List	t of tabl	es			xiii						
Abl	oreviati	ons .			xv						
Syn	Symbols										
I	Introdu	1									
	I.1	Motivation and challenges									
	I.2	Objectives and focal research questions									
	I.3	Cla	Classification and organization								
	Refere	References									
Π	Strateg	Strategic framework									
	II.R1	A theory of software reuse strategies in ideal type stable and turbulent									
		mai	ket er	wironments	17						
		1	Intro	duction and objectives							
		2	Basic	software reuse options							
			2.1	Compositional reuse – building blocks							
			2.2	Generative reuse - solution patterns							
	3 T		Two	ideal type market environments and their business strategy	22						
			3.1	Traditional environments - defenders							
				3.1.1 Defensive internal improvement strategies	23						
				3.1.2 Defenders' dilemma	24						
			3.2	Turbulent environments - prospectors							
				3.2.1 Prospective rapid adaptation strategies							
				3.2.2 Prospectors' dilemma							
		4	Supp	orting experience: projects from practice							
			4.1	Stable environment – fraud detection							
			4.2	Turbulent environment – software simulator							
			4.3	Hybrid environment – portal architecture							
		5	Conc	eluding hypotheses, limitations and further steps							
		References									
	II.R2	Inte	Integration assessment of an individually developed application vs. software								
		packages from the market - an experience report									
		1	1 Introduction and setting								
		2	Proje	ect approach and selected results							
			2.1	Functional comparison of available packages							
			2.2	Integration scenario case studies	39						

		3	Con	clusion and remarks	43		
		References					
III	I Specification						
	III.R3	The importance of requirements specifications for successful IT projects					
		1 Requirements specifications in the development process					
		2	Suco	cess factors	48		
			2.1	Systematic approach	49		
			2.2	Detailed analysis and documentation	50		
			2.3	Realistic effort estimations	51		
			2.4	Integration of missing expertise	51		
			2.5	Coordination and alignment	52		
			2.6	Joint and active organization	52		
			2.7	Efficient change management	53		
		3	Risk	S	53		
			3.1	Disputed and incomplete scope of work	54		
			3.2	Delay	55		
			3.3	Additional costs	55		
			3.4	Legal dispute	56		
		4	Futu	re requirements	57		
		References					
	III.R4	A method to evaluate the suitability of requirements specifications for					
		offshore projects					
		1	Moti	ivation	60		
		2	Back	cground and related approaches	62		
			2.1	Outsourcing, offshoring, and application development based			
				on the division of labor	62		
			2.2	The importance of requirements specifications for offshoring	63		
			2.3	Evaluation approaches for requirements specifications	63		
		3	Con	ceptual basics	64		
			3.1	Specification quality	65		
			3.2	Compensation factors	66		
		4	Desi	ign of the evaluation method	68		
			4.1	Procedure for determining the specification quality	68		
			4.2	Procedure for determining the compensation options	69		
			4.3	Further refinement of the evaluation	70		
		5	Eva	luation	71		
			5.1	Determination of the specification quality	71		
			5.2	Determination of the compensation possibilities and options			
				for action	73		

. . . .

Contents

			5.3	Reception of the results	. 74		
		6	Conc	lusion	. 75		
		Ref	eferences				
IV	Selecti	on.			. 79		
	IV.R5	Öpi	timal stopping for the run-time self-adaptation of software systems				
		1	Introduction				
		2	Flexible software architectures and matching schemes for self-adaptation 8				
		3	Optimal stopping in two self-adaptation scenarios				
			3.1	Limited number of run-time options	. 85		
			3.2	Limited run-time delay	. 86		
		4	Appl	ication and simulation	. 87		
			4.1	Limited number of run-time options	. 87		
			4.2	Limited run-time delay	. 88		
		5	Sum	mary and conclusion	. 90		
		References					
	IV.R6	Reducing domain level scenarios to test component-based software					
		1	Introduction				
		2	Basic assumptions and business model				
		3	Constructing linear scenarios				
			3.1	ARIval overview	. 96		
			3.2	Process flow transformation and blocking	. 98		
			3.3	Example	102		
		4	Rela	ted work	106		
		5	Sum	mary and conclusions	108		
		References					
V	Conclusions and outlook 11						
	V.1 Conclusions						
	V.2	Outlook					
	Refere	References
