Energy Sector Management Assistance Program

Contents

Acronyms and Abbreviations	vii
Acknowledgments	xi
Executive Summary	xiii
1. A Long Road to Expanding Rural Access	1
What is the policy framework and institutional structure for rural energy?	3
What are the program areas of AEPC?	5
2. Objectives and Methodology of a Monitoring Framework Design for Renewable Energy	9
Why is monitoring important for AEPC?	10
How was the monitoring and evaluation (M&E) framework developed?	11
What are the attributes of the monitoring and evaluation framework?	11
3. Coverage and Attributes of Micro-Hydro for Households and Enterprises	15
What is the pattern of rural households' energy use?	15
What is the pattern of rural households' energy consumption?	19
How much do rural households spend on energy?	20
What is the volume of rural households' MH use?	22
What is the level of quality of service among MH households?	25
What are the factors determining MH connectivity?	27
What is the MH connectivity among rural enterprises?	28
How much is the MH and non-MH enterprise energy consumption?	29
How do MH enterprises cope with power outages?	32
4. Benefits of Electrification to Rural Households	35
How do the households benefit from MH connectivity?	35
Consumer surplus	36
Econometric estimates	39
Economic outcomes	40
Educational outcomes	41
Health outcomes	43
Women's fertility outcomes	45
Women's empowerment outcomes	46
MH and climate change	48
Net benefits from MH electrification	49

- 5. Implementation of the Management Information System (MIS)..... 51**
 - Why does AEPC need an enhanced MIS?..... 59
 - What are the objectives of the MIS? 59
 - What are the attributes of the MIS? 60
 - How will the reporting on indicators be presented? 67
 - What are the institutional roles and responsibilities for the MIS? 70
 - What are the risks and essential requirements?..... 73
- 6. Action Plan and Way Forward for AEPC..... 75**
 - What are the vision and mission of the AEPC? 75
 - What are the targets facing AEPC? 77
 - What are the actions AEPC can pursue to achieve its goals?..... 80
 - Action Item 1: Prioritize the development of renewable technologies..... 80
 - Action Item 2: Conduct preparatory work for AEPC for grid-connected renewable energy promotion 82
 - Action Item 3: Formulate an enabling policy for investment in renewable energy 83
 - Action Item 4: Focus on manpower planning and organizational structure..... 86
 - Action Item 5: Expand the sources of funds..... 90
 - Action Item 6: Have AEPC act as a concessional financier 93
- References..... 96**
- Annexes 98**
 - 1. Overview of existing M&E programs in AEPC 98
 - 2. Roles and responsibilities of AEPC programs 104
 - 3. Sample description for household and enterprise survey..... 110
 - 4. Propensity score matching technique..... 112
- Boxes**
 - Box 4.1: Indicators of women’s empowerment..... 46
 - Box 6.1: The core strategies of AEPC 80
- Figures**
 - Figure 1: Number of households benefiting from renewable technologies xiii
 - Figure 2: Development of key performance indicators..... xvii
 - Figure 3: Frequency of information flow xviii
 - Figure 4: Data flow structure..... xix
 - Figure 1.1: Energy sources for lighting 1
 - Figure 1.2: Timeline of policy initiatives..... 4
 - Figure 1.3: Institutional structure 4
 - Figure 1.4: NEA financial performance 5
