Preface xvii

Introduction xxi

<b>CHAPTER 1</b>	<b>FROM IDEA TO PRODUCT TO MARKET—THE FLOW</b> .....	<b>1</b>
	Objectives .....	1
	Reality in Innovation .....	2
	Materials Selection in Product Design.....	2
	Materials Development—The Starting Point.....	4
	Materials Systems (and Related Case Studies).....	5
	Inorganic Materials .....	6
	Organic, Biomaterials, and Biomimetic Materials ....	9
	Nanomaterials .....	10
	Electronic, Optical, and Magnetic Materials .....	11
	Innovation Flow .....	12
	Important Aspects in the Flow of Innovation .....	13
	Where Do Ideas Come From? Sources of Innovation .....	13
	Where to Get Information?.....	15
	New Knowledge as a Source of Innovation.....	16
	Principles of Successful Innovation.....	17
	Case Study. CERCON <sup>®</sup> : Convergence of Skill Sets (Personal Interview with E. Filser).....	17
	Objective of the Project.....	17
	Original Idea and History of R&D Leading to CERCON <sup>®</sup> .....	18
	Scoping—Selecting the Few Winning Ideas .....	24
	Importance of Speed in Decision Making.....	24
	Finding the Right Focus: Time, Cost, Objectives...25	
	Right Processes and Right Competencies— Important Pieces of a Puzzle.....	25
	Summary .....	26
	References.....	26
<b>CHAPTER 2</b>	<b>AN INTRODUCTION TO COMPANY STRUCTURE AND ORGANIZATION</b> .....	<b>29</b>
	Objectives .....	29
	Economic Environment.....	29

Objectives and Organization of Companies—Established	
Ones and Those to Be Established.....	31
Structure of a Company.....	31
From a Traditional (Mechanistic) to an	
Organic Organization.....	32
Traditional Organizational Structure.....	33
Organic Organization.....	37
Mixing Styles.....	39
Basis for Departmentalization.....	40
Functional Departmentalization.....	41
Geographic Departmentalization.....	41
Product Departmentalization.....	41
Customer or Market Departmentalization.....	42
Process Departmentalization.....	42
Porter's Value Chain.....	42
Setting Up Vision, Mission, Objectives, Strategies.....	44
Vision.....	45
Mission.....	45
Objectives.....	45
Situation Analysis.....	46
Strategy Formulation.....	46
Strategic Planning.....	48
Cost Leadership Strategy.....	48
Differentiation Strategy.....	49
Focus Strategy.....	49
Summary.....	50
References.....	51

<b>CHAPTER 3</b>	<b>CREATION PHASE—RESEARCH AND DEVELOPMENT</b> ....	<b>53</b>
	Objectives.....	53
	Important Process Steps from Idea to Market.....	53
	Creation Phase—Research and Development.....	55
	The Linear Model of Innovation.....	57
	First Mover Advantages.....	59
	Second Mover Advantages.....	59
	The Real Economics of Research in the	
	Linear Model.....	59
	Two-Dimensional View of R&D.....	61
	Benefits of Academic Research and	
	Government Funding.....	62

Three Phases of the Innovation Process by	
Abernathy and Utterback .....	63
Fluid Phase.....	63
Transitional Phase.....	63
Specific Phase .....	64
Conventional and Disruptive Technology S Curves .....	64
Models and Tools for the Start of the Innovation	
Process.....	66
New Concept Development Model.....	66
New Process Development.....	71
Case Study. Metal Oxide Varistors, Evolution of a	
Technology: In-house Research or Licensing? .....	71
Surge Arresters.....	71
The History of ZnO Varistors.....	72
Metal Oxide Varistors at Brown Boveri.....	73
Asea Bets on Metal Oxide Varistors.....	74
Brown Boveri Closes the Gap.....	74
Competitors Become Partners .....	75
Learning Points .....	76
Summary .....	77
References.....	78

<b>CHAPTER 4</b>	<b>APPLICATION PHASE—DESIGN AND</b>	
	<b>MANUFACTURING .....</b>	<b>79</b>
	Objectives .....	79
	Engineering Design .....	79
	Functional Requirements .....	79
	Total Life Cycle in Design .....	80
	Other Major Effects in Design .....	81
	Production Engineering and Manufacturing .....	82
	Production Engineering.....	82
	Manufacturing.....	82
	Case Study. Isothermal Forging of $Ti_6Al_4V$ Impeller	
	Wheels: A Detour Toward Flexible	
	Manufacturing .....	84
	First Challenge: Available Manufacturing	
	Methods.....	85
	Second Challenge: Process Development .....	85
	Third Challenge: Upscaling.....	87
	Fourth Challenge: Technology Transfer .....	89

More than 30 Years Later.....	89
Lessons Learned.....	90
Case Study. LNT: From Process Modeling in Russia to HIP Manufacturing Worldwide—Keep Focusing on the Content .....	91
Background.....	91
Laboratory of New Technologies.....	92
Establishing Synertech.....	95
The Shrinkage Model.....	95
Examples of Complex Shapes Produced by HIP ..	96
Competitive Cost Analysis and Market.....	97
Reasons for Success.....	97
Future Outlook .....	98
Learning Points .....	98
Summary .....	98
References.....	99

<b>CHAPTER 5</b>	<b>MANAGING TECHNOLOGY .....</b>	<b>101</b>
	Objectives .....	101
	Managing Change .....	101
	Portfolio Management .....	101
	Financial Commitment .....	104
	Does More R&D Expenditure Lead to Higher Profitability? .....	104
	Tools for the Calculation of the Business Impact of R&D Projects.....	106
	Barriers to Innovation .....	109
	Side Benefits of Innovation .....	110
	Human Aspects in Supporting Innovation .....	111
	Commitment.....	111
	People Involvement.....	111
	Resources .....	111
	Accepting Failure Helps an Innovation.....	111
	Implementation .....	112
	Centralized Approach.....	112
	Decentralized Approach.....	112
	Multilayer Approach.....	113
	Guidelines for Success .....	114
	Managing R&D.....	115
	Sites for Research and Development.....	115

Management of Interface Between Research and Development.....	115
Organizational Structures .....	116
Case Study. Continuous Change and Improvement in Global R&D Management at ABB .....	117
Meetings of Corporate Research Directors .....	118
Program Management.....	118
Customer Visits.....	119
High-Risk/High-Impact Projects .....	119
Cross-Program Projects.....	119
PIPE .....	119
Business Impact Calculations.....	119
Radical Innovation.....	120
Strategic Cooperation with Universities.....	120
Virtual Global Labs .....	121
Concluding Remarks .....	121
Summary .....	121
References.....	122

<b>CHAPTER 6</b>	<b>PROCESS THINKING AND KNOWLEDGE MANAGEMENT.....</b>	<b>123</b>
	Objectives .....	123
	Processes and Work Flow .....	123
	Processes.....	124
	Work Flow .....	124
	Case Study. ABB: Process-Thinking in R&D, from Idea to Global Projects (PIPE and the Stage-Gate® Process) .....	125
	Processes and Work Flow .....	125
	Process Steps .....	125
	Work Flow .....	125
	The Challenge.....	125
	Continuous Program Management—The Solution .....	126
	The Tool—PIPE .....	126
	Stage-Gate® Process and the ABB Gate Model.....	128
	Knowledge Management, a New Aspect of Organizational Thinking .....	130
	Definition of Knowledge Management.....	131
	Three Faces of Organizations.....	133

	Creative, Competent Workforce .....	133
	Mechanical Corporate Environment .....	134
	Organic Corporate Environment .....	134
	Dynamic Corporate Environment .....	135
	Summary .....	136
	References .....	137
<b>CHAPTER 7</b>	<b>FINANCIAL MANAGEMENT OF A COMPANY .....</b>	<b>139</b>
	Objectives .....	139
	The Essential Instruments to Navigate the Course of a Company .....	139
	Financial Accounting .....	140
	Balance Sheet: Where We Are Now .....	141
	Profit and Loss Account (Income Statement): Where We Have Been .....	142
	What We Can Learn from Balance Sheet and Income Statement .....	146
	Information Available by Studying the Annual Report .....	147
	Financial Ratios .....	147
	Warning Signals .....	149
	Cash Flow and Funds Flow (Budget): Where We Are Going .....	149
	Managerial Accounting .....	151
	Tools of Managerial Accounting .....	151
	Costs and Revenues .....	151
	The Components of Cost .....	153
	Determining the Product Costs for One Product .....	154
	Determining the Product Costs for Several Products .....	154
	Cost Accounting Systems .....	156
	Full-Cost Accounting .....	156
	Marginal Costing (Direct Costing) .....	157
	Breakeven Analysis .....	159
	Contribution .....	160
	Margin of Safety .....	161
	Final Remarks and Key Learning Points .....	163
	Investment Decisions: Capital Budgeting .....	164
	Economic Parameters for an Investment Appraisal .....	165

Cost of Investment .....	166
Economic Benefit .....	166
Utilization Period .....	166
Income from Liquidation (Resale Value) .....	166
Time Value of Money .....	166
Risk .....	167
Methods Used in Capital Budgeting .....	167
Decision Criteria for Investments .....	168
Payback Calculation .....	168
Net Present Value Method .....	171
Internal Rate of Return .....	173
Profitability of Investment Projects .....	176
Risk and Uncertainty .....	176
Case Study. ZnO Varistors: NPV Comparison	
Between In-house R&D and Licensing .....	177
Discussion .....	178
Conclusion .....	179
Analogy to Government Funding of	
High-risk Projects .....	179
Summary .....	179
References .....	180

<b>CHAPTER 8 THE PRODUCT/MARKET MATRIX .....</b>	<b>181</b>
Objectives .....	181
Growth Matrix .....	181
Market Penetration .....	182
New Product Development .....	183
Case Study. High-Temperature Superconductors:	
Technology Push .....	184
Introduction .....	184
R&D at ABB .....	184
American Superconductors Corporation .....	190
Case Study. Lanthanum Oxide-Molybdenum	
Cathodes: Incomplete Target Specification .....	194
From Specification to Concept .....	194
Manufacturing Challenge .....	196
Lifetime Optimization .....	196
Lessons Learned .....	197
Case Study. Nanosphere <sup>®</sup> : Nanotechnology in	
Textiles by Subcontracting R&D .....	197

Schoeller Technologies AG .....198  
 The Lotus Effect as a Source of Innovation .....198  
 History of NanoSphere® .....199  
 Learning Points .....201  
 Market Development .....202  
 Diversification .....202  
     Case Study. Liquid Crystal Display at Brown Boveri:  
         A Too-Expensive Commercial Product Followed  
         by Successful Licensing .....203  
         Learning Points .....205  
 Summary .....205  
 References.....206

**CHAPTER 9 NEW VENTURES ..... 209**

Objectives .....209  
 Requirements for Success .....209  
 Market Focus, Financial Foresight, and a Top Management  
     Team .....210  
 Diversification Within an Existing Company Leading to  
     a New Venture .....210  
         Case Study. Shape Memory Alloys Used in Stents .....211  
             Shape Memory Alloy Research at Brown  
             Boveri .....211  
             The Story of Stent Development by  
             Julio C. Palmaz .....213  
             Nitinol Devices and Components.....215  
             Learning Points from this Case .....221  
         Case Study. Metoxit: High-strength Ceramics in  
             Biomedical Applications .....221  
             Objective.....221  
             Metoxit.....221  
             From Innovation and Diversification to  
             Startup in Alusuisse .....223  
     Starting a New Venture from a New Technology.....228  
         Case Study. Amroy: Building a Business Around  
             Carbon Nanotubes .....228  
             Technology Push or Market Pull.....230  
             Funding of the Company .....230  
             Supplier of CNT.....230  
             Production and Sales Growth .....230

Growth Strategy and Main Risks .....	230
Patent Situation and Competing Technologies .....	231
Learning Points .....	231
Case Study. Day4Energy: From Auctioning Off a New Technology to Setting Up	
In-house Manufacturing .....	231
Photovoltaic Technology .....	232
History of Day4Energy .....	232
Specifics of the Day4 Electrode .....	234
Further Development .....	235
Learning Experiences .....	235
Summary .....	236
References.....	236
<b>CHAPTER 10 THE HUMAN FACTOR IN MANAGEMENT.....</b>	<b>237</b>
Objectives .....	237
Leading or Being Led: Analogy Between Mountain Climbing and Management.....	237
Tools to Measure Our Capabilities and Learn about Our Preferences (Psychometric Instruments).....	239
Emotional Intelligence (EI) .....	241
The Emotional Competence Framework.....	242
Self-Test .....	246
The Myers-Briggs Type Indicator® (MBTI®).....	248
The Hermann Brain Dominance Instrument® (HBDI®) .....	250
Important Aspects in Management.....	251
The Role of Intuition Versus Rational Decision Making.....	251
Managing People Well.....	256
The Importance of Delegation.....	257
The Contribution of Consultants.....	258
Summary .....	259
References.....	260
Index .....	263
