

Profitability with No Boundaries

Optimizing TOC, Lean, Six Sigma Results

**Focus
Reduce Waste
Contain Variability**

Reza (Russ) M. Pirasteh

Robert E. Fox

Contents

<i>Preface</i>	<i>xv</i>
Part I: Leadership Summary	1
Chapter 1: Productivity, Growth, and Prosperity	3
HENRY FORD	3
ALFRED SLOAN	5
TAIICHI OHNO	12
TLS—A FOURTH WAVE	17
Chapter 2: Productivity Improvement—A Checkered History	25
Chapter 3: What <i>Is</i> an Improvement?	31
HOW TO MEASURE AN IMPROVEMENT	31
WHY IMPROVEMENTS EFFORTS OFTEN FAIL	35
Chapter 4: Current CPI Favorites	39
THEORY OF CONSTRAINTS (TOC)	39
The Five Focusing Steps	39
Thinking Processes	41
Critical Chain Project Management	42
LEAN	42
SIX SIGMA	45
Six Sigma—A Metric	45
Six Sigma—A Methodology	46
Step 1—Define	46
Step 2—Measure	47
Step 3—Analyze	47
Step 4—Improve	48
Step 5—Control	48
Design For Six Sigma (DFSS)	49
Six Sigma—A Management System	49
Summary/Evaluation	50
Chapter 5: The TLS Model	53
WHAT IS iTLS™@?	53
How Does iTLS™@ Work?	53

WHAT IS UNIQUE ABOUT ITLS™®?	55
HOW SHOULD ITLS™® BE APPLIED? WHAT IS THE SEQUENCE OF EVENTS?	56
Chapter 6: Results: Has a More Global Focus Worked?	61
INITIAL CONDITIONS	61
WHICH METHODOLOGY WAS MOST EFFECTIVE?	62
Chapter 7: Throughput Operating Strategies (TOS)	67
A NETWORKS	67
V NETWORKS	69
T NETWORKS	70
I NETWORKS	71
SUMMARY	72
Chapter 8: Management Issues	75
FOCUSING IMPROVEMENT EFFORTS	76
MOTIVATING THE DESIRED BEHAVIORS AND BUILDING TRUST	77
THE MISSING LINK	78
Chapter 9: Closing	83
Part II: Practitioner's Guide	87
Chapter 1: Productivity Growth and Prosperity	89
FORD	89
SLOAN	91
Product Pricing	91
Investment Decisions	92
Make vs. Buy	94
OHNO	96
A FOURTH WAVE—iTLS	106
Chapter 2: The Productivity Improvement Dilemma	111
IMPROVEMENT CHALLENGES	118
Chapter 3: CPI Favorites: TOC, Lean, Six Sigma	123
THEORY OF CONSTRAINTS	123
LEAN	130
Principle 1: Specify the Value	130
Principle 2: Define the Value Stream	132
Principle 3: Make Value Flow without Any Interruptions	134
Principle 4: Make Customer Pull from Supplier	143
Kanban	144
Principle 5: Perfection	147
Principle 6: Agility	148
SIX SIGMA	150
Six Sigma—A Metric	151
Six Sigma—A Methodology	157
Step 1—Define	158
Step 2—Measure	159

Step 3—Analyze	159
Step 4—Improve	160
Step 5—Control	160
DESIGN FOR SIX SIGMA	161
Phase 1—Identify	162
Phase 2—Design	162
Phase 3—Optimize	163
Phase 4—Validate	165
SUMMARY	166
WHERE WE WENT WRONG	166
Case I: Direct Labor Reductions	169
Case II: Increase Throughput	169
Case III: Labor and Throughput Improvements	170
Chapter 4: What Is an Improvement?	185
HISTORY OF “IMPROVEMENTS”	185
HOW TO MEASURE AN IMPROVEMENT?	187
WHY DO IMPROVEMENT EFFORTS OFTEN FAIL?	191
Chapter 5: The iTLS Model and How It Works	195
WHAT IS THIS iTLS?	195
Step 1—Mobilize and Focus	203
Step 2—Decide How to Exploit the Constraint	208
Step 3—Eliminate Sources of Waste	211
Step 4—Control Process Variability	221
Step 5—Control Supporting Activities	227
Step 6—Remove the Constraint and Stabilize	230
Step 7—Reevaluate the System	236
Chapter 6: iTLS Study and Results Summary	257
HAS A MORE GLOBAL FOCUS WORKED?	257
Initial Conditions	258
Which Method Is More Effective?	259
Findings	262
Chapter 7: River System Optimization with TOS	267
A NETWORKS	268
V NETWORKS	273
T NETWORKS	279
I NETWORK	281
BETTER UNDERSTAND YOUR PROCESSES	284
Chapter 8: “MOST” TLS Project Management	285
LEADERSHIP RESPONSIBILITIES	285
Mobilize	286
Organize	287
Speed-up	288
Tie Loose Ends	289
Real-World Application	289
User Feedback	291

Chapter 9: Real-World Application of iTLS Approach	293
STUDY—INVENTORY MANAGEMENT	293
Abstract	293
iTLS-O Model	294
Examples of Real-Life Constraints	296
CASE STUDY ELECTRONIC MANUFACTURING COMPANY	296
Initial Condition	296
iTLS in Action and Findings	297
Step 1—Mobilize and Focus	297
Steps 2 and 3—Decide How to Exploit the Constraint and Eliminate Sources of Waste in the Constraint	302
Step 4—Control Process Variability and Error in the Constraint	303
Step 5—Control Supporting Activities to the Constraint	303
Step 6—Remove the Constraint and Stabilize	303
Step 7—Reevaluate System Performance and Go after the Next Constraint	305
Going Forward	305
Summary	306
CASE STUDY—VALVE ASSEMBLY	306
Initial Conditions	306
Background	306
Step 1—Mobilize and Focus	307
Step 2—Decide How to Exploit the Constraint	307
Step 3—Eliminate Sources of Waste	308
Step 4—Control Process Variability	308
Step 5—Control Supporting Activities to the Constraint	313
Step 6—Remove the Constraint and Stabilize the Process	313
Step 7—Reevaluate the System	314
CASE STUDY—CELSO CALIA OF BRAZIL	314
Introduction	314
Our Model	315
The Votorantim Cases	318
Initial Condition	318
Step by Step	319
Step 1—Mobilize and Focus	319
Step 2—Identify and Exploit the Constraint (Drum)	320
Step 3—Eliminate Sources of Waste	320
Step 4—Control Process Variability	322
Step 5—Control Supporting Activities to the Drum	322
Step 6—Control Supporting Activities	322
Step 7—Reevaluate the System and Go After the Next Drum	323
Summary	324
Chapter 10: Closing	327
References	329
Glossary	333
Index	347
About the Authors	353
