of Earth Simulator to Estimate the Likelihood of Extreme Weather Events  Appendix 3. Pool Prices under Various Scenarios  Appendix 4. Results of the Expected Returns on Investments with the Individual Application of the Policy Instruments for Different Market Scenarios  Appendix 5. Exempting CERE Payments by 50 or 100 Percent  Appendix 6. Complementarity between Wind Power and Hydroelectric Resources  Chapter 1: Introduction  Chapter 2: Methodology	56 58 60 62 65 68
