

# A comparative analysis of taxes and CO2 emissions from passenger cars in the Nordic countries

*Henrik Duer, Camilla Rosenhagen, Pernille Øvre Ritnagel*

# Content

Preface.....	7
Summary .....	9
1. Introduction .....	15
2. Problem, method and data.....	17
2.1 Data and data comparison .....	18
3. Framework for car transport in the Nordic countries .....	21
3.1 Car ownership .....	21
3.2 Car choice .....	22
3.3 Car fleet tendencies .....	23
3.4 Environmental alternatives.....	23
3.5 Traffic volume.....	24
3.6 Decline in transport volume .....	25
3.7 Decline in CO2 emissions.....	25
4. Setting up hypothesis.....	27
4.1 Analytical limitations.....	29
4.2 Five hypotheses.....	31
5. Discussion of the hypotheses .....	33
5.1 Hypothesis 1, registration tax and annual circulation tax .....	33
5.2 Hypothesis 2, company cars.....	38
5.3 Hypothesis 3, packages.....	45
5.4 Hypothesis 4, transparency.....	48
5.5 Hypothesis 5, differentiated car tax according to CO <sub>2</sub> emissions.....	56
6. Significance of consumer car choices .....	61
6.1 Shift from petrol to diesel cars in the Nordic countries .....	61
6.2 Examples of trends in choice of cars in the Nordic countries .....	63
7. Conclusions and findings.....	71
References .....	74
Summary in Danish.....	75
Appendix 1 .....	81
Appendix 2 .....	89
Appendix 3 .....	91
