Part I. Pricing of Carbon in Europe

1. Carbon-Energy Taxation, Revenue Recycling, and Competitiveness	3
<i>Mikael Skou Andersen</i>	
1.1. Introduction	3
1.2. The Porter hypothesis on the relationship between environmental regulation and competitiveness	5
1.3. The double dividend debate	7
1.4. What kind of efficiency are we talking about?	10
1.5. Conventional indicators of competitiveness	11
1.6. The need to account for technology and innovation	14
1.7. Coverage of the book	16
2. Design of Environmental Tax Reforms in Europe	24
<i>Stefan Speck and Jirina Jilkova</i>	
2.1. Introduction	24
2.2. Denmark	27
2.3. Finland	32
2.4. Germany	35
2.5. The Netherlands	39
2.6. Slovenia	41
2.7. Sweden	42
2.8. UK	46
2.9. Conclusions	48

Part II. Industry-Sector Competitiveness

3. Assessing Vulnerability of Selected Sectors under Environmental Tax Reform: The Issue of Pricing Power <i>John Fitz Gerald, Mary J. Keeney, and Susan Scott</i>	55
3.1. Introduction	55
3.2. Context	56
3.3. Literature review and price-setting model	59
3.4. Data	62
3.5. Results	63
3.6. Discussion of results by sector	63
3.7. Implications	70
3.8. Summary and conclusions	74
4. Trends in the Competitiveness of Selected Industrial Sectors in ETR Countries <i>Roger Salmons and Alexandra Miltner</i>	77
4.1. Introduction	77
4.2. Theoretical assessment of competitiveness indicators	79
4.3. Empirical assessment of competitiveness trends	89
4.4. Conclusions	96
5. The Impact of Energy Taxes on Competitiveness: A Panel Regression Study of 56 European Industry Sectors <i>Martin K. Enevoldsen, Anders Ryelund, and Mikael Skou Andersen</i>	100
5.1. Introduction	100
5.2. Modelling the Porter effects associated with energy taxes	102
5.3. Data and method	104
5.4. The relation between energy taxes, competitiveness, and output	108
5.5. Interpretation of results	113
5.6. Conclusions	117
6. Energy-Intensive Industries: Approaches to Mitigation and Compensation <i>Mikael Skou Andersen and Stefan Speck</i>	120
6.1. Introduction	120
6.2. Ex-ante mitigation: tax-base modifications and reductions in tax rates	121

6.3.	Ex-post compensation: revenue recycling approach	129
6.4.	Winners and losers in ETR	130
6.5.	Conclusions	140

Part III. Country Competitiveness and Carbon Leakage

7.	The Effects of Environmental Tax Reform on International Competitiveness in the European Union: Modelling with E3ME <i>Terry Barker, Sudhir Junankar, Hector Pollitt, and Philip Summerton</i>	147
7.1.	Introduction	147
7.2.	Modelling the EU Energy-Environment-Economy System with E3ME	151
7.3.	Processing the COMETR tax data	167
7.4.	Scenarios specified to model ETR	177
7.5.	Estimation of competitiveness effects	179
7.6.	The effects of selected ETRs, using E3ME, 1995–2012	180
8.	Carbon Leakage from Unilateral Environmental Tax Reforms in Europe, 1995–2005 <i>Terry Barker, Sudhir Junankar, Hector Pollitt, and Philip Summerton</i>	215
8.1.	Introduction	215
8.2.	The literature on carbon leakage	216
8.3.	Modelling carbon leakage	222
8.4.	Description of ETR policies and carbon leakage scenarios	227
8.5.	Results	230
8.6.	Conclusions	236

Part IV. Implications for Future Climate Policy

9.	Carbon Taxes and Emissions Trading: Issues and Interactions <i>Paul Ekins</i>	241
9.1.	Introduction	241
9.2.	Emissions trading	242
9.3.	Competitiveness implications of emissions trading	243

Contents

9.4.	Carbon taxes and emissions trading	248
9.5.	The interactions between taxes and trading	249
9.6.	Carbon taxes and emissions trading in the EU	251
10.	Conclusions: Europe's Lessons from Carbon-Energy Taxation <i>Mikael Skou Andersen and Paul Ekins</i>	256
10.1.	Introduction	256
10.2.	Avoiding dangerous climate change	257
10.3.	Greenhouse gas reductions: the role of carbon-energy taxation and emissions trading	262
10.4.	The economic dimension of the competitiveness debate: market shares and unit energy costs	265
10.5.	The environmental dimension of the competitiveness debate: carbon leakage	272
10.6.	Coping with the dual challenge of GHG stabilization and international competitiveness	274
	<i>Annex</i>	282
	<i>Index</i>	304
