Steffen Schorpp

Dynamic Fleet Management for International Truck Transportation

Focusing on Occasional Transportation Tasks

With a foreword by Prof. Dr. Bernhard Fleischmann

GABLER RESEARCH

Contents

Abbreviations xi
List of Figures xiii
List of Tables xv

1 Introduction 1
1.1 Motivation 1
1.2 Goal of the Study and Problem Outline 3
1.3 Developments towards Dynamic Tour Planning 4
1.4 Market Analysis 7
1.5 Course of Action 9

2 Dynamic Transportation Problems 11
2.1 Characteristics of Dynamic Problems 11
2.2 Relevance and Classification of Dynamic Standard Problems 23
2.3 Investigated Problem Settings 26

3 Literature Review 31
3.1 Statistical Analysis of the Surveyed Publications 31
3.2 Practical Applications 33
3.3 Algorithmic Solution Concepts 36
3.3.1 Dynamic Approaches without Knowledge of the Future 37
3.3.1.1 Local Search Approaches 37
3.3.1.2 Metaheuristics 41
3.3.1.3 Heuristic Application of Exact Procedures 53
3.3.1.4 Rule-Based Decision Making 57
3.3.1.5 Multi-Agent Systems 60
3.3.2 *Strategies Anticipating the Future without Knowledge of the Future* 61
3.3.3 Dynamic Stochastic Approaches with Explicit Knowledge of the Future 64
3.4 Dynamic Test Data 71
3.5 Acceptance of Dynamic Planning Applications in Real-Life 75

4 Development and Evaluation of two Dynamic Planning Procedures 77
4.1 Multiple Neighborhood Search 77
4.1.1 General Planning Process and Synchronization 77
4.1.2 Best Insertion 79
4.1.3 Improvement Neighborhoods 80

4.1.4 Simulation Framework . . . 82
4.2 Assignment Based Procedure . . . 87
4.2.1 Bipartite Assignment Problem . . . 87
4.2.2 Assignment Matrix . . . 88
4.2.3 Events and Matrix Updates . . . 94
4.2.4 Procedure Workflow and Simulation . . . 95
4.3 A Comparison of Both Procedures . . . 99
4.4 Test Data . . . 101
4.4.1 Self-Generated Test Scenarios . . . 101
4.4.2 Benchmark Data from the Literature . . . 103
4.5 Computational Results and Performance Analysis . . . 108
4.5.1 Computational Results for Self-Generated Test Scenarios . . . 108
4.5.2 Computational Results for Benchmark Data from the Literature . . . 115
4.6 Selection of a Procedure for the Real-Life Application . . . 120

5 Real-Life Application at International Freight Forwarding Company 123
5.1 General Requirements for Long-Haul Transportation in Europe . . . 123
5.1.1 Social Regulation EC 561/2006 . . . 124
5.1.2 Social Regulation AETR . . . 127
5.1.3 Directive EC 2002/15 on Working Hours . . . 128
5.1.4 Traffic Bans . . . 129
5.1.5 Inspection of Compliance . . . 130
5.1.6 Some Recent Literature . . . 131
5.2 Exemplary Real-Life Planning Situation at a Freight Forwarding Company 132
5.3 Adjustment of Multiple Neighborhood Search . . . 135
5.3.1 Selected General Requirements . . . 135
5.3.2 Selected Requirements based on the Real-Life Planning Situation . 136
5.3.3 Adjustment of Internal Data Structures . . . 139
5.3.4 Adjustments to the MNS modules Best Insertion and Scheduling . . 140
5.4 Real-Life Test Data Set: Preprocessing and Analysis . . . 144
5.5 Computational Results . . . 148
5.5.1 Parameterization . . . 148
5.5.2 Exemplary Real-Life Scheduling . . . 157
5.5.3 Final Results . . . 165
5.5.4 Discussion . . . 167

6 Conclusion and Outlook 171
6.1 Conclusion . . . 171
6.2 Recommendations for Further Research . . . 174

Bibliography 177

Appendix 187
A Pseudocode of MNS Improvement Neighborhoods . . . 188
B Parameterization of Real-Life MNS - Detailed Results . . . 190
