List of Contributors xv

Part I Introduction 1

1 Overview 3
Reza Zanjirani Farahani, Shabnam Rezapour, and Laleh Kardar
1.1 History 3
1.2 Definition of Logistics 3
1.2.1 Why Is Logistics Important? 4
1.3 Evolution of Logistics Over Time 4
1.4 Other Logistical Books 5
1.5 The Focus of This Book 5
1.6 Organization 6
1.7 Audiences 8

2 Physical Flows 11
Hannan Sadjady
2.1 The Transportation System 13
2.1.1 Transport Modes and Their Characteristics 13
2.1.2 Other Transport Options 21
2.2 Physical Nature of the Product 24
2.2.1 Volume-to-Weight Ratio 24
2.2.2 Value-to-Weight Ratio 24
2.3 Channels of Distribution 26
2.3.1 Distribution Channels and Their Types 26
2.3.2 Physical Distribution Channel 27
2.4 Warehousing and Storage 30
2.4.1 Warehousing Functions 31
2.4.2 Packaging and Unit Loads 33
2.4.3 Storage and Handling Systems 34

Part II Strategic Issues 41

3 Logistics Strategic Decisions 43
Maryam SteadieSeifi
3.1 Strategy 43
3.2 Strategic Planning 44

3.3 Logistics 45
3.3.1 Logistics Differences to Supply Chain 45
3.4 Logistics Decisions 46
3.4.1 Operational Decisions 46
3.4.2 Tactical Decisions 46
3.4.3 Strategic Decisions 47
3.5 Logistics Planning 47
3.6 Logistics Strategic Decisions 48
3.6.1 Customer Service 48
3.6.2 Logistics Network Design 49
3.6.3 Outsourcing versus Vertical Integration 50
3.7 Tools of Strategic Decision Making 51
3.8 Logistics Strategic Flexibility 52
3.9 Summary 52

4 Logistics Philosophies 55
Zahra Rouhollahi
4.1 Lean Logistics 55
4.1.1 Japanese Philosophy 55
4.1.2 Just-in-Time Philosophy 56
4.1.3 Lean Principles 58
4.1.4 Lean Warehousing: Cross Docking 59
4.2 Agile Logistics 62
4.2.1 Agile versus Lean 63
4.2.2 Quick Response 64
4.2.3 Vendor-Managed Inventory 66

5 Logistics Parties 71
Seyed-Alireza Seyed-Alagheband
5.1 Third-Party Logistics: An Overview 72
5.1.1 Why 3PLs? 72
5.1.2 Definition 73
5.1.3 Emergence of 3PLs 74
5.1.4 Activities of 3PLs 74
5.1.5 Advantages and Disadvantages of 3PL 75
5.1.6 Types of 3PLs 76
5.1.7 2009 3PLs: Results and Findings of the Fourteenth Annual Study 77
5.2 New Generations of Logistics Parties 78
5.2.1 Fourth-Party Logistics 78
5.2.2 Fifth-Party Logistics 80
5.2.3 Future Trends 81
5.2.4 Logistics Vendors 81
5.3 3PLs: Theories and Conceptualizations 83
5.3.1 Outsourcing Decision 83

5.3.2 Selecting the Right 3PL 84
5.3.3 Purchasing 3PL Services 85
5.3.4 Strategic Behavior of 3PLs 86
5.3.5 Theoretical Models 87
5.3.6 A Framework for the Development of an Effective 3PL 88
5.4 Concluding Remarks 90

6 Logistics Future Trends 93
Amir Zakery
6.1 Main Influencing Issues 93
6.1.1 Globalization 93
6.1.2 Information Technology 95
6.1.3 New Technologies 96
6.2 Future Trends in Some Logistics Sectors 97
6.2.1 Future Trends for Inventory Management 98
6.2.2 Global Transportation Issues 99
6.2.3 Future Trends for Warehousing 100
6.3 Future Trends in Technical Reports 101
6.3.1 Future Trends of Logistics in the United Kingdom 101
6.3.2 Thinner Margins in the Industry: A Chance to Improve for Shippers 102
6.3.3 Third-Party Logistics Maturing Quickly 103
6.3.4 Strategic Shift Toward Redesigning Logistics Networks 103
6.3.5 Need for Broader Range of Logistics Services 103
6.3.6 Five Influencing Factors in the Future of European Logistics 103
6.3.7 Five Trends Supporting Logistics Success in China 104

Part III Tactical and Operational Issues 107

7 Transportation 109
Zohreh Khooban
7.1 Basic Aspects in Transportation Systems 109
7.1.1 The Role of Transportation in Logistics 109
7.1.2 Transportation Participants 110
7.1.3 Delivery Frequency System 111
7.1.4 Long-Haul Consolidated Freight Transportation 113
7.2 Classification of Transportation Problems 114
7.2.1 Planning Levels 115
7.2.2 Variants of the Standard of TPs 116
7.2.3 Carrier Decision-Making Problems 119
7.2.4 Shipper Decision-Making Problems 122
7.3 Case Study: An Application of Cost Analyses for Different Transportation Modes in Turkey 124

8 The Vehicle-Routing Problem 127
Farzaneh Daneshzand
8.1 Definitions and Applications 127
8.2 Basic VRP Variants 127
8.2.1 The Capacitated VRP 128
8.2.2 Distance-Constrained and Capacitated VRP 130
8.2.3 VRP with Time Windows 131
8.2.4 VRP with Backhauls 132
8.2.5 VRP with Pickup and Delivery 134
8.3 Solution Techniques for Basic VRP Variants 136
8.4 Other Variants of VRP 137
8.4.1 Open VRP 137
8.4.2 Multidepot VRP 138
8.4.3 Mix Fleet VRP 138
8.4.4 Split-Delivery VRP 139
8.4.5 Periodic VRP 141
8.4.6 Stochastic VRP 142
8.4.7 Fuzzy VRP 143
8.5 Case Studies 143
8.5.1 The Product Distribution of a Dairy and Construction Company 143
8.5.2 The Collection of Urban Recyclable Waste 145

9 Packaging and Material Handling 155
Mahsa Parvini
9.1 Material Handling 155
9.1.1 History 155
9.1.2 Definition 155
9.1.3 MH Principles 157
9.1.4 MH Equipment 158
9.1.5 Unit-Load Design 160
9.1.6 Designing MH Systems 161
9.1.7 MH Costs 164
9.1.8 MH System Models 166
9.2 Packaging 169
9.2.1 History 169
9.2.2 Definition 169
9.2.3 Functions of Packaging 169
9.2.4 Packaging Operations 171
9.2.5 Packaging Equipment 171
9.2.6 Labeling 172
9.2.7 Protection Packaging 174
9.2.8 Packaging for Distribution Efficiency 175
9.2.9 Packaging Costs 176
9.2.10 Packaging Models 177
9.3 Case Study 177

10 Storage, Warehousing, and Inventory Management **181**
Maryam Abbasi
10.1 The Reasons for Storage Inventory **181**
10.2 The Role of Distribution Centers and Warehouses in Logistics **181**
10.3 Warehouse Location **182**
10.4 Warehouse Design **183**
10.4.1 Size of Warehouse **183**
10.4.2 Storage Policies **183**
10.5 Types of Warehouses **184**
10.6 Warehouse Components **185**
10.7 Warehouse Tasks and Activities **186**
10.7.1 Material Flow in Warehouse **186**
10.7.2 Order Picking **186**
10.8 Inventory Management **188**
10.8.1 Types of Inventory **188**
10.8.2 Costs of Inventory **188**
10.8.3 Inventory Control **189**
10.9 Virtual Warehouses **195**

11 Customer Service **199**
Samira Fallah
11.1 Customer-Service Definition **199**
11.1.1 Customer Service as an Organizational Activity **199**
11.1.2 Customer Service as a Process **199**
11.1.3 Customer Service from the Customer's Side **199**
11.1.4 How Experts Define Customer Service? **200**
11.1.5 Defining Customer Service in Logistics Context **200**
11.2 What Is Behind the Growing Importance of Customer Service? **200**
11.2.1 Customer Service: The Intangible Part of a Product **200**
11.2.2 Costs of Attracting New Customers **201**
11.2.3 Customer Service, Customer Satisfaction, and Loyalty **201**
11.2.4 Customers as a Means of Marketing **201**
11.2.5 Customer Service and Organization Excellence **202**
11.2.6 Customer Service and Staff Job Satisfaction **202**
11.3 Customer-Service Elements **202**
11.3.1 Pretransaction Elements **203**
11.3.2 Transaction Elements **203**
11.3.3 Post transaction Elements **204**
11.4 Order-Cycle Time **204**
11.4.1 Order Preparation and Transmittal **205**
11.4.2 Order Processing **205**
11.4.3 Order Picking and Packing **206**
11.4.4 Order Transportation and Delivery **206**
11.5 Developing a Policy for Customer Service **206**
11.5.1 Important Points **206**

11.5.2 Steps for Developing Customer-Service Policy 207
11.5.3 A Case Study on Customer Segmentation Based on Customer-Service Elements 209
11.5.4 Setting Customer-Service Level 212
11.6 Measuring Customer-Service Performance 215

Part IV Special Areas and Philosophies 219

12 Logistics System: Information and Communication Technology 221
Shokoofeh Asadi
12.1 The Importance of Information in Logistics 221
12.2 Logistic Information System 222
12.2.1 Information Flow 222
12.2.2 A LISs' Functionality Levels 223
12.2.3 Role of Information in Logistics System Operation and Performance 224
12.2.4 LIS Structure 227
12.2.5 System Modules 230
12.2.6 LIS Characteristics 232
12.3 Logistics Information and Communication Technology 233
12.3.1 Data-Handling Hardware (Data Collection and Data Identification) 234
12.3.2 Positioning 237
12.3.3 Communication, Networks, and Data Exchange 238
12.4 Conclusion 244

13 Reverse Logistics 247
Masoomeh Jamshidi
13.1 The Literature on RL 248
13.1.1 General Summaries and Basic RL Concepts 248
13.1.2 Research on Quantitative Approaches 249
13.1.3 Studies of Logistical Topics 250
13.1.4 Company Profiles 250
13.1.5 RL Applications 251
13.2 Review of Various Aspects of RL 251
13.2.1 Driving Forces Behind RL 251
13.2.2 Reasons for Return 252
13.2.3 Types and Characteristics of Returned Products 252
13.2.4 RL Processes 254
13.2.5 RL Actors 255
13.3 Information Technology for RL 256
13.4 RL and Vehicle Routing 256

13.5 Quantitative Models for RL 257
13.5.1 Reverse Distribution 257
13.5.2 Inventory Control Systems with Return Flows 260
13.5.3 Production Planning with Reuse 263
13.6 Classification of Product Recovery Networks 263

14 Retail Logistics 267
Hamid Afshari and Fatemeh Hajipouran Benam
14.1 Overview 267
14.1.1 Introduction 267
14.1.2 Retail Strategy 268
14.1.3 Goods and Service Retailing 269
14.1.4 Factors That Affect International Retailing 269
14.1.5 Information Flow in a Retail Distribution Channel 270
14.1.6 The World's Top Retailers 271
14.2 Typology 271
14.2.1 Introduction 271
14.2.2 Ownership Institution 272
14.2.3 Store-Based Strategy Mix Institution 273
14.2.4 Nonstore-Based Institution 275
14.2.5 Types of Locations 275
14.3 Techniques 276
14.3.1 Location and Site Evaluation 276
14.3.2 Human Resource Management 282
14.3.3 Pricing in Retailing 283
14.3.4 Customer Satisfaction in Retailing 284
14.3.5 World Retail Congress 284
14.4 Future Trends 284
14.5 Case Study 285
14.5.1 History of Russian Retail Chains 285
14.5.2 Conventional Food Retailing with a Spotlight on Differentiation 286

15 Humanitarian Logistics Planning in Disaster Relief Operations 291
Ehsan Nikbakhsh and Reza Zanjirani Farahani
15.1 Introduction 291
15.2 Disasters 292
15.2.1 Classification of Disasters 292
15.2.2 Effects of Disasters on Nations 294
15.3 Disaster Management System Cycle 296
15.3.1 Mitigation 297
15.3.2 Preparedness 297

15.3.3 Response 299
15.3.4 Recovery 299
15.4 Humanitarian Logistics 299
15.4.1 Humanitarian Logistics Systems Versus Commercial Supply Chains 300
15.4.2 Humanitarian Logistics Chain Structure 301
15.4.3 Required Items and Equipments in Humanitarian Logistics 302
15.5 Humanitarian Logistics Problems 303
15.5.1 Location Models 304
15.5.2 Transportation and Distribution Models 307
15.5.3 Inventory Models 310
15.5.4 Integrated Logistics Models 312
15.6 Coordination of Humanitarian Logistics Systems 315
15.6.1 Supply Chain Coordination 316
15.6.2 Important Factors in Coordinating Humanitarian Logistics Operations 316
15.6.3 Humanitarian Coordination Mechanisms 318
15.7 Performance Measurement of Humanitarian Logistics Systems 319
15.8 Case Studies and Learned Lessons 322
15.8.1 The Yogyakarta Earthquake, 2006 322
15.8.2 Hurricane Katrina, 2005 323
15.8.3 Asian Tsunami, 2004 324
15.9 Conclusion 325

16 Freight-Transportation Externalities 333
Fatemeh Ranaiefar and Amelia Regan
16.1 Introduction 333
16.2 Freight-Transportation Trends and Costs 334
16.3 Over-the-Road Freight-Transportation Externalities 336
16.3.1 Air Pollution 338
16.3.2 Global Climate Change 341
16.3.3 Noise Pollution 342
16.3.4 Congestion 344
16.3.5 Accidents 344
16.3.6 Construction and Maintenance 346
16.4 Policies to Reduce Externalities 346
16.4.1 Urban Freight Strategies 347
16.4.2 Vehicle-Technology Improvements 348
16.4.3 Intelligent Transportation Systems 348
16.4.4 Pricing Strategies 350
16.4.5 Intermodal Transportation 352
16.4.6 Strategies to Reduce Empty Travel 353
16.5 Conclusion 354

17 Robust Optimization of Uncertain Logistics Networks 359
Sara Hosseini and Wout Dullaert
17.1 A Literature Review on RO 360
17.2 Optimization Under Uncertainty 361
17.2.1 Uncertainties in the Logistics Networks 361
17.2.2 Optimization Approaches Under Uncertainties 362
17.2.3 Robust Optimization 362
17.3 RO of Logistics Networks 364
17.3.1 A Variability Formation of RO for the General Logistics Problem 364
17.3.2 A Regret Formation of RO for the Logistic Center Location and Allocation 366
17.3.3 A Min-Max Formation of RO for Road Networks 368
17.4 Challenges of RO 369

18 Integration in Logistics Planning and Optimization 371
Behnam Fahimnia, Reza Molaei, and Mohammad Hassan Ebrahimi
18.1 Logistics Planning and Optimization Problem 371
18.2 Significance of Integrated LP 373
18.2.1 Profitability 373
18.2.2 Quicker Response to Market Changes 373
18.3 Issues in Integrated LP 373
18.4 An Integrated LP Model 374
18.4.1 Key Performance Indicators 375
18.4.2 Assumptions 375
18.4.3 Parameters and Decision Variables 376
18.4.4 Objective Function and Model Constraints 377
18.5 Optimization Tools and Techniques 380
18.5.1 Mathematical Techniques 380
18.5.2 Heuristic Techniques 381
18.5.3 Simulation Modeling 382
18.5.4 Genetic Algorithms 382
18.6 A Case Study 383
18.6.1 Case Problem 383
18.6.2 Optimization Procedure 384
18.6.3 Results Achieved 385

19 Optimization in Natural Gas Network Planning 393
Maryam Hamedi, Reza Zanjirani Farahani, and Gholamreza Esmaeilian
19.1 Introduction 393
19.1.1 Natural Gas Network Modeling 393
19.1.2 Natural Gas Network Introducing 394
19.2 Natural Gas Network Problems 398
19.2.1 Formulating 398

19.2.2 Optimization 399
19.2.3 Model Characteristics 403
19.2.4 Types of Methods 405
19.3 Survey on Application of Optimization 408
19.3.1 Subnetworks 408
19.3.2 Main Problems 410
19.3.3 Mathematical Models Classifications 412
19.4 Case Studies 416
19.4.1 Case 1: Optimization of Planning in the Natural Gas Supply Chain 417
19.4.2 Case 2: Optimization of a Multiobjective Natural Gas Production Planning 417
19.5 Conclusions and Directions for Further Research 418

20 Risk Management in Gas Networks: A Survey 421
Reza Zanjirani Farahani, Mohammad Bakhshayeshi Baygi, and Seyyed Mostafa Mousavi
20.1 Structure of Gas Networks 421
20.2 The Vulnerabilities and Risks of Gas Networks 423
20.2.1 Why Is Risk Investigation Important? 423
20.2.2 What Are the Vulnerabilities and Risks of Gas Networks? 424
20.3 How to Manage Risks in Gas Networks? 430
20.3.1 Valuating Key Asset and Estimating Losses 431
20.3.2 Identifying and Describing Vulnerabilities and Threats 431
20.3.3 Performing Risk Assessments 433
20.3.4 Developing Applicable Risk-Abatement Options 435
20.3.5 Analyzing Options to Select Cost-Effective Ones 436
20.3.6 Implementing Chosen Activities 437

21 Modeling the Energy Freight-Transportation Network 441
Mohsen Rajabi
21.1 Introduction 441
21.1.1 Energy in the World 441
21.1.2 The Importance of Energy Around the World 442
21.1.3 Energy Freight Transportation 444
21.2 Energy Freight-Transportation Network 449
21.2.1 Application of Energy Freight-Transportation Models 449
21.2.2 Energy Freight-Transportation Network 450
21.2.3 Classifications of Energy Freight-Transportation Networks 451
21.2.4 Introducing the Energy Freight-Transportation Network Models 453
21.3 Case Studies 461
21.3.1 Case: A Pricing Mechanism for Determining the Transportation Rates 461
21.4 Conclusions and Directions for Further Research 464
