

Information and Learning in Markets
The Impact of Market Microstructure

Xavier Vives

Princeton University Press
Princeton and Oxford

Contents

Preface	xi
Introduction and Lecture Guide	1
References	12
1 Aggregation of Information in Simple Market Mechanisms: Large Markets	15
1.1 Introduction and Overview	15
1.2 Large Cournot Markets	17
1.3 Welfare in Large Cournot Markets with Asymmetric Information	27
1.4 Information Aggregation in Smooth Large Markets	29
1.5 Auctions and Voting	38
1.6 Endogenous Information Acquisition	40
1.7 Summary	45
1.8 Appendix	46
1.9 Exercises	48
References	51
2 Aggregation of Information in Simple Market Mechanisms: How Large Is Large?	53
2.1 A General Linear-Normal Cournot Model	54
2.2 Convergence to Price Taking in a Cournot Market	57
2.3 Endogenous Information Acquisition	58
2.4 Convergence to the First-Best: Market Power and Information Aggregation	62
2.5 Convergence in Auctions	67
2.6 Summary	70
2.7 Appendix	71
2.8 Exercises	74
References	76
3 Rational Expectations and Supply Function Competition	78
3.1 Rational Expectations Equilibrium: Concepts, Problems, and Welfare	78
3.2 Supply Function Competition and REE in a Continuum Economy	84
3.3 Welfare Analysis of REE	95
3.4 Strategic Supply Function Equilibria and Convergence to a Price-Taking Equilibrium	98
3.5 Double Auctions	100

3.6	Summary	102
3.7	Appendix	102
3.8	Exercises	103
	References	105
4	Rational Expectations and Market Microstructure in Financial Markets	107
4.1	Market Microstructure	108
4.2	Competitive Rational Expectations Equilibria	112
4.3	Informed Traders Move First and Face Risk-Neutral Competitive Market Makers	130
4.4	Hedgers and Producers in a Futures Market	135
4.5	Summary	145
4.6	Appendix	147
4.7	Exercises	148
	References	152
5	Strategic Traders in Financial Markets	156
5.1	Competition in Demand Schedules	157
5.2	Informed Traders Move First	168
5.3	Market Makers Move First	177
5.4	An Application: Welfare Analysis of Insider Trading	183
5.5	Summary	189
5.6	Exercises	190
	References	195
6	Learning from Others and Herding	199
6.1	Herding, Informational Cascades, and Social Learning	200
6.2	Extensions of the Herding Model	204
6.3	A Smooth and Noisy Model of Learning from Others	210
6.4	Applications and Examples	222
6.5	The Information Externality and Welfare	227
6.6	Rational Expectations, Herding, and Information Externalities	236
6.7	Summary	239
6.8	Appendix	240
6.9	Exercises	241
	References	244
7	Dynamic Information Aggregation	248
7.1	Rational Expectations, Full-Information Equilibria, and Learning	248
7.2	Learning and Convergence to a Full-Information Equilibrium with Uninformed Firms	253
7.3	Market Dynamics with Asymmetric Information	257
7.4	Slow Learning and Convergence	261
7.5	Summary	266
7.6	Appendix	267
7.7	Exercises	271
	References	273
8	Dynamic Rational Expectations Models in Competitive Financial Markets	276
8.1	Dynamic Competitive Rational Expectations	277
8.2	The Impact of Risk-Averse Market Makers	285

8.3	Dynamic Trading with Short-Term Investors	294
8.4	Explaining Crises and Market Crashes	306
8.5	Summary	318
8.6	Appendix	320
8.7	Exercises	324
	References	326
9	Price and Information Dynamics in Financial Markets	330
9.1	Sequential Trading, Dynamic Market-Order Markets, and the Speed of Learning from Past Prices	331
9.2	Strategic Trading with Long-Lived Information	339
9.3	Market Manipulation and Price Discovery	347
9.4	Strategic Trading with Short-Lived Information	355
9.5	Strategic Hedging	358
9.6	Summary	360
9.7	Appendix	361
9.8	Exercises	362
	References	365
10	Technical Appendix	369
10.1	Information Structures and Bayesian Inference	369
10.2	Normal Distributions and Affine Information Structure	375
10.3	Convergence Concepts and Results	383
10.4	Games and Bayesian Equilibrium	390
	References	398
