<b>Foreword</b>	<b>xiii</b>
<b>Preface</b>	<b>xv</b>
<b>About the Authors</b>	<b>xvii</b>
<b>Abbreviations</b>	<b>xix</b>
<b>Part 1    Methods and Practices</b>	<b>1</b>
<b>1. Introduction</b>	<b>3</b>
References	6
<b>2. Basic Issues of Evaluation</b>	<b>7</b>
Summary	7
Learning Objectives	7
Introduction: Monitoring versus Evaluation	8
Monitoring	8
Setting Up Indicators within an M&E Framework	9
Operational Evaluation	16
Quantitative versus Qualitative Impact Assessments	18
Quantitative Impact Assessment: Ex Post versus Ex Ante Impact Evaluations	20
The Problem of the Counterfactual	22
Basic Theory of Impact Evaluation: The Problem of Selection Bias	25
Different Evaluation Approaches to Ex Post Impact Evaluation	27
Overview: Designing and Implementing Impact Evaluations	28
Questions	29
References	30
<b>3. Randomization</b>	<b>33</b>
Summary	33
Learning Objectives	33

Setting the Counterfactual .....	34
Statistical Design of Randomization .....	34
Calculating Treatment Effects .....	35
Randomization in Evaluation Design: Different Methods of Randomization.....	38
Concerns with Randomization .....	38
Randomized Impact Evaluation in Practice .....	39
Difficulties with Randomization.....	47
Questions .....	49
Notes.....	51
References.....	51
<b>4. Propensity Score Matching.....</b>	<b>53</b>
Summary .....	53
Learning Objectives .....	53
PSM and Its Practical Uses .....	54
What Does PSM Do? .....	54
PSM Method in Theory.....	55
Application of the PSM Method.....	58
Critiquing the PSM Method .....	63
PSM and Regression-Based Methods .....	64
Questions .....	66
Notes.....	67
References.....	68
<b>5. Double Difference.....</b>	<b>71</b>
Summary .....	71
Learning Objectives .....	71
Addressing Selection Bias from a Different Perspective: Using Differences as Counterfactual.....	71
DD Method: Theory and Application .....	72
Advantages and Disadvantages of Using DD .....	76
Alternative DD Models.....	78
Questions .....	82
Notes.....	84
References.....	84

<b>6. Instrumental Variable Estimation .....</b>	<b>87</b>
Summary.....	87
Learning Objectives .....	87
Introduction.....	87
Two-Stage Least Squares Approach to IVs .....	89
Concerns with IVs .....	91
Sources of IVs .....	95
Questions .....	99
Notes.....	100
References.....	100
<b>7. Regression Discontinuity and Pipeline Methods.....</b>	<b>103</b>
Summary.....	103
Learning Objectives .....	103
Introduction.....	104
Regression Discontinuity in Theory .....	104
Advantages and Disadvantages of the RD Approach.....	108
Pipeline Comparisons .....	110
Questions .....	111
References.....	112
<b>8. Measuring Distributional Program Effects.....</b>	<b>115</b>
Summary.....	115
Learning Objectives .....	115
The Need to Examine Distributional Impacts of Programs.....	115
Examining Heterogeneous Program Impacts:	
Linear Regression Framework.....	116
Quantile Regression Approaches .....	118
Discussion: Data Collection Issues .....	124
Notes.....	125
References.....	125
<b>9. Using Economic Models to Evaluate Policies .....</b>	<b>127</b>
Summary.....	127
Learning Objectives .....	127
Introduction.....	127

Structural versus Reduced-Form Approaches .....	128
Modeling the Effects of Policies .....	130
Assessing the Effects of Policies in a Macroeconomic Framework .....	131
Modeling Household Behavior in the Case of a Single Treatment: Case Studies on School Subsidy Programs .....	133
Conclusions.....	135
Note .....	136
References.....	137
<b>10. Conclusions .....</b>	<b>139</b>
 <b>Part 2     Stata Exercises .....</b>	 <b>143</b>
<b>11. Introduction to Stata .....</b>	<b>145</b>
Data Sets Used for Stata Exercises.....	145
Beginning Exercise: Introduction to Stata.....	146
Working with Data Files: Looking at the Content .....	151
Changing Data Sets.....	158
Combining Data Sets.....	162
Working with .log and .do Files .....	164
<b>12. Randomized Impact Evaluation.....</b>	<b>171</b>
Impacts of Program Placement in Villages.....	171
Impacts of Program Participation .....	173
Capturing Both Program Placement and Participation .....	175
Impacts of Program Participation in Program Villages.....	176
Measuring Spillover Effects of Microcredit Program Placement.....	177
Further Exercises.....	178
Notes.....	179
<b>13. Propensity Score Matching Technique .....</b>	<b>181</b>
Propensity Score Equation: Satisfying the Balancing Property.....	181
Average Treatment Effect Using Nearest-Neighbor Matching .....	185
Average Treatment Effect Using Stratification Matching .....	186
Average Treatment Effect Using Radius Matching.....	186
Average Treatment Effect Using Kernel Matching .....	187
Checking Robustness of Average Treatment Effect.....	187
Further Exercises.....	188
Reference .....	188

<b>14. Double-Difference Method .....</b>	<b>189</b>
Simplest Implementation: Simple Comparison Using “ttest” .....	189
Regression Implementation .....	190
Checking Robustness of DD with Fixed-Effects Regression .....	192
Applying the DD Method in Cross-Sectional Data .....	193
Taking into Account Initial Conditions.....	196
The DD Method Combined with Propensity Score Matching.....	198
Notes.....	201
Reference .....	201
<b>15. Instrumental Variable Method .....</b>	<b>203</b>
IV Implementation Using the “ivreg” Command.....	203
Testing for Endogeneity: OLS versus IV .....	205
IV Method for Binary Treatment: “treatreg” Command .....	206
IV with Fixed Effects: Cross-Sectional Estimates.....	207
IV with Fixed Effects: Panel Estimates.....	208
Note .....	209
<b>16. Regression Discontinuity Design .....</b>	<b>211</b>
Impact Estimation Using RD .....	211
Implementation of Sharp Discontinuity .....	212
Implementation of Fuzzy Discontinuity .....	214
Exercise .....	216
<b>Answers to Chapter Questions .....</b>	<b>217</b>
<b>Appendix: Programs and .do Files for Chapter 12–16 Exercises .....</b>	<b>219</b>
<b>Index .....</b>	<b>231</b>
