Supply Chain Coordination in Case of Asymmetric Information

Information Sharing and Contracting
in a Just-in-Time environment

B 377013

Springer

Contents

1	Introduction	1
2	Supply Chain Coordination in Case of Asymmetric Information	5
2.1	Contracting Under Asymmetric Information: Basic	
	Definitions, Assumptions and Concepts	5
2.1.1	The Principal–Agent Framework	6
2.1.2	Mechanism Design and the Revelation Principle	7
2.1.3	Moral Hazard and Adverse Selection	8
2.2	The Strategic Lotsizing Framework: Using Screening Contracts	
	in Adverse Selection Models	9
2.2.1	The Classical Economic Order Quantity Model	10
2.2.2	The Classical Joint-Economic-Lotsizing Model	11
2.2.3	Strategic Lotsizing Under Full Information	12
2.2.4	Strategic Lotsizing and Screening Contracts Under	
	Asymmetric Information	15
2.3	Benefits and Pitfalls of Information Sharing Under Asymmetric	
	Information	20
2.3.1	Information Sharing	20
2.3.2	Cheap Talk: Game-Theoretic Ineffectiveness	
	of Information Sharing	21
2.3.3	Reputation, Trust, and Trustworthiness: Cooperative	
	Information Sharing and Processing	25
2.4	Supply Chain Interactions Under Asymmetric Information:	
	Literature Review	30
2.4.1	Lotsizing Decisions	31
2.4.2	Pricing Decisions	33
2.4.3	Capacity Planning	37
2.4.4	Product Specification and Backup Production	42
Appendix		43
	Optimal Menu of Contracts in the Strategic	
	Lotsizing Framework	43

3 On the Impact of Fixed Cost Reduction in the Strategic Lotsizing Framework	45
3.1 Moving Towards Just-in-Time	45
3.2 Fixed Cost Reduction in the Strategic Lotsizing Framework	46
3.2.1 Fixed Cost Reduction Under Full Information	47
3.2.2 Fixed Cost Reduction Under Asymmetric Information	48
3.3 Overinvestment in Fixed Cost Reduction due to Asymmetric Information	51
3.3.1 Concave or Linear Investment Function	51
3.3.2 Convex Investment Function	53
3.4 Example: Convex Investment Function	55
3.4.1 Numerical Evaluation	56
3.4.2 Comparative Static Analysis with Respect to the Coordination Deficit	58
3.4.3 Comparative Static Analysis with Respect to Supply Chain Performance	60
3.5 Conclusion and Managerial Insights	61
Appendix	62
Appendix 1: Karush–Kuhn–Tucker Conditions	62
Appendix 2: The Optimal Menu of Contracts	63
Appendix 3: Power Cost Function for Two Holding Cost Realizations	64
Appendix 4: Mathematical Formulations	65
Appendix 5: Additional Comparative Static Analysis	65
4 The Impact of Information Sharing on the Effectiveness of Screening Contracts: A First Laboratory Experiment	67
4.1 Behavioral Studies in Supply Chain Coordination with Contracts	67
4.2 Experimental Design and Implementation	68
4.2.1 Parameters	69
4.2.2 Decision Sequence	70
4.2.3 Decision Support	70
4.3 Do Suppliers React to the Shared Information?	71
4.3.1 Baseline: No Information Sharing	71
4.3.2 Information Sharing Without Punishment and Reward	74
4.3.3 Information Sharing with Punishment and Reward	80
4.4 Are Buyers Screened Successfully?	84
4.4.1 Screening Without Information Sharing	85
4.4.2 Screening with Information Sharing	86
4.5 Is Information Sharing Cheap Talk?	88
4.6 Does Information Sharing Enhance Supply Chain Performance?	90
4.6.1 Baseline: No Information Sharing	91
4.6.2 Information Sharing	93
4.6.3 Performance Comparison	95

4.7 Conclusion and Managerial Insights	97
Appendix	98
Appendix 1: Deviation of an Optimal Screening Contract Under Risk-Preferences	98
Appendix 2: Supply Chain Performance in Dependence of the Supplier's Risk Preference	101
Appendix 3: Sample Instructions (Translation into English)	101
5 The Impact of Contract Complexity, Supply Chain Configuration, and Out-of-Equilibrium Behavior on the Effectiveness of Information Sharing: A Second Laboratory Experiment	109
5.1 Experimental Design and Implementation	110
5.1.1 Baseline Treatment	111
5.1.2 Treatment Variables	113
5.2 Experimental Results	114
5.2.1 The Buyers' Information Sharing Behavior	114
5.2.2 Do Suppliers React to the Buyers' Shared Information?	118
5.2.3 The Buyers' Contract Choice Behavior	125
5.2.4 Do the Suppliers' Rewards Facilitate Supply Chain Coordination?	126
5.3 Performance Impact	130
5.3.1 Buyer	131
5.3.2 Supplier	133
5.3.3 Supply Chain	137
5.4 Conclusion and Managerial Insights	140
Appendix: Sample Instruction (Translation into English)	141
6 A Behavioral Model on the Effects of Information Sharing on Supply Chain Performance	147
6.1 Honesty in Principal-Agent Models	147
6.2 The Impact of Communication, Trust, and Trustworthiness on Supply Chain Performance	149
6.2.1 The Buyer's Information Sharing Behavior	150
6.2.2 The Supplier's Probability Adjustment	151
6.2.3 The Buyer's Contract Choice and the Impact on the Overall Supply Chain Deficit	152
6.3 The Impact of Unconditioned Information Sharing	154
6.3.1 General Analysis	154
6.3.2 Numerical Example	156
6.3.3 Comparative Static Analysis	157
6.4 Impact of Strategic Information Sharing	162
6.5 Conclusion and Managerial Insights	164
Appendix: Proof of Theorems	165

7 Conclusion and Outlook 171

 7.1 Different Kinds of Asymmetric Information and Supply
 Chain Interactions 173

 7.2 Signaling Contracts and Other Mechanisms 174

 7.3 Model Extensions 176
