95/126045

The Economics of Climate Change Mitigation

POLICIES AND OPTIONS FOR GLOBAL ACTION BEYOND 2012

Table of Contents

Acronyms and abbreviations
Chapter 1. Greenhouse Gas Emissions and the Impact of Climate Change
Introduction 26 1.1. Past emission trends 27 1.2. Projected emission trends 30 1.3. The consequences of climate change 34 1.4. Risks and uncertainties 39 1.5. Scenarios for stabilising GHG concentration 41 Chapter 2. The Cost-Effectiveness of Climate Change Mitigation Policy Instruments 53 Introduction 54 2.1. A simple framework for thinking about climate mitigation policy instruments 55 2.2. Instruments to mitigate climate change 58 2.3. Interactions across policy instruments 74 Chapter 3. Mitigating Climate Change in the Context of Incomplete Carbon Pricing
1.1. Past emission trends271.2. Projected emission trends301.3. The consequences of climate change341.4. Risks and uncertainties391.5. Scenarios for stabilising GHG concentration41Chapter 2. The Cost-Effectiveness of Climate Change Mitigation Policy Instruments53Introduction542.1. A simple framework for thinking about climate mitigation policy instruments552.2. Instruments to mitigate climate change582.3. Interactions across policy instruments74Chapter 3. Mitigating Climate Change in the Context of Incomplete Carbon Pricing Coverage: Issues and Policy Options83Introduction85
1.2. Projected emission trends 30 1.3. The consequences of climate change 34 1.4. Risks and uncertainties 39 1.5. Scenarios for stabilising GHG concentration 41 Chapter 2. The Cost-Effectiveness of Climate Change Mitigation Policy Instruments 53 Introduction 54 2.1. A simple framework for thinking about climate mitigation policy instruments 55 2.2. Instruments to mitigate climate change 58 2.3. Interactions across policy instruments 74 Chapter 3. Mitigating Climate Change in the Context of Incomplete Carbon Pricing Coverage: Issues and Policy Options 83 Introduction 85
1.2. Projected emission trends 30 1.3. The consequences of climate change 34 1.4. Risks and uncertainties 39 1.5. Scenarios for stabilising GHG concentration 41 Chapter 2. The Cost-Effectiveness of Climate Change Mitigation Policy Instruments 53 Introduction 54 2.1. A simple framework for thinking about climate mitigation policy instruments 55 2.2. Instruments to mitigate climate change 58 2.3. Interactions across policy instruments 74 Chapter 3. Mitigating Climate Change in the Context of Incomplete Carbon Pricing Coverage: Issues and Policy Options 83 Introduction 85
1.3. The consequences of climate change
1.4. Risks and uncertainties391.5. Scenarios for stabilising GHG concentration41Chapter 2. The Cost-Effectiveness of Climate Change Mitigation Policy Instruments53Introduction542.1. A simple framework for thinking about climate mitigation policy instruments552.2. Instruments to mitigate climate change582.3. Interactions across policy instruments74Chapter 3. Mitigating Climate Change in the Context of Incomplete Carbon Pricing Coverage: Issues and Policy Options83Introduction85
1.5. Scenarios for stabilising GHG concentration
Introduction
2.1. A simple framework for thinking about climate mitigation policy instruments
2.2. Instruments to mitigate climate change
2.2. Instruments to mitigate climate change
2.3. Interactions across policy instruments
Coverage: Issues and Policy Options 83 Introduction 85
Coverage: Issues and Policy Options 83 Introduction 85
J.1. Impreations of theomore coverage for the costs and effectiveness of fillingation
action
3.2. Implications for carbon leakage and competitiveness
3.3. Pros and cons of policy alternatives to address leakage and competitiveness issues88
3.4. Incorporating a deforestation and forest degradation into an international mitigation action
plan90
Chapter 4. Towards Global Carbon Pricing
Introduction
4.1. Removing environmentally-harmful energy subsidies
4.2. The direct linking of emission trading schemes
4.3. The role of emission crediting mechanisms and related challenges
4.4. The potential and limitations of sectoral approaches
4.5. Regulatory issues and the role of financial markets

Chapter 5.	Technology and R&D Policies157		
	Recent spending trends in energy-related R&D		
Chapter 6.	Regional Incentives for Global Action179		
Introd 6.1. 6.2. 6.3.	Broad-based international mitigation and incentives for action		
Chapter 7.	Chapter 7. Building Political Support for Global Action		
	A review of the instruments currently in use
