

Climate Change and the World Bank Group

Phase I: An Evaluation of World Bank Win-Win Energy Policy Reforms

Contents

vii	Abbreviations and Terminology
ix	Glossary
xiii	Acknowledgments
xv	Foreword
xvii	Executive Summary
xxiii	Management Response
xxix	Chairperson's Summary: Committee on Development Effectiveness (CODE)
xxxiii	Statements by the External Review Panel: Climate Evaluation, Phase I
1	1 Introduction, Scope, and Motivation
4	Confronting Inexorable Calamities and Unreckonable Risks
6	Three Approaches to Greenhouse Gas Mitigation
7	Priority Areas for Evaluation Related to Mitigation
8	Scope and Methods of This Evaluation
11	2 National Policies and Climate Change
13	Energy, CO ₂ , and Development: A Strong but Pliable Relationship
17	Policies and Institutions Can Make a Big Difference
19	GHG Mitigation Need Not Compromise the Pursuit of Energy Access for the Poorest
21	3 World Bank Operations and Climate Change
23	Climate in World Bank Policies and Strategies
25	Global Finance and Institutions
26	Mainstreaming
31	Strategic Considerations for the Bank: Accounting for Local and Global Impacts
39	4 Subsidies and Energy Pricing
41	The Nature of Subsidies and Price Distortions
41	The Problem with Subsidies
44	Energy Subsidies and the Poor
48	Experience in the Transition Economies
50	Bank Engagement with the Large Subsidizers
50	Energy Loans and Pricing
52	Conclusion
57	5 Efficiency Policies
59	Overcoming the Barriers to Energy Efficiency
61	The Efficiency Portfolio
62	Demand-Side Management

	64	Bank Engagement on DSM
	68	Appliance Standards and Building Codes
	73	Public Buildings
	74	District Heating
	75	Conclusion
77	6	Natural Gas Flaring
	79	Context
	81	The Paradox of Gas Flaring
	81	The Global Gas Flaring Reduction Partnership
	84	Economics of Gas Flaring
	86	Conclusion
89	7	Findings and Recommendations
	91	Findings
	96	Conclusion and Recommendations
99		Appendixes
	100	A: Bank Attention to Subsidies in the Large Subsidizing Countries
	106	B: Energy-Efficiency Projects with Policy Components
	114	C: Distributional Incidence of Subsidies
121		Endnotes
123		References
		Boxes
	15	2.1 Emissions Intensities of Power Supply
	37	3.1 The \$135 per Ton CO ₂ Price Is Already Here
	48	4.1 Ghana and Indonesia: Using Social Safety Nets to Protect the Poor from Fuel Price Rises
	49	4.2 Ukraine: Gradual Energy Policy Reform and Decreasing Emissions Intensity
	51	4.3 Egypt: Policy Dialogue and Pricing Reform
	63	5.1 Rates of Return to Energy-Efficiency Projects
	66	5.2 DSM in Brazil
	73	5.3 Heat Reform and Building Efficiency in China
	95	7.1 The Challenge of Catalyzing Technology Adoption
		Figures
	4	1.1 Intersection of Issues Related to Climate Change
	7	1.2 Global and Domestic Benefits
	14	2.1 Per Capita Energy Emissions and Income, 2004
	16	2.2 Absolute Changes in Emissions and Income, 1992–2004
	20	2.3 Relative Emissions Are Higher in Countries with Diesel Subsidies
	27	3.1 World Bank Climate-Themed Projects and Commitments
	35	3.2 Real Energy Prices of Coal, Gas, and Oil, 1990–2008
	46	4.1 Conditionality Related to Petroleum Products
	52	4.2 Trends in Energy Sector Loans with Pricing Goals
	53	4.3 Distribution of World Bank Lending Related to Electricity Power Pricing Policy, 1996–2007
	61	5.1 Energy-Efficiency Investments
	80	6.1 Recent and Planned Generation Capacity Additions by Fuel Type
