Methods of Future and Scenario Analysis

~

Contents

Summary	1
1 Introduction	5
2 Overview of scenario methods	8
2.1 Procedure and Sources	8
2.2 Basic principles	10
2.2.1 What is a scenario?	10
2.2.2 Basic assumptions: The understanding of the future which is implicit in scenario methods	13
2.2.3 To what end can scenarios be used?	18
2.2.4 When are scenarios inappropriate?	21
2.3 Methodological commonalities and differences	22
2.3.1 The range of the field of scenario methodology	22
2.3.2 General phases of the scenario process	24
2.3.3 The basic characteristics of scenarios	30
2.3.4 Scope	35
2.3.5 Criteria of quality and process criteria	38
2.4 Three ideal-typical scenario techniques	42
2.4.1 Scenarios on the basis of trend extrapolation	44
2.4.2 Systematic-formalized scenario techniques	50
2.4.3 Creative-narrative scenario techniques	61
2.4.4 Interim assessment: Scenario techniques in overview	75
2.4.5 Excursus: Techniques of scenario transfer	79
2.5 Method combinations	83
2.5.1 Scenarios and modelling methods and/or simulations	83
2.5.2 Scenarios and Delphi surveys	87
2.5.3 Scenarios and roadmapping	90

3	Dimensions of selection for the application of scenario methods in the development policy field	93
3.1	Basic questions on the application of scenario methods in DP	94
3.2	Defining the underlying conditions	96
3.3	Selection of a concrete scenario technique in DP	97
4	“Check-List” for the selection of suitable scenario methods for the DIE project “Development Policy: Questions for the Future”	110
	Bibliography	115
