

Stefan Henschke

# **Towards a more accurate equity valuation**

An empirical analysis

With a Preface by Prof. Dr. Carsten Homburg

**RESEARCH**

# Table of Contents

List of Abbreviations .....	XV
List of Symbols .....	XVII
List of Figures .....	XXI
List of Tables .....	XXIII
1 Introduction .....	1
1.1 Motivation .....	1
1.2 Research objectives and outline of the thesis .....	3
2 Valuing equity .....	7
2.1 Overview on valuation methods .....	7
2.2 The intrinsic valuation methods .....	9
2.2.1 The dividend discount model .....	9
2.2.2 The discounted cash flow model .....	10
2.2.3 The residual income model .....	13
2.3 The multiple valuation method .....	15
2.4 Linear information models .....	18
2.4.1 Introduction and motivation .....	18
2.4.2 The Ohlson (1995) model .....	18
2.4.3 The Feltham/Ohlson (1995) model .....	20
2.4.4 The Choi/O’Hanlon/Pope (2006) model .....	24
2.5 Measuring valuation accuracy .....	27
3 The accuracy of equity valuation methods .....	33

3.1	Introduction and motivation .....	33
3.2	What affects valuation errors?.....	35
3.3	The valuation errors of intrinsic valuation methods .....	39
3.4	The valuation errors of the multiple valuation method .....	44
3.5	The valuation errors of linear information models .....	53
3.6	Comparing the valuation errors of different valuation methods .....	58
3.7	Conclusions .....	60
4	Multiples: Controlling for differences between firms .....	63
4.1	Introduction .....	63
4.2	Relation to prior research .....	65
4.3	Research design.....	67
4.3.1	Theoretical considerations.....	67
4.3.2	The impact of differences between firms .....	69
4.3.3	Detecting differences between firms .....	73
4.3.4	Controlling for differences between firms .....	75
4.4	Sample and data.....	77
4.4.1	Sample selection .....	77
4.4.2	Descriptive statistics .....	79
4.5	Results .....	81
4.5.1	The impact of differences between firms .....	81
4.5.2	Detecting differences between firms .....	82
4.5.3	Controlling for differences between firms .....	84

4.5.4	Benchmarking to prior literature .....	86
4.5.5	The impact of differences in industry.....	90
4.6	Sensitivity analyses .....	91
4.7	Conclusions .....	99
5	Linear information models: The effects of conservative accounting .....	103
5.1	Motivation and relation to prior research.....	103
5.2	Research design.....	106
5.2.1	Model estimation .....	106
5.2.2	Conservatism analyses.....	109
5.2.2.1	Partition approach.....	109
5.2.2.2	Delta regression .....	111
5.3	Sample selection and sample characteristics.....	115
5.4	Results .....	116
5.4.1	Model estimations and out-of-sample forecasts.....	116
5.4.2	Partition analyses.....	117
5.4.3	Delta regressions.....	119
5.4.4	Conservatism specific model estimation .....	121
5.5	Sensitivity analyses .....	127
5.5.1	Alternative model specification using Feltham/Ohlson (1995) .....	127
5.5.2	Alternative model specification using Liu/Ohlson (2000).....	133
5.5.3	Adjusting for analyst forecast bias .....	139
5.5.4	Further sensitivity tests.....	140

5.6	Conclusions .....	142
6	Summary and conclusions .....	145
6.1	Summary of findings .....	145
6.2	Research outlook .....	147
	Appendix 1: Compustat items.....	151
	References.....	153
