Contents

Dedication	xi
Acknowledgments	xiii
Preface	xv
1. Introduction	1
The Scene	1
The Response	3
The Tools	6
Lean Manufacturing	7
Cost Cutting—Does it Work?	9
Why Do Executives Persist in Cost Cutting?	11
Kaizen	12
Total Productive Maintenance	13
Six Sigma	13
Supply Chain Management	14
Reliability-Centered Maintenance	14
Predictive Maintenance	15
Root Cause Analysis	16
Other Tools	17
Summary	18
References	19
2. Aligning the Organization	21
Why We Must Align the Organization	21
Aligning for Manufacturing Excellence	24
Developing and Using an Asset Management Strategy as an Alignment Tool	30
CEO Compensation: Mis-Aligning the Organization	35
Internal Equitability	38

CEO Compensation and Internal Equity	39
External Competitiveness	42
CEO Compensation and External Competitiveness	43
Initiative Overload: A Mis-Alignment Issue	46
Summary	47
References	49
3. Innovation	51
Introduction	51
Cost Cutting vs. Creating an Innovative Environment	54
Getting Lower Costs Through "Little Innovation"	55
Creating Expectations	56
Outsourcing/Offshoring: The Loss of Innovation	59
Two Scenarios	61
Human Capital: The Heart of Innovation and Value Creation	64
Other Human Asset Valuation Methods	70
Summary	73
References	75
4. Leadership and Teams	77
Introduction	77
Leaders vs. Managers	77
Vision, Reality, Courage, and Ethics	79
Personal Humility and Professional Resolve	79
Building Character Through Principles	80
Leadership: Aligning the Organization	81
Five Practices of Exemplary Leadership	82
The 21 Irrefutable Laws of Leadership	82
Inspiring Ordinary People to Extraordinary Performance	82
Summary: Common Traits of Leadership	84
Teams and Teamwork	85
Self-Managed Teams: Caution	89
Organizational Context	91
Expert Team Coaching	92
Team Leader Execution Skills	93
Corporate Level Observations	94
The Dysfunctions of Teams	94
Summary	95
References	95
5. Managing Change	97
Introduction	97
Articulate a Compelling Reason for Change	99
Apply Leadership and Management Principles	100
Communicate the Strategy and Goals	101

Facilitate Employee Implementation of the Change Process	102
Measure the Results: Reward Good Behavior, Challenge Bad Behavior	103
Stabilize the Organization in the New Order	105
Succession Planning and Management	106
Beta's Omega Division	106
Better Succession Management	108
Selecting the Right Managers	109
Sustaining Improvement	110
Summary	112
References	112
6. Business Level Failure Models and Effects	115
Analysis: Selecting the Right Improvement	
Projects and Tools	
The Manufacturing Plant as a Business System	116
Business-Level Failure Modes and Effects Analysis (FMEA)	117
Typical Results	121
Selecting the Right Tools	121
Beta's Allen Central Plant	123
Beta's Swampton Plant	124
Beta's Martin Plant	125
Beta's Leeds Plant	128
Beta's Van Lear Plant	129
Beta's Blany Plant	129
Beta's Ivel Plant	130
Summary	131
Reference	133
7. Lean Manufacturing	135
Lean Manufacturing: A Very Brief History	135
Lean Characteristics	137
The Toyota Way	141
Philosophy: Long-Term Thinking	141
Processes: Eliminate Waste	143
People and Partners: Respect, Challenge, and Grow Them	145
Problem Solving: Continuous Improvement and Learning	146
Keeping Things Simple	148
Toyota Production System Summary	150
Decoding the DNA of the Toyota Production System	152
Beta's Banner Division	153
Banner Division's Boldman Plant	154
Banner Division's Blue River Plant	154
Summary	156
References	157

8. Kaizen	159
Introduction	159
Ideas Are Free	160
Major Principles of Kaizen	164
Kaizen and Management	164
5S	166
Standardization	166
Elimination of Muda (Waste)	167
Kanban	168
Beta's Dorton Plant	169
Beta's Burton Plant	171
Summary	172
References	172
9. Total Productive Maintenance	173
Fundamentals of TPM	174
OEE	176
OEE/TPM and Safety Performance	180
Operator Care	182
Operator/Owner Guidelines	183
Maintainer/Improver Guidelines	183
Quick Changeover	185
Relationship Between TPM and RCM	186
Beta's Ivyton Plant	186
Beta's Grethel Plant	188
Summary	189
References	191
10. Six Sigma	193
Definition of Six Sigma	193
The Methodology	195
An Alternative Application of Six Sigma Principles	197
Beta's Waldo Plant	198
Beta's Staffordville Plant	199
Beta's Teaberry Plant	199
Six Sigma and Lean Manufacturing	200
Summary	201
References	203
11. Supply Chain Management	205
Supply Chain Management: One Model	205
Supply Chain Management: Another Model	208
Differentiating and Managing Customers	208
Cost of Service	212

Good Suppliers	212
Policy Deployment	213
Functional Organizations vs. Supply Chain Organizations	214
Beta's Falcon Plant	215
Beta's Tomahawk Division	216
Beta's Topmost-DPD Division	217
Beta's Melvin Plant	218
Beta's Weeksbury Division	219
Summary	219
References	220

12. Reliability-Centered Maintenance 221

Introduction	221
RCM Standard SAE JA1011	223
An RCM Example	225
Criticality Analysis	227
RCM and Developing a Maintenance Strategy	228
Potential RCM Pitfalls and Suggestions	233
PM Optimization: RCM in Reverse	235
Beta's Lowhansville Plant	238
Beta's Carr Creek Plant	239
Beta's Oil Springs Plant	240
RCM and TPM: The Relationship	241
RCM and Six Sigma: Common and Uncommon Characteristics	243
Summary	243
References	244

13. Predictive Maintenance/Condition Monitoring 247

Introduction	247
Cost Reduction Benefit of CM	247
Preventive Maintenance (PM) and Increased Costs	250
Common Mistakes in CM Programs	251
CM: Understanding and Managing the Degradation Process	252
PdM/CM Technologies	255
Vibration Analysis	256
The Basics of Vibration Analysis	258
Lubrication/Fluid Analysis	261
Infrared Thermography	265
Motor and Electrical Testing	271
Specific Motor Current Testing	272
Airborne Ultrasonic Testing	273
Operator Process Condition Monitoring	275
Contracting CM	277
Beta's Boons Camp Plant	279

Beta's Stanville Plant	280
Beta's Dwale Plant	281
Beta's Watergap Plant	282
Summary	282
References	284
14. Root Cause Analysis	285
Introduction	285
Three Common Approaches	287
5 Whys	287
CEDAC	290
Apollo RCA Methodology	294
RCA Example	296
Results	297
RCA Rt	298
The Development of a Cohesive Approach	298
The Importance of Problem Definition and Follow Through	301
Cause Trees	302
Action Management	303
Incidents and Ongoing Concerns	304
Summary	304
References	305
15. Closing	307
Beta's Strategy	307
Nominal Hierarchy for Application of the Strategy and Tools	310
Reference	313
Appendix A Planning and Scheduling	315
References	322
Appendix B Performance Measurement	323
Return on Net Assets (RoNA) or Return on Replacement Value (RoRv)	329
Measure for Weakness	329
Beta's Instrument Division	330
Closing	333
References	334
Appendix C Listing of Commonly Used Improvement Tools and Terms	335
Reference	358
Index	359
