INTRODUCTION TO DYNAMIC MACROECONOMIC THEORY

An Overlapping Generations Approach

George T. McCandless Jr.

with Neil Wallace

Harvard University Press
Cambridge, Massachusetts, and London, England

Contents

Preface xi

PART ONE
REAL ECONOMIES 1

1 Describing the Environment 5
Time 6
The Population 7
Total Resources 8
Feasible Consumption Allocations 9
Efficient Consumption Allocations 12
Preferences 16
Pareto Optimality 20
Reprise 30

2 Competitive Equilibrium 32
Private Ownership 33
Competitive Intragenerational Trade 34
Consumption Decisions 38
An Example 41
Savings Function 42
Competitive Equilibrium 45
An Example of a Competitive Equilibrium 50
Reprise 53

3 Introducing a Government 55
Taxes 56
Government Borrowing 64
Ricardian Equivalence 71
Rolling Over Government Debt 73
Equivalence between Equilibria with Bonds and Tax-Transfer Schemes 80
Reprise 83
Appendix: Proof of Ricardian Equivalence 84

4 Bequests 90
Generation 0 Cares about Generation 1 92
Diversity within Generations 102
All Generations Care about Their Children 112
Reprise 117

5 Long-Term Government Bonds 119
k-*Period Bonds 119*
Temporary Equilibrium 126
Perfect Foresight 131
Term Structure of Interest Rates 138
Reprise 142

6 Infinitely Lived Assets 144
Temporary Equilibrium with Land 146
An Example 155
A Price Function 157
Perfect Foresight Competitive Equilibria 160
Three Example Economies 163
The Price of Land and the Crop 170
International Capital Movements 173
Reprise 180

7 Equilibrium Fluctuations 182
Real Cycles 184
Multiple Nonstationary Equilibria 191
Equilibria with the Crop > 0 *200*
Reprise 207

8 A Storage Technology 209
Feasible Allocations 209
Competitive Equilibrium 211

Finding a Competitive Equilibrium 215
Reprise 224

9 The Neoclassical Growth Model 225
The Physical Environment and the Feasible Allocations 226
Equilibrium Outputs, Inputs, and Factor Rentals at Each Date 230
The Individual Choice Decision under Perfect Foresight 232
A Definition of Equilibrium 236
Equilibrium Paths when n = *1 and* g = *0 243*
Equilibrium Paths when n > *1 and* g = *0 245*
Equilibrium Paths when n = *1 and* g > *0 248*
Differential Savings Rates 252
Reprise 255

PART TWO
MONETARY ECONOMIES 257

10 Money and Inflation 259
Equilibria with Fixed Money Supply 261
Fiat Money and Other Assets 265
Inflation 267
Money Creation and Inflation 268
Seignorage 277
Nonoptimality of Seignorage 286
Reprise 291

11 Multiple Currencies and Exchange Rates 292
Indeterminacy with Laissez-Faire Floating Rates 295
Seignorage in a Multiple Money World 299
Portfolio Autarky Regimes 308
Reprise 311

12 Legal Restrictions and Monetary Policy 312
Consumption Choice under Credit Controls 314

Equilibrium Conditions under Credit Controls 318
Credit Controls in an Example Economy 321
Monetary Policy 325
The Government 327
Individual Choice with Reserve Requirements 328
Equilibrium with Reserve Requirements and No Government Bonds 333
An Example of a Binding Stationary Equilibrium 336
A Two-Group Example of a Binding Equilibrium 339
Large Denomination Bonds 346
Stationary Equilibrium with Large Denomination Bonds 351
Reprise 362
