List of Acronyms xv

Executive Summary xvii

- 1 Introduction: Objectives and Scope 1**
Conceptual Framework 2
Key Policy Themes and Strategic Directions 4
Urban Water Market Segments 7
Report Organization 8
Data Sources 9
- 2 Sector Achievement and Performance 11**
Sector Achievements 11
Water Supply Utility Performance 16
Wastewater Utility Performance 19
Chapter Summary 22
- 3 Sector Challenges 25**
Responding to Rapid Urbanization 26
Dealing with Urban Diversity 29
Confronting Water Scarcity and Degradation 31
Meeting Infrastructure Investment Needs 33
Improving Utility Financial Sustainability 34
Chapter Summary 36

4	2020 Sector Vision and Path Forward	37
	Sector Vision in 2020	37
	Benefits of Achieving the Sector Vision	40
	Strategic Directions and the Way Forward	42
5	Goal Based Sector Governance	45
	Overview of Sector Governance Structure	46
	Improving National Policy Coordination	50
	Shifting from Physical Targets to Policy Goals	52
	Strengthening Provincial Government Oversight	53
	Setting Appropriate Water and Wastewater Standards	58
	Summary of Strategic Directions	65
6	Improving Municipal Utility Governance and Structure	69
	Overview of Municipal Sector Structure	70
	Facilitating Cost Recovery	73
	Fostering Efficient Urban Water Utilities	80
	Managing Wastewater as a Network Utility Business	83
	Exploiting Opportunities for Service Aggregation	88
	Summary of Strategic Directions	90
7	Moving Up the Utility Financial Sustainability Ladder	93
	Achieving Utility Cost Recovery	94
	Accessing Domestic Credit Markets	104
	Improving Concessionary Finance Programs	110
	Summary of Strategic Directions	115
8	Using the Private Sector to Help Improve Municipal Utility Performance	117
	Private Participation Trends in China	117
	Engaging with the Private Sector as Part of the Reform Process	123
	BOT Treatment Plants as Part of a Network Business	124
	Utilizing Non-Investment Private Participation Arrangements	127
	Summary of Strategic Directions	130
9	Improving Capital Planning to Reduce Costs	133
	Capital Planning for Water Utilities	133
	Using Modern Water Supply Planning Processes	135
	Asset Management Planning: Optimizing Network Investments	137
	Strategic Planning and Management of Drainage Networks	140
	Integrating Industrial Pollution Control into a Wastewater Management System	143
	Managing Sludge as an Environmental and Financial Priority	146
	Summary of Strategic Directions	148

10 Strategic Action Plan 151

APPENDIXES

A Overview of World Bank's Urban Water Program in China 155**B Summary of Water and Wastewater Standards 157****C Technical Notes 163****Glossary 171****References 175****List of Boxes**

- 2.1 International Performance Comparisons 12
- 2.2 Wastewater Technical Terms 19
- 2.3 MOC's Analysis of Wastewater Treatment Operational Performance 20
- 2.4 Overview of Tianjin Drainage System in 2005 21
- 2.5 Brazil National Sanitation Information System (SNIS) 23
- 3.1 China's Administrative System and Definition of Cities and Towns 26
- 3.2 China's Water Resources 32
- 3.3 Financial Sustainability Ladder 35
- 4.1 South Korea: Wastewater Treatment Coverage vs. Economic Development 38
- 4.2 Ecosystem Restoration in the Chesapeake Bay, United States 41
- 5.1 Agencies Involved in the Urban Water Sector 47
- 5.2 Role of National Government Agencies in Colombia 54
- 5.3 Water Utility Performance Benchmarking 57
- 5.4 Application of Discharge Standards in China 59
- 5.5 Full Cost Wastewater Pricing for Different Treatment Levels in U.S. and Europe 60
- 5.6 World Health Organization Framework for Safe Drinking Water 64
- 5.7 Grading the Safety of Water Supply Systems in New Zealand 66
- 6.1 General Functions of Key Municipal Agencies 71
- 6.2 Municipal Governance Models in California 78
- 6.3 Singapore Public Utilities Board 80
- 6.4 Challenges Faced by Water Supply and Wastewater Companies in
Chongqing, China 82
- 6.5 Drainage Collection Systems in U.S. and U.K. 85
