WORLD BANK STUDY

Unleashing the Potential of Renewable Energy in India

Gevorg Sargsyan

Mikul Bhatia

Sudeshna Ghosh Banerjee

Krishnan Raghunathan

Ruchi Soni

THE WORLD BANK
Washington, D.C.

Contents

Acknowledgments	v
Acronyms and Abbreviations	vii
Executive Summary	ix
1. Why: Role of Renewable Energy in India	1
Contribution to India's Energy Future	1
Strong Momentum behind Development of Renewable Energy	4
India's Ambitious Targets for Renewable Energy Development	7
2. How Much: Economic and Financial Potential of Renewable Energy	11
Economic Viability of Renewable Energy Generation	12
Viability of Renewable Energy Generation from the Perspective of the Utility and Developer	18
3. What: Establishment of an Enabling Environment for Renewable Energy Development	22
The Current Operating Environment	22
The Proposed Operating Environment	26
The Failure of Current Processes	29
What Can Be Done?	31
Challenges and Opportunities	38
Boxes	
Box 2.1. Creating a renewable energy project database	11
Box 2.2. Coal and gas shortages in India	13
Box 2.3. Definition of economic cost and benefit	15
Box 2.4. Definition of financial cost and benefit	18
Box 3.1. Stages of introduction and use of policy instruments	32
Box 3.2. Attractiveness of renewable energy projects for developers	34
Figures	
Figure 1. Additions to renewable energy capacity, 1993/94–2009/10	ix
Figure 2. Economic competitiveness of wind, biomass, and small hydropower	xii
Figure 1.1. Annual average and peak power deficits, 2005/06–2008/09	1
Figure 1.2. Potential and installed renewable energy capacity, by type	3
Figure 1.3. Actual (2007–08) and projected (2031–32) installed grid capacity, by type of energy	3
Figure 1.4. Additions to renewable energy capacity, 1993/94–2009/10	5
Figure 1.5. Potential capacity, installed capacity, and cost of generation of renewable energy sources, by state as of fiscal year 2009–2010	8
