WORLD BANK STUDY

Carbon Footprints and Food Systems

*Do Current Accounting Methodologies
Disadvantage Developing Countries?*

Paul Brenton

Gareth Edwards-Jones

Michael Friis Jensen

THE WORLD BANK
Washington, D.C.

Contents

Acknowledgments	v
About the Authors	vi
Abbreviations	vii
Executive Summary	viii
Chapter 1. Introduction	1
Background to the Study.....	1
Objectives.....	1
Approach	2
Structure of Report.....	2
Chapter 2. Description of Ongoing Carbon Footprinting Initiatives Around the Globe	3
Summary.....	3
Current Carbon Labeling Methods and Schemes.....	3
Conclusion.....	14
Chapter 3. Availability of Data Relevant to Developing Countries	20
Summary.....	20
Introduction.....	20
IPCC Emission Factors.....	20
Other Emissions Data	22
Conclusions	28
Chapter 4. Case Study: Carbon Footprints of Tropical Food Products Calculated According to PAS 2050	30
Summary.....	30
Introduction	30
Methods	30
Results	34
Discussion.....	37
Conclusion	42
Chapter 5. Subjectivity, Uncertainty, and Impact of Methodology on Final Results	43
Summary.....	43
Introduction.....	43
The Impact of Data Choice.....	44
The Impact of Land Use Change.....	45
The Impact of Including or Excluding Key Variables in the Carbon Footprint	49

The reality of Data Collection.....	58
Conclusions.....	59
Chapter 6. Conclusions and Recommendations for Development-Friendly Carbon Footprinting Schemes	61
Summary.....	61
Introduction.....	61
The Situation in Developing Countries.....	62
Recommendations for Development-Friendly Carbon Footprinting	64
References.....	69
