José Pérez Ríos

Design and Diagnosis for Sustainable Organizations

The Viable System Method

Springer

Contents

1 Systems Thinking, Organisational Cybernetics and the Viable System Model 1
1.1 Introduction 1
1.1.1 The Systemic Approach 4
1.2 What Is Organisational Cybernetics? 5
1.2.1 Variety 6
1.2.2 Ashby's Law (Law of Requisite Variety) 7
1.2.3 Vertical Unfolding of Complexity 8
1.2.4 Attenuators and Amplifiers 9
1.2.5 The Conant-Ashby Theorem 12
1.2.6 Viability 12
1.2.7 Intrinsic Control 13
1.2.8 Information in Real Time 14
1.2.9 Redundancy of Potential Command 14
1.2.10 Genesis of Organizational Cybernetics and the Viable System Model 15
1.3 The Viable System Model (VSM) 21
1.3.1 System in Focus 22
1.3.2 Recursive Nature of the VSM 48
1.3.3 Information Requirements and Communication Channels 49

2 Diagnosis and Design of Organisations 65
2.1 Recognition of Identity 66
2.1.1 Present and Future Environment 67
2.2 Vertical Dimension: Criteria and Recursion Levels – Complexity Unfolding 70
2.2.1 Criteria and Recursion Levels 71
2.2.2 Recursion Levels-Critical Factors Matrix 78
2.2.3 Structural Pathologies 80

2.3 Horizontal Dimension: Choosing the System-in-Focus: The Complete System and Its Functions 84
2.3.1 Management Metasystem (System 5, System 4 and System 3) 87
2.3.2 System (Organisation/Operations: System 3, System 3*, System 2, System 1) 101
2.3.3 System 1: The Operations Units 119
2.3.4 Horizontal Dimension of System 1 120
2.3.5 Vertical Dimension of System 1 122
2.4 Coherence Among the Different Recursion Levels 135

3 Pathologies of Organisations 141
3.1 Structural Pathologies 142
3.1.1 Non-Existence of Vertical Unfolding 142
3.1.2 Lack of Recursion Levels (First Level) 142
3.1.3 Lack of Recursion Levels (Middle Levels) 144
3.1.4 Entangled Vertical Unfolding. Various Interrelated Memberships 145
3.2 Functional Pathologies (VSM) 146
3.2.1 Pathologies Related with System 5. Identity Not Defined or Ill Defined. "I Don't Know Who I am" 146
3.2.2 Pathologies Related with System 4 150
3.2.3 Pathologies Associated with System 3 152
3.2.4 Pathologies Associated with System 3* 158
3.2.5 Pathologies Associated with System 2 159
3.2.6 Pathologies Associated with System 1 162
3.2.7 Pathologies Associated with the Complete System 162
3.3 Pathologies Associated with Information Systems and Communication Channels 166
3.3.1 Lack of Information Systems 166
3.3.2 Fragmentation of Information Systems 167
3.3.3 Lack of Key Communication Channels 168
3.3.4 Lack of or Insufficient Algedonic Channels 168
3.3.5 Communication Channels Which Are Incomplete or of Inadequate Capacity 169
3.4 Final Thoughts on the Design and Diagnosis of Organisations by Means of the VSM 169

4 The Software for Applying the VSM: VSMod® 171
4.1 Introduction 171
4.2 A Brief History of VSMod® 172
4.3 Main Characteristics of VSMod® (v.1.3) 173
4.4 Description of VSMod® 175
4.4.1 Creation of a New Study 175
4.4.2 Creation of the General Structure 176

4.4.3 Navigating Through the Structure 179
4.4.4 Graphic Representation of the VSM 182
4.4.5 Using the VSM in Conjunction with Other Methodologies or Tools 196
4.5 Guidelines for Use and Future Developments 200

5 Team Syntegrity 201
5.1 Introduction 201
5.2 Conceptual Bases 203
5.3 Description of the Process 205
5.3.1 Goals 205
5.3.2 Phases 205
5.4 Results of the Process 212
5.5 Complementary Forms and Uses 213
5.6 Organisation and Information and Communication Technologies 214
5.7 Final Thoughts on TS 215

6 Looking to the Future 217
