<b>Overview</b>	<b>1</b>
Introduction	1
Red to Gray: A Unique Demographic Transition	4
Red Light to Green Light: Growing Older Does Not Have to Mean Growing Slower	13
Red Ink to Black Ink: Waging Sensible Policies Can Ease Aging's Spending Impact	21
Completing and Building on the Transitions: The Different Paths Ahead	39
Notes	43
 <b>1. The Demographic Transition in Eastern Europe and the Former Soviet Union</b>	 <b>45</b>
Introduction	45
The Global Demographic Transition	46
The Demographic Transition in Eastern Europe and the Former Soviet Union, 1950–2000	49

Demographic Projections to 2025	55
Population Change and Dependency Rates	65
Two Distinct Demographic Profiles: Old Countries and Young Countries	68
Conclusion	70
Notes	72
 <b>2. Demographic Change and Labor Markets</b>	 <b>73</b>
Introduction	73
Labor Force Projections	74
Implications of an Aging Labor Force for Labor Market Outcomes	86
Aging and Labor Productivity	95
Policy Implications	102
Annex 2.A: ILO Labor Force Projection Methodologies	105
Annex 2.B: Labor Force Participation Projections, 2005–20	107
Annex 2.C: Changes in Working-Age Population	110
Annex 2.D: Participation Rates in Countries of the Region	111
Notes	114
 <b>3. Aging, Savings, and Financial Markets</b>	 <b>117</b>
Introduction	117
Aging and Saving Behavior	118
Aging and Financial Markets	131
Policy Implications	144
Annex 3.A: Gross Domestic Savings in Eastern European and Former Soviet Countries	146
Annex 3.B: Selected Financial Sector Indicators	147
Notes	149
 <b>4. Aging and Pension Expenditures</b>	 <b>151</b>
Introduction	151
Current Pension Systems in Countries of the Region	152
Projected Impact of Aging on Pension Spending	157
Prospects for Further Parametric Reform	163
Reform Options	166
Notes	175

<b>5. Aging, Long-Term Care, and Public Expenditures</b>	<b>177</b>
Introduction	177
Aging and Health Expenditures	179
Projections of Public Expenditures on Health	182
Long-Term Care	191
Policy Implications	199
Annex 5.A: Legislation on Long-Term Care in Europe	207
Annex 5.B: Gross Domestic Product and Public Expenditures on Health	207
Annex 5.C: Elderly Dependent Population	207
Annex 5.D: Sensitivity of Projection Results to Data Assumptions	210
Notes	216
 <b>6. Aging and Education</b>	 <b>217</b>
Introduction	217
How Education Systems Have Changed Since Transition	220
Impact of Projected Demographic Changes on Enrollments	234
Improved Productivity through Better Education Systems	242
Policy Implications	248
Annex 6.A: Aging and Education: Data Tables	251
Notes	259
 <i>References</i>	 263

## Boxes

0.1 Demographic Projections	6
0.2 Pronatalist Policies in Europe	9
1.1 Key Definitions in Demography	47
1.2 Fertility Declines and Improvement in Longevity in Selected Countries, 1950–2000	50
1.3 Demographic Projections	56
2.1 How Does Productivity Change with Age for Different Tasks?	97
2.2 What Do Wage Trends Tell Us about How Productivity Changes with Age?	98
2.3 Computing Returns to Education	101

3.1	Definitions of Saving Terms	120
3.2	When Can Aging Lead to Greater Savings?	121
3.3	What Role Does Cross-Border Capital Mobility Have in Financial Markets?	132
3.4	Key Pension Fund Concepts	137
3.5	Aging and Asset Meltdown	142
4.1	Glossary of Pension Terms	153
6.1	How Are Education Systems Implicated in the Process of Demographic Change?	219
6.2	Reforms Needed in Education Systems	227
6.3	Fundamental Problems with Current Financing Formulas	230

## Figures

O.1	The Region's Different Mixes of Demographic and Economic Transition	4
O.2	Most Countries in the Region Will Have Significant Population Decreases Between 2000 and 2025	7
O.3	The Proportion of Population Aged 65+ Will be Much Higher by 2025	7
O.4	Countries Face Different Mixes of Demographic and Economic Transition	13
O.5	In the Region, Labor Productivity Has Had a Stronger Impact on Growth Than Aging (1998–2005)	14
O.6	Financial Markets in Even the More Developed Economies of the Region are Shallower Than Those in Other OECD Countries	21
O.7	Pension Spending Would Rise Significantly Because of the Aging Effect, But Can Be Moderated by Reforms . . .	23
O.8	. . . Indeed, in Some Countries, Pension Reforms Already Undertaken Will Moderate the Impact of Aging	24
O.9	Retirement Ages Are Lower in the Region Than in Higher-Income Countries	26
O.10	Modest Social Pensions Would Generally be Affordable	29
O.11	Public Health Care Costs Are Likely to Rise Only Slightly in Most Aging Countries in the Region by 2020	31
O.12	School-Age Populations Will Shrink in All Countries Except Tajikistan . . .	35

0.13 . . . But Improved Coverage Will Lead to Fast Growth in Secondary and Higher Enrollments in Many Countries	37
1.1 Global Total Fertility Rates, 1950–2050	48
1.2 Global Life Expectancy, 1950–2050	49
1.3 Total Fertility Rates in Eastern Europe and the Former Soviet Union, 1950–2000	51
1.4 Male Life Expectancy at Birth in Eastern Europe and the Former Soviet Union, 1950–2000	52
1.5 Female Life Expectancy at Birth in Eastern Europe and the Former Soviet Union, 1950–2000	52
1.6 Absolute and Relative Change in Population Size in Selected European and Former Soviet Countries, 1950–2000	54
1.7 Proportion of Population 65 Years and Older in Eastern Europe and the Former Soviet Union, 1950–2000	54
1.8 Median Age in Eastern Europe and the Former Soviet Union, 1950–2000	55
1.9 Projected Fertility Rates in Selected Eastern European and Former Soviet Countries, 2000–25	57
1.10 Projected Trends in Life Expectancy at Birth for Males in Eastern Europe and the Former Soviet Union, 2000–25	59
1.11 Projected Trends in Life Expectancy at Birth for Females in Eastern Europe and the Former Soviet Union, 2000–25	59
1.12 Population Growth Rates in Selected Eastern European and Former Soviet Countries, 2000–25	60
1.13 Projected Change in Population Size in Eastern Europe and the Former Soviet Union, 2000–25	61
1.14 Projected Change in the Population Share 65 Years and Older in Eastern Europe and the Former Soviet Union, 2000–25	62
1.15 Projected Change in the Population Share 0–14 Years in Eastern Europe and the Former Soviet Union, 2000–25	63
1.16 Projected Change in the Population Share 15–64 Years in Eastern Europe and the Former Soviet Union, 2000–25	64

1.17	Projected Increases in Median Ages in Eastern Europe and the Former Soviet Union, 2000–25	65
1.18	Child Dependency Rates in Eastern Europe and the Former Soviet Union, 2000–25	66
1.19	Elderly Dependency Rates in Eastern Europe and the Former Soviet Union, 2000–25	67
1.20	Total Dependency Rates in Eastern Europe and the Former Soviet Union, 2000–25	67
1.21	Proportion of the Projected Population 65 Years and Older in 2025 and Percentage of Change in Population Size between 2000 and 2025 in Eastern Europe and the Former Soviet Union	69
1.22	Population Age Structure of Bulgaria, 2000 and 2025	70
1.23	Population Age Structure of Tajikistan, 2000 and 2025	71
2.1	Relative and Absolute Changes in Working-Age Population, 15–64 Years, Eastern European and Former Soviet Countries, 2005–25	76
2.2	Immigration and Emigration Flows for Eastern European and Former Soviet Subregions, Western Europe, North America, and Israel, 2000–03	83
2.3	Change in Male and Female Labor Force Participation Rates for Older-Age Categories, Eastern European and Former Soviet Countries, 1980–2003	88
2.4	Participation Rates of Labor Force 50 to 64 Years by Educational Attainment in Selected Eastern European and Former Soviet Countries, Various Years	89
2.5	Marginal Effect of Age on Labor Force Participation of Females in Selected Eastern European and Former Soviet Countries, Various Years	89
2.6	Marginal Effect of Age on Labor Force Participation of Males in Selected Eastern European and Former Soviet Countries, Various Years	90
2.7	Marginal Effect of Age on Unemployment of Females in Selected Eastern European and Former Soviet Countries, Various Years	91

2.8	Marginal Effect of Age on Unemployment of Males in Selected Eastern European and Former Soviet Countries, Various Years	92
2.9	Informal Share of Wage Employment in Selected Eastern European and Former Soviet Countries, Various Years	93
2.10	Marginal Effect of Age on Weekly Hours of Employment for Females in Selected Eastern European and Former Soviet Countries, Various Years	93
2.11	Marginal Effect of Age on Weekly Hours of Employment for Males in Selected Eastern European and Former Soviet Countries, Various Years	94
2.12	Marginal Effect of Age on Wages for Females in Selected Eastern European and Former Soviet Countries, Various Years	94
2.13	Marginal Effect of Age on Wages for Males in Selected Eastern European and Former Soviet Countries, Various Years	95
2.14	Returns to Years of Education for Older and Younger Cohorts in Selected Countries	102
2.A.1	ILO Estimates and Projections of the Economically Active Population, 1980–2020	106
2.B.1	Labor Force Participation Projections under Different Scenarios, Kyrgyz Republic, 2005–20	107
2.B.2	Labor Force Participation Projections under Different Scenarios, Turkey, 2005–20	108
2.B.3	Labor Force Participation Projections under Different Scenarios, Bulgaria, 2005–20	108
2.B.4	Labor Force Participation Projections under Different Scenarios, Czech Republic, 2005–20	109
2.B.5	Labor Force Participation Projections under Different Scenarios, Poland, 2005–20	109
2.B.6	Labor Force Participation Projections under Different Scenarios, Russian, Federation, 2005–20	110
3.1	Conceptual View of the Possible Channels from Aging to Saving and from Saving to Investment and Growth	119
3.2	Age-Saving Profile Implied by the Life-Cycle Hypothesis	120
