

**Exploring the effectiveness of local
content requirements in promoting
solar PV manufacturing in India**

Oliver Johnson

1	Introduction	1
2	Opportunities and challenges for localising solar PV manufacturing	2
2.1	Different elements of solar PV manufacturing	2
2.2	Potential benefits of local solar PV manufacturing	4
2.3	Competing in the global solar PV manufacturing industry	6
3	Promoting local manufacturing through local content requirements	9
3.1	The current fashion for local content requirements	9
3.2	International pressure to eliminate local content requirements	11
3.3	Analysing legitimacy and effectiveness of local content requirements	12
4	Local content requirements in India's National Solar Mission	14
4.1	The solar landscape in India	14
4.2	Policy support for solar PV	15
4.3	Taking a global leadership role in solar PV manufacturing	18
4.4	Evaluating the impact of local content requirements	20
5	Explaining limited effectiveness of local content requirements in India's National Solar Mission	22
5.1	Market size and stability	22
5.2	Policy design	23
5.3	Cooperation and financial incentives/consistency	24
5.4	Industry sophistication and innovation potential	24
6	Conclusions and recommendations	25
	Bibliography	29
