Summary	1
1 Introduction	19
1.1 Background	19
1.2 Research question and objectives of this study	22
1.3 Agricultural development: A promising way for getting out of poverty?	23
2 Study design and methodology	25
2.1 Analytical framework and indicators of resilience	25
2.2 Empirical methods	33
2.2.1 Research process, data collection and analysis	33
2.2.2 Sampling of case studies	35
3 Agricultural political economy in Zambia	39
3.1 Agriculture and politics	39
3.2 Actors in the agricultural sector	41
3.2.1 Government engagement and influence on actors	42
3.2.2 Donor engagement in the agricultural sector	51
3.3 Current policies and possible improvements	54
3.3.1 Historical review an policy changes over time	54
3.3.2 Regional policies – the example of CAADP	58
3.3.3 The dominance of the mining sector and its influence on agricultural development	60
3.3.4 The Fifth and the Sixth National Development Plan	63
3.3.5 The effects of maize policies on the markets	65

3.3.6	The effects of fertiliser subsidies – from FSP to FISP	68
3.4	Markets and marketing structures	71
3.4.1	Local and domestic markets	71
3.4.2	Regional and overseas export markets	76
3.5	Political interferences in markets, the private sector and how to improve some marketing constraints	78
4	Agricultural systems in Zambia	83
4.1	The ^{new} Zambian agricultural sector	83
4.2	Agro-ecological zones	85
4.3	Farming methods	88
4.3.1	Introduction to principle methods	88
4.3.2	Conventional systems and the bias on maize	90
4.3.3	Conservation agriculture	91
4.3.4	LEISA and organic farming	94
4.4	Farm types and farming systems	100
4.5	Socio-economic groups: Small-scale, emergent and commercial farmers	103
4.6	Contract farming systems and farming blocks	104
4.7	Water and irrigation systems	107
4.8	Social dimensions of agriculture	111
4.8.1	Poverty and food insecurity	111
4.8.2	Gender	113
4.8.3	HIV/Aids	116
5	Impacts of external drivers on Zambian agriculture	118
5.1	Climate change	118
5.1.1	Uncertainties and climatic change	119
5.1.2	Current and future impacts of climate change	120
5.1.3	Improving resilience of agriculture to climate change	126

5.2	Economic shocks	129
5.2.1	Characteristics of economic shocks	129
5.2.2	Impacts of external economic shocks on the agricultural sector	131
5.2.3	Improving resilience of agriculture to economic shocks	140
6	Findings from case studies and recommendations at regional to local levels	144
6.1	Results of case studies	144
6.1.1	North-Western Province	145
6.1.2	Central Province	148
6.1.3	Southern Province	150
6.2	Mainstreaming dimensions	152
6.2.1	Mainstreaming issues and their relation to resilience	152
6.2.2	Access to funding/credits	154
6.2.3	Cooperatives/Farmers organisation	159
6.2.4	Capacity development and extension services	160
6.3	Development and adaptation policies and measures	163
6.3.1	Selection of adaptation policies and measures	163
6.3.2	E-voucher system	166
6.3.3	Warehouse system	174
6.3.4	Oxenisation/Mechanisation	181
6.3.5	Diversification	188
6.3.6	Conservation agriculture	194
6.3.7	Irrigation	204
6.3.8	Other measures to buffer economic shocks and climate change	208
7	Conclusion	215
	Bibliography	221
