

*New Perspectives
on Investment
in Infrastructures*

G. Arts, W. Dicke and L. Hancher (eds.)

CONTENTS

About the authors	11
Preface	13
1 Stuck on the Tracks? Empirical Study for Investments in the Dutch Railway Infrastructure	15
<i>Rudi Bekkers</i>	
1.1 Introduction	15
1.1.1 Research focus and methodology	15
1.1.2 Structure of this paper	16
1.2 The public interest in Railways	16
1.2.1 The quality of rail service	17
1.2.2 The safety of rail service	18
1.3 Governance of the Dutch Railways	18
1.3.1 Regulation and regime changes in the Dutch railway sector	18
1.4 Assessing the current functioning of the Dutch Railway Infrastructure sector	22
1.4.1 Investments in railway infrastructure	23
1.4.2 Performance of the railway sector	25
1.4.3 Innovation in the railway sector	27
1.5 Current issues and suggestions for improvements	27
1.6 Conclusions and recommendations	32
Annex	35
2 Reguleren en investeringen in infrastructuur	43
<i>Theon van Dijk</i>	
2.1 Inleiding	43
2.1.1 Focus van de studie	43
2.1.2 Aanleiding voor de studie	44
2.1.3 Organisatie	45
2.2 Reguleringstheorie	45
2.2.1 Privatisering	45
2.2.2 Liberalisering	49
2.2.3 Tariefregulering	50
2.2.4 Opportunistisch gedrag van toezichthouders (Regulatory opportunism)	52
2.2.5 Conclusie	53
2.3 Financieringstheorie	54
2.3.1 Startpunt: het 'irrelevantie theorema'	54
2.3.2 Afruiltheorie	55
2.3.3 Principaal-agenttheorie	55
2.3.4 Pikordetheorie	56
2.3.5 Marketing timing-theorie	57

2.3.6	Productmarktconcurrentie en vermogensstructuur	57
2.3.7	Conclusie	58
2.4	Investerings in gereguleerde infrastructuur	58
2.4.1	Specifieke eigenschappen van investeringen in infrastructuur	59
2.4.2	Privatisering en investeringen	62
2.4.3	Liberalisering, verticale ontvlechting en investeringen	63
2.4.4	Tariefregulering en investeringsprikkel	64
2.4.5	Regulering en timing van investeringen	66
2.4.6	Interactie gereguleerde onderneming, vermogensstructuur en toezichthouder	66
2.4.7	Conclusie	68
2.5	Twee infrastructuren in Nederland nader bekeken	69
2.5.1	Inleiding	69
2.5.2	Achtergrond: ervaringen in het Verenigd Koninkrijk	70
2.5.3	Hoogspanningsnetten van Tennet	71
2.5.4	Vaste net KPN	80
2.6	Investerings in infrastructuur en het borgen van publieke belangen	85
2.6.1	Marktfalen	85
2.6.2	Mogelijke reacties op marktfalen	86
3	Planning van weginfrastructuur: Enkele aanknopingspunten voor verbetering	95
	<i>A.A. van Duijn</i>	
3.1	Inleiding en probleemstelling	95
3.1.1	Inleiding	95
3.1.2	Probleemstelling	97
3.1.3	Werkwijze	98
3.2	De publieke belangen van weginfrastructuur	98
3.2.1	Het publieke belang	98
3.2.2	Het publieke belang op lokaal niveau	101
3.3	Aanknopingspunten voor verbetering van het planningsproces bij aanleg en onderhoud van weginfrastructuur	103
3.3.1	Inleiding	103
3.3.2	Lange termijn planning	105
3.3.3	Het omgaan met informatie	107
3.3.4	Fragmentatie in de besluitvorming	108
3.3.5	Het gebruik van maatschappelijke kosten-batenanalyse (MKBA)	110
3.3.6	Indirecte effecten	112
3.3.7	Interdepartementale Commissie voor de Ruimtelijke Economie (ICRE)	115
3.3.8	Interdepartementaal beleidsonderzoek (IBO)	118
3.3.9	De sociale kant van infrastructuur	119
3.4	Tot slot	120

4	European Regulators in the Network Sectors: Revolution or Evolution?	125
	<i>Saskia Lavrijssen-Heijmans and Leigh Hancher</i>	
4.1	Introduction	125
4.1.1	Structure of the article	126
4.2	Characterisation of different networks	126
4.2.1	EU independent agencies	126
4.2.2	Independent European networks of national regulators	127
4.3	The legal effects of the networks' activities	130
4.3.1	Advisory activities	130
4.3.2	European policy rules	131
4.4	The commission as first among equals of the networks	132
4.5	Accountability gaps	133
4.5.1	Political accountability	134
4.5.2	Transparency	135
4.5.3	Legal accountability	136
4.5.4	The role of the national courts	137
4.6	The future	138
4.6.1	Towards 'European networks plus'	138
4.6.2	Does Meroni pose an obstacle to 'European agencies as network plus'?	141
4.6.3	Solution or new accountability problems?	143
4.7	Conclusion	145
5	Investments in Infrastructures: Strategic Behaviour	159
	<i>Ernst ten Heuvelhof</i>	
5.1	Introduction and problem definition	159
5.1.1	Introduction	159
5.1.2	Problem definition	160
5.1.3	Structure of the essay	160
5.2	Strategic behaviour	161
5.2.1	Introduction	161
5.2.2	Characteristics of strategic behaviour	162
5.2.3	Establishing strategic behaviour	166
5.2.4	Strategic behaviour positioned	169
5.3	Strategic Behaviour: Sources and Manifestations	170
5.3.1	Introduction	170
5.3.2	From classic paradigm to new paradigm	171
5.3.3	Source 1: Fewness	171
5.3.4	Source 2: Information asymmetry	177
5.3.5	Source 3: Position	182
5.4	Summary and conclusions regarding strategic behaviour	187
5.4.1	Summary of strategic behaviour investments in infrastructures	187
5.4.2	Changes in strategic behaviour by institutional changes	187
5.5	Potential solutions	192
5.5.1	Regulation	193

5.5.2	Financial arrangements	193
5.5.3	Societally optimal investments in infrastructures	194
6	The Impact of Technical Characteristics of Network Industries upon the Governance of Infrastructure Adequacy	201
	<i>Hamilcar Knops</i>	
6.1	Introduction	201
6.1.1	The importance of infrastructure adequacy	201
6.1.2	The impact of the recent regime change	202
6.1.3	The relevance of technical constraints and characteristics	204
6.2	Technical characteristics play a role at two levels	205
6.2.1	Effect upon the overall governance mode	205
6.2.2	Relevance for the organisation of infrastructure adequacy	207
6.3	Designing the legal organisation of infrastructure adequacy	208
6.3.1	Design approach	208
6.3.2	The FULDA method	213
6.4	Example: Transport adequacy in the electricity industry	221
6.4.1	Regime change has necessitated a new organisation of transport adequacy	221
6.4.2	Step I: Analysis of the function of transport adequacy	222
6.4.3	Step II: The context of transport adequacy	224
6.4.4	Step III: Decisions how to organise the function of transport adequacy	225
6.5	The impact of technical constraints and characteristics	230
6.5.1	Effects upon unbundling and the economic regime	230
6.5.2	Impact on the governance of infrastructure adequacy	232
6.5.3	Co-ordination	233
6.6	Conclusion	235
7	Europe and Investment In Infrastructure With Emphasis on Electronic Communications	241
	<i>Pierre Larouche</i>	
7.1	The influence of EC law state intervention concerning investments in infrastructure	241
7.1.1	The role of primary law	241
7.1.2	Positive harmonisation and secondary law	244
7.2	The case of electronic communications	248
7.2.1	What makes electronic communications especially relevant	248
7.2.2	What makes electronic communications different	249
7.3	Major issues currently raised in electronic communications	251
7.3.1	Structural solutions – functional separation	252
7.3.2	Behavioural solutions, including the regulatory holiday	252
7.3.3	The need for co-ordination across the EU	258
7.4	Conclusions	263

8	Private Equity Funds and Public Utilities: Where Incentive Structures Collide	271
	<i>William Melody</i>	
8.1	Introduction	271
8.2	Distinctive characteristics of public utilities	272
8.3	The funds 'attraction to public utilities'	273
8.4	Conflict between long-term and short-term investor value	274
8.5	Broader economic and social implications	275
8.6	Public utility case study: telecommunications	276
	8.6.1 Telecom reform and EU information society objectives	276
	8.6.2 Financial stability in the telecom sector in Europe	277
	8.6.3 Eircom in Ireland	277
	8.6.4 TDC in Denmark	279
	8.6.5 Bulgarian Telecommunications Company	280
	8.6.6 Conclusions from the case studies	281
8.7	Public utility governance	281
9	Publieke belangen, overheidsbeleid en investeringen in infrastructuur	287
	<i>Jan de Pree</i>	
9.1	Inleiding	287
9.2	Achtergrond, introductie en verspreiding: nutssectoren	288
	9.2.1 Infrastructuur-gebonden sectoren	288
	9.2.2 Heroverweging van presterende overheidstaken en hun uitvoering	288
	9.2.3 De introductie van 'publiek belang'	289
	9.2.4 Het borgen van publiek belang	290
	9.2.5 Borging van publieke belangen, het kabinetsstandpunt inzake het borgen van publiek belang	292
	9.2.6 Liberalisering en privatisering van netwerksectoren; publieke belangen en marktordening	293
	9.2.7 Privatisering nader bezien; deelnemingenbeleid rijks-overheid	297
9.3	Transportdiensten	301
9.4	Infrastructuur	307
9.5	De vaststelling van het publieke belang	312
9.6	Korte nabeschuiving	315
10	Infrastructure Investments on the Edge of Public and Private Domains	319
	<i>Geert Teisman</i>	
10.1	Introduction	319
	10.1.1 Arguments against hybridism	320
	10.1.2 Realities in favour of hybridism	320
	10.1.3 From public to private – the rise of privatization	321
	10.1.4 Combining the best of both worlds	322

10.2	Partnership in the Netherlands: in between action and rhetoric	322
10.2.1	Why public and private partnerships fail; the views of Jane Jacobs	326
10.2.2	In search of successful partnerships; falsifying Jacob's thesis	327
10.3	The West Coast Main Line: In search of an upgrade	328
10.3.1	A short overview of the case	329
10.4	Lessons on hybrid strategies in the field of infrastructure investments	336
10.4.1	Creating network organisations: the theories of Goldsmith and Eggers	338
10.5	Conclusions and recommendations	341
11	Concessiestelsel en overheidsaandeelhouderschap <i>Kirsten Wilkeshuis</i>	347
11.1	Inleiding	347
11.1.1	Te hoge tarieven	347
11.1.2	Achtergrond	347
11.1.3	Aanpak en probleemstelling	350
11.1.4	Leeswijzer	351
11.2	Concessies	352
11.2.1	Inleiding	352
11.2.2	Concessies in Nederland	352
11.2.3	Concessies in Frankrijk	356
11.2.4	Beïnvloedingsmogelijkheden concessie	358
11.3	Overheidsaandeelhouderschap	359
11.3.1	Inleiding	359
11.3.2	Beschrijving aandeelhoudersbevoegdheden	361
11.3.3	Beïnvloedingsmogelijkheden van de overheidsaandeelhouder	362
11.3.4	Beïnvloedingsmogelijkheden op de overheidsaandeelhouder	364
11.3.5	Slotsom	364
11.4	Bevindingen	364
