

Artificial Neural Networks in Finance and Manufacturing

Joarder Kamruzzaman
Monash University, Australia

Rezaul K. Begg
Victoria University, Australia

Ruhul A. Sarker
University of New South Wales, Australia

IDEA GROUP PUBLISHING

Hershey • London • Melbourne • Singapore

Artificial Neural Networks in Finance and Manufacturing

Table of Contents

L16

Preface vi

SECTION I: INTRODUCTION

Chapter I.

Artificial Neural Networks: Applications in Finance and Manufacturing 1

Joarder Kamruzzaman, Monash University, Australia

Ruhul A. Sarker, University of New South Wales, Australia

Rezaul K. Begg, Victoria University, Australia

Chapter II.

Simultaneous Evolution of Network Architectures and Connection Weights in Artificial Neural Networks 28

Ruhul A. Sarker, University of New South Wales, Australia

Hussein A. Abbass, University of New South Wales, Australia

SECTION II: ANNs IN FINANCE

Chapter III.

Neural Network-Based Stock Market Return Forecasting Using Data Mining for Variable Reduction 43

David Enke, University of Missouri — Rolla, USA

Chapter IV.

Hybrid-Learning Methods for Stock Index Modeling 64

Yuehui Chen, Jinan University, P.R. China

Ajith Abraham, Chung-Ang University, Republic of Korea

Chapter V.	
Application of Higher-Order Neural Networks to Financial Time-Series Prediction	80
<i>John Fulcher, University of Wollongong, Australia</i>	
<i>Ming Zhang, Christopher Newport University, USA</i>	
<i>Shuxiang Xu, University of Tasmania, Australia</i>	

Chapter VI.	
Hierarchical Neural Networks for Modelling Adaptive Financial Systems	109
<i>Masoud Mohammadian, University of Canberra, Australia</i>	
<i>Mark Kingham, University of Canberra, Australia</i>	

Chapter VII.	
Forecasting the Term Structure of Interest Rates Using Neural Networks	124
<i>Sumit Kumar Bose, Indian Institute of Management, India</i>	
<i>Janardhanan Sethuraman, Indian Institute of Management, India</i>	
<i>Sadhalaxmi Raipet, Indian Institute of Management, India</i>	

Chapter VIII.	
Modeling and Prediction of Foreign Currency Exchange Markets	139
<i>Joarder Kamruzzaman, Monash University, Australia</i>	
<i>Ruhul A. Sarker, University of New South Wales, Australia</i>	
<i>Rezaul K. Begg, Victoria University, Australia</i>	

Chapter IX.	
Improving Returns on Stock Investment through Neural Network Selection	152
<i>Tong-Seng Quah, Nanyang Technological University, Republic of Singapore</i>	

SECTION III: ANNs IN MANUFACTURING

Chapter X.	
Neural Networks in Manufacturing Operations	165
<i>Eldon Gunn, Dalhousie University, Canada</i>	
<i>Corinne MacDonald, Dalhousie University, Canada</i>	

Chapter XI.	
High-Pressure Die-Casting Process Modeling Using Neural Networks	182
<i>M. Imad Khan, Deakin University, Australia</i>	
<i>Saeid Nahavandi, Deakin University, Australia</i>	
<i>Yakov Frayman, Deakin University, Australia</i>	

Chapter XII.	
Neural Network Models for the Estimation of Product Costs: An Application in the Automotive Industry	199
<i>Sergio Cavaliere, Università degli Studi di Bergamo, Italy</i>	
<i>Paolo Maccarrone, Politecnico di Milano, Italy</i>	
<i>Roberto Pinto, Università degli Studi di Bergamo, Italy</i>	

Chapter XIII.
A Neural-Network-Assisted Optimization Framework and Its Use for Optimum-Parameter Identification 221
Tapabrata Ray, University of New South Wales, Australia

Chapter XIV.
Artificial Neural Networks in Manufacturing: Scheduling 236
George A. Rovithakis, Aristotle University of Thessaloniki, Greece
Stelios E. Perrakis, Technical University of Crete, Greece
Manolis A. Christodoulou, Technical University of Crete, Greece

Chapter XV.
Recognition of Lubrication Defects in Cold Forging Process with a Neural Network 262
Bernard F. Rolfe, Deakin University, Australia
Yakov Frayman, Deakin University, Australia
Georgina L. Kelly, Deakin University, Australia
Saeid Nahavandi, Deakin University, Australia
