CONTENTS

Preface	xxi
1 Principles of Six Sigma	1
1.1 Overview	1
1.2 Six Sigma Essentials	1
1.2.1 Driving Need	2
1.2.2 Customer Focus	2
1.2.3 Core Beliefs	3
1.2.4 Deterministic Reasoning	4
1.2.5 Leverage Principle	5
1.3 Quality Definition	5
1.4 Value Creation	7
1.4.1 Value	7
1.5 Business, Operations, Process, and Individual (BOPI) Goals	8
1.5.1 Differences between Product and Process Capability from a Six Sigma Perspective	9
1.6 Underpinning Economics	9
1.6.1 Sigma Benchmarking	10
1.6.2 Breakthrough Goals	11
1.6.3 Performance Benchmark	11
1.7 Performance Metrics	11
1.8 Process	12
1.8.1 Process Models	12
1.9 Design Complexity	12
1.10 Nature and Purpose of Six Sigma	13
1.10.1 Not Just Defect Reduction	13
1.11 Needs that Underlie Six Sigma	13
1.11.1 Looking Across the Organization	14
1.11.2 Processing for Six Sigma	15
1.11.3 Designing for Six Sigma	15
1.11.4 Managing for Six Sigma	15
1.11.5 Risk Orientation	15
1.12 Why Focusing on the Customer is Essential to Six Sigma	16
1.13 Success Factors	18
1.14 Software Applications	19
1.14.1 Explore Excel	19

1.14.2	Explore MINITAB	19
1.14.3	Explore JMP	19
	Glossary	20
	References	21
2	Six Sigma Installation	22
2.1	Overview	22
2.2	Six Sigma Leadership—the Fuel of Six Sigma	23
2.3	Deployment Planning	26
2.3.1	Executive Management	26
2.3.2	Six Sigma Champion	27
2.3.3	Line Management	28
2.3.4	Master Black Belts	28
2.3.5	Black Belts	29
2.3.6	Green Belts	29
2.3.7	White Belts	30
2.3.8	Six Sigma Roadmap	31
2.3.9	Characteristics of Effective Metrics	32
2.3.10	The Role of Metrics	32
2.3.11	Six Sigma Performance Metrics	32
2.3.12	Profit and Measurement	33
2.3.13	Twelve Criteria for Performance Metrics	33
2.4	Application Projects	34
2.5	Deployment Timeline	35
2.6	Design for Six Sigma [DFSS] Principles	36
2.7	Processing for Six Sigma [PFSS] Principles	37
2.8	Managing for Six Sigma [MFSS] Principles	37
2.9	Project Review	37
2.9.1	Tollgate Criteria	38
2.9.2	Project Closure	38
2.9.3	Project Documentation	38
2.9.4	Personal Recognition	38
2.9.5	Authenticating Agent	38
2.10	Summary	38
	Glossary	39
	References and Notes	40
3	Lean Sigma Projects	41
3.1	Overview	41
3.2	Introduction	41
3.3	Project Description	42
3.4	Project Guidelines	43
3.5	Project Selection	44
3.5.1	Project Selection Guidelines	44
3.6	Project Scope	46
3.7	Project Leadership	48
3.8	Project Teams	48

3.9	Project Financials	48
3.10	Project Management	49
3.11	Project Payback	50
3.12	Project Milestones	51
3.13	Project Roadmap	52
3.14	Project Charters (General)	52
3.15	Six Sigma Projects	57
3.16	Project Summary	63
	Glossary	64
	References	66
4	Lean Practices	67
4.1	Overview	67
4.2	Introduction	67
4.3	The Idea of Lean Thinking	68
4.4	Theory of Constraints [TOC]	70
4.5	Lean Concept	71
4.6	Value-Added Versus Non-Value-Added Activities	71
4.7	Why Companies Think Lean	71
4.8	Visual Controls—Visual Factory	72
4.9	The Idea of Pull (Kanban)	72
4.10	5S–6S Approach	73
4.11	The Idea of Perfection (Kaizen)	76
4.12	Replication—Translate	76
4.13	Poka-Yoke System—Mistakeproofing	77
4.14	SMED System	78
4.15	7W + 1 Approach—Seven Plus One Deadly Waste(s)	79
4.16	6M Approach	82
4.17	Summary	83
	Glossary	83
	References and Notes	85
5	Value Stream Mapping	87
5.1	Overview	87
5.2	Introduction	87
5.3	Value Stream Mapping	88
5.3.1	Waste Review	89
5.3.2	Value-Added and Non-Value-Added Activities	90
5.3.3	Elements of a Value Stream Map	92
5.4	Focused Brainstorming	94
5.5	Graphical Representation of a Process in a Value Stream Map	96
5.6	Effective Working Time	99
5.7	Customer Demand	99
5.8	Takt Time	99

5.9	Pitch Time	100
5.10	Queuing Time	101
5.11	Cycle Time	101
5.12	Total Cycle Time	101
5.13	Calculation of Total Lead Time(s)	101
5.14	Value-Added Percentage and Six Sigma Level	105
5.15	Drawing the Current-Value-Stream Map	105
5.15.1	Drawing Tips	105
5.15.2	Common Failure Modes	106
5.15.3	Common Definitions	106
5.16	Drawing the Value Stream Map	106
5.17	What Makes a Value Stream Lean	113
5.18	The Future Value Stream Map	113
5.19	Summary	114
	Glossary	114
	References and Notes	116

6 Introductory Statistics and Data 118

6.1	Overview	118
6.2	Introduction	118
6.3	Genetic Code of Statistics	119
6.4	Populations and Samples	119
6.5	The Idea of Data	121
6.6	Nature of Data	122
6.6.1	Quantitative Variables and Data	126
6.6.2	Qualitative/Categorical Variables and Data	128
6.7	Data Collection	128
6.8	The Importance of Data Collection	129
6.8.1	Control Cards	129
6.8.2	Data Collection Sheet	130
6.9	Sampling in Six Sigma	132
6.9.1	Random Sampling	132
6.9.2	Sequential Sampling	133
6.9.3	Stratified Sampling	133
6.10	Sources of Data	135
6.11	Database	135
6.12	Summary	136
	Glossary	136
	References	138

7 Quality Tools 139

7.1	Overview	139
7.2	Introduction	139
7.3	Nature of Six Sigma Variables	140
7.3.1	CT Concept	142
7.3.2	CTQ and CTP Characteristics	143

7.3.3	CTX Tree (Process Tree)	144
7.3.4	CTY Tree (Product Tree)	145
7.3.5	The Focus of Six Sigma	146
7.3.6	The Leverage Principle	146
7.4	Quality Function Deployment (QFD)	148
7.5	Scales of Measurement	149
7.5.1	Likert Scale	149
7.5.2	Logarithm Scale	150
7.6	Diagnostic Tools	152
7.6.1	Elements for Problem Solving—Diagnostic Tools and Methods	152
7.6.2	Problem Definition—Defining Project Objective	153
7.7	Analytical Methods	154
7.7.1	Cause-Effect (CE) Analysis	154
7.7.1.1	How to Construct the CE Diagram	154
7.7.1.2	How to Construct the CE Diagram Using MINITAB	156
7.7.2	Failure Mode-Effects Analysis (FMEA)	157
7.7.2.1	FMEA Diagram	158
7.7.3	XY Matrix	161
7.8	Graphical Tools	161
7.8.1	Graphical Summary	163
7.8.2	Boxplot or Box-and-Whisker Plot	164
7.8.3	Normal Probability Plot	166
7.8.4	Main-Effects Plot	169
7.8.5	Pareto Chart	171
7.8.6	Run Chart	173
7.8.7	Time-Series Plot	174
7.8.8	Multi-Vari Charts	175
7.8.9	Scatterplot	176
7.9	Graphical Representation of a Process	179
7.9.1	Process Flowcharts	180
7.9.2	Process Mapping	182
7.9.3	Cross-Functional Mapping	184
7.9.4	Process Mapping—Deployment Diagram	184
7.10	SIPOC Diagram	186
7.11	IPO Diagram—General Model of a Process System	187
7.12	Force-Field Analysis	188
7.13	Matrix Analysis—The Importance of Statistical Thinking	190
7.14	Checksheets	190
7.15	Scorecards	191
7.16	Affinity Diagram	191
7.17	Concept Integration	192
	Glossary	192
	References	194
8	Making Sense of Data in Six Sigma and Lean	195
8.1	Overview	195
8.2	Summarizing Quantitative Data: Graphical Methods	195

8.2.1	Analytical Charts	195
8.2.2	Dotplots	196
8.2.3	Stem-and-Leaf Plots	198
8.2.4	Frequency Tables	199
8.2.5	Histograms and Performance Histograms	201
8.2.6	Run Charts	202
8.2.7	Time-Series Plots	203
8.3	Summarizing Quantitative Data: Numerical Methods	204
8.3.1	Measures of Center	204
8.3.2	Measures of Variation	207
8.3.2.1	Range	207
8.3.2.2	Variance and Standard Deviation	208
8.3.2.3	Coefficient of Variation (CV)	210
8.3.2.4	The Interquartile Range	210
8.3.2.5	Boxplots	211
8.3.3	Identifying Potential Outliers	212
8.3.4	Measures of Position and the Idea of z Scores in Six Sigma	214
8.3.4.1	Percentiles	214
8.3.4.2	The Use of z Scores	215
8.3.5	Measures of Spread and Lean Sigma	215
8.4	Organizing and Graphing Qualitative Data	217
8.4.1	Organizing Qualitative Data	217
8.4.2	Graphing Qualitative Data	219
8.4.2.1	Pie Chart	219
8.4.2.2	Bar Graph	219
8.4.3	Pareto Analysis with Lorenz Curve	220
8.5	Summarizing Bivariate Data	222
8.5.1	Scatterplot	222
8.5.2	Correlation Coefficient	224
8.5.2.1	Pearson Correlation Coefficient	225
8.5.2.2	Spearman's Rho (ρ)	226
8.5.2.3	Kendall's Tau (τ) Rank Correlation	228
8.6	Multi-Vari Charts	229
	Glossary	230
	Exercises	232

9	Fundamentals of Capability and Rolled Throughput Yield	237
9.1	Overview	237
9.2	Introduction	237
9.3	Why Capability	238
9.3.1	Performance Specifications	239
9.3.2	Fundamental Concepts of Defect-Based Measurement	240
9.4	Six Sigma Capability Metric	241
9.4.1	Criteria for Performance Metrics	241

9.4.2	Computing the Sigma Level from Discrete Data	242
9.4.3	Defective Proportions	244
9.4.4	Six-Sigma-Level Calculations (DPU, DPO, DPMO, PPM)—Examples	244
9.5	Discrete Capability	246
9.6	Continuous Capability—Example	247
9.6.1	Data Collection for Capability Studies	249
9.7	Fundamentals of Capability	249
9.8	Short- Versus Long-Term Capability	251
9.8.1	Short-Term Capability	251
9.8.2	Long-Term Capability	252
9.8.3	Introduction to Calibrating the Shift	253
9.9	Capability and Performance	253
9.10	Indices of Capability	256
9.10.1	C_p Index	256
9.10.2	C_{pk} Index	258
9.10.3	P_p Index	260
9.10.4	P_{pk} Index	261
9.11	Calibrating the Shift	262
9.12	Applying the 1.5σ shift Concept	264
9.13	Yield	265
9.13.1	Final Test Yield (FTY)	267
9.13.2	Yield Related to Defects	267
9.13.3	Rolled Throughput Yield (RTY)	269
9.13.4	In-Process Yield (IPY)	269
9.13.5	In-Process Yield (IPY) and Rolled Throughput Yield (RTY)	270
9.14	Hidden Factory	273
9.14.1	Hidden Factory Composition	275
	Glossary	276
	References	278
10	Probability	279
10.1	Overview	279
10.2	Experiments, Outcomes, and Sample Space	279
10.3	Calculating Probability	280
10.3.1	Equally Likely Events	281
10.3.2	Probability as Relative Frequency	281
10.3.3	Subjective Probability	283
10.4	Combinatorial Probability	283
10.5	Marginal and Conditional Probabilities	284
10.6	Union of Events	285
10.6.1	Addition Rule	285
10.6.2	Mutually Exclusive Events	286
10.6.3	Complementary Events	287
10.7	Intersection of Events	288

10.7.1	Independent Versus Dependent Events	288
10.7.2	Multiplication Rule	289
	Glossary	292
	Exercises	292
11	Discrete Random Variables and their Probability Distributions	296
11.1	Overview	296
11.2	Six Sigma Performance Variables	296
11.3	Six Sigma Leverage Variables	298
11.4	Random Variables	299
11.4.1	Discrete Random Variables	300
11.4.2	Continuous Random Variables	300
11.5	Probability Distributions of a Discrete Random Variable	301
11.6	Mean of a Discrete Random Variable	302
11.7	Standard Deviation of a Discrete Random Variable	304
11.8	The Binomial Distribution	306
11.8.1	Factorials and Combinations	306
11.8.2	The Binomial Experiment	308
11.8.3	The Binomial Probability Distribution And Binomial Formula	309
11.8.4	Probability of Success and Shape of the Binomial Distribution	313
11.8.5	Mean and Standard Deviation of the Binomial Distribution	314
11.9	The Poisson Probability Distribution	314
11.9.1	Mean and Standard Deviation of the Poisson Probability Distribution	317
11.10	The Geometric Distribution	317
11.11	The Hypergeometric Probability Distribution	318
	Glossary	320
	Exercises	320
12	Continuous Random Variables and Their Probability Distributions	324
12.1	Overview	324
12.2	Continuous Probability Distributions	324
12.3	The Normal Distribution	326
12.3.1	The Empirical Rule	328
12.3.2	The Standard Normal Distribution	329
12.3.2.1	Using a Normal Probability Table to Calculate Normal Distribution Probabilities	330
12.3.2.2	Determining Percentiles of the Standard Normal Distribution	333
12.3.3	Applications of the Normal Distribution	336
12.4	The Exponential Distribution	340
	Glossary	345
	Exercises	346

13 Sampling Distributions	349
13.1 Overview	349
13.2 Sampling Distribution of a Sample Mean	349
13.2.1 Sampling and Nonsampling Errors	351
13.3 Sampling Distribution of a Sample Proportion	354
13.4 The Central-Limit Theorem (CLT)	356
13.4.1 The CLT and Sampling Distribution of the Sample Mean	356
13.4.2 The CLT and Sampling Distribution of the Sample Proportion	359
Glossary	362
Exercises	362
 14 Single-Population Estimation	 364
14.1 Overview	364
14.2 Meaning of a Confidence Level	365
14.3 Estimating a Population Mean	366
14.3.1 Confidence Interval for a Population Mean Using the Normal Distribution	366
14.3.1.1 Underlying Conditions for Using the z Interval for a Population Mean	368
14.3.2 Confidence Interval for a Population Mean Using the t Distribution	369
14.3.2.1 Underlying Conditions for Using the t Procedure	370
14.3.2.2 Using the t Procedure When the Normality Assumption is Questionable	372
14.4 Estimating a Population Proportion	374
14.4.1 Traditional Large-Sample Method	374
14.4.2 Wilson Estimator	375
14.5 Estimating a Population Variance	377
Glossary	380
Exercises	380
 15 Control Methods	 384
15.1 Overview	384
15.2 Introduction	384
15.3 Control Logic	385
15.4 Statistical Control Systems	386
15.4.1 Mistakeproofing	386
15.5 Statistical Control	394
15.6 Prevention Versus Detection	395
15.7 A Process Control System Definition	395
15.8 Variation	396
15.8.1 Common Causes	396
15.8.2 Special Causes	396

15.9	Process Out of Control	397
15.10	Fundamentals of Process Control	400
15.11	Continuous Statistical Process Control (SPC) Tools	401
15.12	Interpreting Process Control	402
15.13	Statistical Process Control and Statistical Process Monitoring	403
15.14	The Foundation of SPC	404
15.15	Tools for Process Controls – Control Charts	405
15.16	Control Limits	406
15.17	Process Out-of-Control Condition	407
15.18	Western Electric Rules	407
15.19	Control Charts and How They are Used	411
15.20	Precontrol Method	413
15.20.1	The Foundations of Precontrol	414
15.20.2	Precontrol Charts	416
15.21	Control Charts for Variables	418
15.21.1	$\bar{X}$ Chart	418
15.21.2	R Chart (Range Chart)	420
15.21.3	$\bar{X}$ – R Chart	421
15.21.4	Moving Range (MR) Chart	422
15.21.5	Standard Deviation Chart	423
15.22	Control Chart for Attributes	424
15.22.1	p Chart	424
15.22.2	Control Chart— np Chart	424
15.22.3	c Chart	426
15.22.4	u Chart	427
	Glossary	429
	References and Notes	432
16	Single-Population Hypothesis Tests	433
16.1	Overview	433
16.2	Introduction to Hypothesis Testing	433
16.3	Testing a Claim About a Population Mean	442
16.3.1	Hypothesis Test Using the Normal Distribution	442
16.3.2	Hypothesis Test Using the t Distribution	444
16.3.3	Hypothesis Test About the Median	448
16.4	Hypothesis Test About a Population Proportion	450
	Glossary	453
	Exercises	454
17	Estimation and Hypothesis Tests: Two Populations	457
17.1	Overview	457
17.2	Inferences About Differences Between Two Population Means for Independent Samples	457
17.2.1	Two-Sample t Test	458
17.2.2	Mann–Whitney Test	466

17.3	Inferences About Differences Between Two Population Means for Paired Samples	470
17.3.1	Paired t Test	470
17.3.2	Wilcoxon Signed-Rank Test	477
17.4	Inferences About Differences Between Two Population Proportions	479
17.4.1	Large-Sample Procedure	480
	Glossary	485
	Exercises	486
18	Chi-Square Tests	489
18.1	Overview	489
18.2	A Goodness-of-Fit Test	490
18.3	Contingency Tables	495
18.4	Tests of Independence and Homogeneity	495
18.4.1	Test of Independence	495
18.4.2	Test of Homogeneity	501
	Glossary	503
	Exercises	504
19	Analysis of Variance	507
19.1	Overview	507
19.2	The F Distribution	507
19.3	One-Way Analysis of Variance	510
19.3.1	Variance between Groups	511
19.3.2	Variance within Groups	512
19.3.3	Total Sum of Squares (SST)	512
19.3.4	Relationships within Sums of Squares and Degrees of Freedom	513
19.3.5	Equal Sample Sizes	513
19.3.6	Calculating the Value of the Test Statistic	513
19.3.7	The One-Way ANOVA Table	514
19.4	Pairwise Comparisons	519
19.5	Multifactor Analysis of Variance	520
19.5.1	Two-Way ANOVA	520
19.5.2	N -Way ANOVA	520
19.6	What to Do When the Assumptions Are Unreasonable	521
	Glossary	522
	Exercises	522
20	Linear and Multiple Regression	525
20.1	Overview	525
20.2	Simple Regression Model	525
20.3	Linear Regression	526

20.3.1	Simple Linear Regression Analysis	528
20.3.2	Scatterplots	529
20.3.2.1	Least Squares Line	530
20.3.2.2	Interpretations of a and b	533
20.3.3	Assumptions of the Regression Model	534
20.3.4	Standard Deviation of Random Errors	536
20.4	Coefficient of Determination and Correlation	538
20.5	Multiple Regression	544
20.5.1	Assumptions of the Multiple Regression Model	546
20.5.2	Standard Deviation of Errors	546
20.5.3	Coefficient of Multiple Determination	547
20.6	Regression Analysis	548
20.6.1	Testing for Overall Significance of Multiple Regression Model	548
20.6.2	Inferences about a Single Regression Coefficient, B_i	549
20.6.2.1	Sampling Distribution of b	549
20.6.2.2	Estimation of B for a Simple Linear Regression	550
20.6.2.3	Estimation of B_i for a Multiple Linear Regression	550
20.6.2.4	Hypothesis Testing about B for a Simple Linear Regression	550
20.6.2.5	Hypothesis Testing about Individual Coefficients for a Multiple Linear Regression	551
20.7	Using the Regression Model	551
20.8	Residual Analysis	559
20.9	Cautions in Using Regression	561
20.9.1	Determining whether a Model is Good or Bad	561
20.9.2	Outliers and Influential Observations	562
20.9.3	Multicollinearity	563
20.9.4	Extrapolation	563
20.9.5	Causality	564
	Glossary	564
	Exercises	565
21	Measurement Analysis	570
21.1	Overview	570
21.2	Introduction	570
21.3	Measurement	571
21.4	Measurement Error	572
21.5	Accuracy and Precision	573
21.6	Measurement System as a Process	576
21.7	Categories of Measurement Error that Affect Location	578
21.8	Categories of Measurement that Affect Spread	579
21.9	Gage Accuracy and Precision	580
21.10	Exploring Linearity Error	581
21.11	Gage Repeatability and Reproducibility (R&R)	582
21.11.1	Variable Gage R&R	584

21.11.2	Crossed Gage R&R	586
21.11.3	Attribute Gage R&R	590
21.12	ANOVA Method Versus $\bar{X}$ -R Method	597
21.13	ANOVA/Variance Component Analysis	599
21.14	Rules of Thumb	601
21.15	Acceptability Criteria	603
21.16	Chapter Review	604
	Glossary	605
	References	609

22 Design of Experiments 610

22.1	Overview	610
22.2	Introduction	610
22.3	Design of Experiments (DOE) Definition	611
22.4	Role of Experimental Design in Process Improvement	614
22.5	Experiment Design Tools	616
22.6	Principles of an Experimental Design	617
22.7	Different Types of Experiments	619
22.7.1.1	Main Effects	620
22.8	Introduction to Factorial Designs	623
22.9	Features of Factorial Designs—Orthogonality	625
22.10	Full Factorial Designs	627
22.11	Residual Analysis (2^2)	628
22.12	Modeling (2^2)	630
22.13	Multifactor Experiment	630
22.14	Fractional Factorial Designs	631
22.15	The ANOVA Table	636
22.16	Normal Probability Plot of the Effects	636
22.17	Main-Effects Plot	637
22.18	Blocking Variable	637
22.19	Statistical Significance	638
22.20	Practical Significance	638
22.21	Fundamentals of Residual Analysis	639
22.22	Centerpoints	640
22.23	Noise Factors	641
22.24	Strategy of Good Experimentation	641
22.25	Selecting the Variable Levels	641
22.26	Selecting the Experimental Design	642
22.27	Replication	642
22.28	Analyzing the Data (ANOVA)	643
22.29	Recommendations	643
22.30	Achieving the Objective	643
22.31	Chapter Summary	644
22.32	Chapter Examples	645
	Glossary	652

Appendix A Statistical Tables **737**

Table I	Table of Binomial Probabilities	738
Table II	Standard Normal Distribution Table	750
Table III	The t Distribution Table	752
Table IV	Chi-Square Distribution Table	753
Table V	The F Distribution Table	754
Table VI	Critical Values for the Mann-Whitney Test	762
Table VII	Critical Values for the Wilcoxon Signed-Rank Test	763
Table VIII	Sigma Conversion Table	763

Appendix B Answers to Selected Odd-Numbered Exercises **765**

Index **777**
