Contents

1 Estimating US Monetary Policy Shocks Using a Factor-Augmented Vector Autoregression: An EM algorithm Approach **1**

1.1 Introduction 3
1.2 Model framework: The factor-augmented VAR 9
1.3 Identification and estimation by the EM algorithm 11
1.4 Empirical results 18
1.5 Conclusion 32
A Forecast error variance decomposition 34
B Kalman filter, Kalman smoother and the EM algorithm 35
C Analytical derivatives of the log likelihood function 38

2 Identification of Macroeconomic Factors in Large Panels **59**

2.1 Introduction 61
2.2 Methodology 63
2.3 Empirical Application 69
2.4 Conclusion 83
A Over-identifying loading restrictions 85
B The EM algorithm, the Kalman filter and the Kalman smoother . . . 87

3 A Multifactor Affine Term Structure Model with Macroeconomic Factors from Large Panels **101**

3.1 Introduction 103
3.2 The modeling framework 107

3.3 Estimation and identification 117
3.4 Empirical application 123
3.5 Conclusion 131
A Appendix 133

A Appendices **161**
A.1 Data description 162

Summary **167**

Bibliography **173**
