<i>Preface</i>	<i>page xi</i>
<i>Acknowledgment</i>	<i>xiii</i>
1 Introduction	1
1.1 The Model of a Mechanism	1
1.1.1 Example: The Competitive Mechanism	6
1.1.2 Example: Mechanisms and Noncooperative Solution Concepts	8
1.2 Encoding and Product Structure	13
1.2.1 Product Structure and Noncooperative Solution Concepts	16
1.2.2 Example: The Efficient Level of a Public Good	18
1.3 A Theme in Differential Equations	24
1.3.1 Example: Does a Given Mapping Represent Inverse Demand?	25
1.4 Investigating Mechanisms Using Calculus	27
1.4.1 Example: Selecting the Efficient Level of a Public Good for Restricted Valuation Functions	30
1.5 Overview of Text	34
2 Classical Concepts and Results	35
2.1 <i>Distribution, Foliation, and Mapping</i>	35
2.1.1 Example: A Discontinuous Distribution \mathcal{D} for Which the Equivalence in Figure 1.4 Holds	37
2.2 Integrability	38
2.2.1 Example: Integrability and the Equality of Mixed Partial	40

2.3	A Geometric Interpretation of Integrability	42
2.3.1	Example: Integrable and Nonintegrable Distributions	43
2.4	The Frobenius Theorem	48
2.5	The Proof of the Frobenius Theorem	52
2.5.1	The Case of $c = 1$ and $d = 2$	52
2.5.2	The General Case	54
2.6	Obstacles to Global Equivalence	57
2.6.1	Example: The Nonexistence Globally of the Mapping $u(c)$	59
2.6.2	A Subtlety of Submanifolds	61
2.6.3	Example: A Maximal Integral Manifold Need Not Be a Submanifold	63
2.7	A Global Construction of <i>Mapping</i>	65
2.7.1	Example: Consumer Demand	66
2.7.2	Example: A Transverse Plane May Not Exist Globally	69
3	Application to Mechanisms	74
3.1	Two Examples	74
3.1.1	Example: Cournot Duopoly with Quadratic Cost	75
3.1.2	Example: Exchange Economy with Quadratic Utility	80
3.2	<i>Direct Sum</i> , <i>Product Structure</i> , and <i>Message Process</i>	85
3.2.1	The Duality between Integrability Condition (ii) of <i>Direct Sum</i> and Partitioning Condition (iii) of <i>Product Structure</i>	86
3.2.2	Example: Nonintegrability of the Direct Sum \mathcal{D} and the Failure of the Product Sets to Partition Θ	89
3.3	<i>Message Process</i> \Rightarrow <i>Product Structure</i> \Rightarrow <i>Direct Sum</i>	90
3.4	A Modified Frobenius Theorem	92
3.4.1	<i>Direct Sum</i> \Rightarrow <i>Message Process</i> Locally	96
3.5	Proof of the Theorem for Mechanism Design	99
3.5.1	Example: $n = 2$ and $c_1 = d_1 = c_2 = d_2 = 1$	101
3.5.2	The General Case	105
3.6	<i>Global Product Structure</i>	108
3.6.1	Example: Defining a Message Process Using Partitions	109
3.6.2	A Test for <i>Product Structure</i>	111
3.6.3	<i>Global Product Structure</i> in the Case of $n = 2$	113
3.6.4	<i>Global Product Structure</i> for Arbitrary n	117
3.7	<i>Differential Ideal</i>	119
3.7.1	Example: Properties (iii) of <i>Differential Ideal</i> and of <i>Product Structure</i>	121

4	Realizing a C^∞ Mapping	125
4.1	Necessary and Sufficient Conditions	127
4.1.1	Equations for Realization on the Objective F	130
4.1.2	Necessary and Sufficient Conditions Using <i>Differential Ideal</i>	132
4.1.3	The Multiplicity of Mechanisms	133
4.2	A Lower Bound on Message Space Dimension	136
4.2.1	Example: Existence of a Mechanism of Profile $(1, 1)$ That Realizes f in the Case of $n = 2$ and $\dim \Theta_1 = \dim \Theta_2 = 2$	137
4.2.2	Chen's Bound on Minimal Message Space Dimension	140
4.3	Example: Realizing an Implicitly Defined Function	142
4.3.1	A Special Case of (4.37): Realizing a Walrasian Allocation	145
4.3.2	Realizing a Non-Walrasian Pareto Optimal Allocation	146
4.3.3	Discussion	148
4.4	Genericity	150
4.4.1	The Proof of the Genericity Result	151
4.4.2	The Information Collected in Realizing a Generic F	154
4.5	Example: Realizing a Walrasian Allocation	156
4.6	Example: Prices in Terms of Endowments	159
4.6.1	The Competitive Mechanism with Net Trades as Messages	162
4.6.2	<i>Product Structure, Direct Sum, and Differential Ideal</i> in Realizing Walrasian Prices	164
4.6.3	$k = 2$ Goods and n Agents	168
4.6.4	The Case of Cobb–Douglas Utility	170
4.6.5	$k = 3$ Goods and $n = 2$ Agents	171
4.6.6	The General Case	173
4.7	Example: Team Decision Problems	175
4.8	Example: Implementation in Privacy Preserving Strategies	179
4.9	Genericity and the Theory of Organizations	185
	<i>Bibliography</i>	191
	<i>Index</i>	195
