Greening the Wind

Environmental and Social Considerations for Wind Power Development

*George C. Ledec
Kennan W. Rapp
Roberto G. Aiello*

Contents

Foreword	v
Acknowledgements	vii
Acronyms and Abbreviations	viii
Executive Summary	xi
1. Objectives and Scope of this Report	1
2. Overview of Wind Power Development	3
3. Making Wind Power Safer for Biodiversity	13
Biodiversity Impacts of Wind Power	13
Biodiversity-Friendly Practices for Wind Power Projects	29
4. Addressing the Social Impacts of Wind Power	57
Typical Social Impacts in Wind Power Development	57
Managing the Social Impacts of Wind Power	74
5. Final Considerations	93
6. Appendixes	101
Appendix A. Case Study: Mexico La Venta II Wind Power Project.....	103
Appendix B. Case Study: Colombia Jepirachi Wind Power Project.....	107
Appendix C. Case Study: Uruguay Wind Farm Project.....	113
Appendix D. Correction Factors for Real versus Observed Bird and Bat Mortality	119
References	123
Color Photo Insert	143
Boxes	
Box 3.1: Reasons to be Concerned about Biodiversity	14
Box 3.2: Raptor Mortality at Altamont Pass, California	18
Box 3.3: White-tailed Eagle Population Collapse at Smola, Norway	20
Box 3.4: Hypotheses for Bat Attraction to Wind Turbines	23
Box 3.5: Alternative Turbine Designs	35
Box 4.1: An Example of Land-Related Conflicts in Energy Development in China.....	71
Box 4.2: Steps to Effective Stakeholder Participation	79
Box 4.3: Wind Power Cooperatives in Denmark: An Applicable Model for Developing Countries?	89
Box 4.4: Creating Incentives for Community Wind Development in Minnesota, USA	90

Figures

Figure 2.1: Global Wind Power Installed Capacity 4
Figure 2.2: Installed Wind Capacity (MW) in Top 10 Countries, 2009-2010 4
Figure 2.3: Top 5 Countries in Offshore Wind (MW) 7
Figure 2.4: Typical Structural Components of a Wind Turbine 10
Figure 2.5: Typical Elements of an Onshore Wind Farm 11
Figure 4.1: Wind Turbine Placement with Regard to Sound Impacts 144

Tables

Table 2.1: No Free Lunch—Environmental and Social Impacts of Power
Generation Technologies 8
Table 2.2: Wind Power Projects Financed by the World Bank Group 9
Table 3.1: Effects of Increased Turbine Cut-in Speed on Bat Mortality and Power
Generation 49
Table 4.1: Employment Generated by Development Projects in Three Sectors in
Latin American Countries and the United States 63
Table 4.2: Comparison of Different Revenue-sharing Arrangements 84
Table 5.1: Environmental and Social Impacts of Wind Power Projects and
Corresponding Mitigation or Enhancement Options 95
