Contents

Abbreviations

Introduction	1
1 Climate change presupposes change in agricultural water governance	2
2 What drives institutional adaptation	3
3 The countries selected	5
4 National strategies of adaptation to climate change	6
4.1 Drivers of the elaboration of national adaptation strategies	6
4.2 Germany's National Adaptation Strategy	8
4.3 Spain's National Adaptation Strategy	9
4.4 National Adaptation Strategy in the United States of America	10
5 Brandenburg, Germany	11
5.1 Hydrological trends and agricultural production in Brandenburg	11
5.2 Organisational structure of Brandenburg's agricultural water administration	12
5.3 Initiatives in Brandenburg	13
5.3.1 Local drainage advisory boards	13
5.3.2 Working Group on the "Landscape Water Regime"	14
5.3.3 Empowerment of the water and soil associations	14
6 The Ebro River Basin, Spain	16
6.1 Hydrological trends and agricultural production in the Ebro River Basin	16
6.2 Organisational structure of the Spanish agricultural water administration	16
6.3 Institutional initiatives in Spanish water governance (Ebro River Basin)	18
6.3.1 The national ALBERCA Programme for registering water rights	18
6.3.2 The Drought Plan of the Ebro River Basin Organisation	20
6.3.3 The Catalanian Convention on Climate Change	22
7 California, United States of America	24
7.1 Hydrological trends and agricultural production in California	24
7.2 Organisational structure of California's agricultural water administration	25
7.3 Institutional initiatives in California's water governance	26
7.3.1 The Climate Action Team	27
7.3.2 The Upper Kings Water Forum and the Upper Kings IWRM Plan	28
7.3.3 New funding schemes include adaptation criteria	31
8 Conclusion	32
8.1 At a glance: institutional adaptation to climate change	33
8.2 Drivers of the adaptation of agricultural water governance	34
8.3 The way forward	37
