

Gravity and Geoid

Joint Symposium of the International Gravity Commission
and the International Geoid Commission

Symposium No. 113

Graz, Austria, September 11-17, 1994

Convened and Edited by

Hans Sünkel
Iginio Marson

Springer

Contents

IAG Opening Address	1
<i>W. Torge</i>	
Session 1 Progress in Gravity Instrumentation	
Chairman, J. Faller	
An Ocean Bottom Absolute Gravity Meter	7
<i>Zumberge, M.A. and E.L. Canuteson</i>	
Session 2 Intercomparison Campaigns	
Chairman, I. Marson	
Problems of Gravimeter Calibration in High Precision Gravimetry	19
<i>Meurers, B.</i>	
Intercomparison of IMGC Absolute and GWR Superconducting Gravimeters	27
<i>Baldi, P., G. Casula, S. Focardi, F. Palmonari, G. Cerutti, P. De Maria, and I. Marson</i>	
Session 3 Standards, Networks, Data Bases and Software	
Chairman, G. Boedecker	
British Precise Gravity Network 1993	39
<i>Charles, K. and R.G. Hipkin</i>	
Large Scale Absolute Gravity Control in South America - JILAG-3 Campaigns 1988-1991 -	46
<i>Torge, W., L. Timmen, R.H. Röder, and M. Schnüll</i>	

Gravity Variations in Microgravity Networks in Central Italy <i>Di Filippo, M., T. Ruspandini, and B. Toro</i>	56
British and French Gravity Datums Connected via the Channel Tunnel <i>Hipkin, R.G., J.F. Kirby, and K. Charles</i>	64
Unified Gravity Network of the Czech Republic, Slovakia and Hungary <i>Csapó, G., G. Szatmári, M. Klobušiak, J. Kováčik, S. Olejník, and L. Träger</i>	72
The Adjustment of the Unified European Gravity Network 1994 (UEGN 94) <i>Boedecker, G., I. Marson, and H.-G. Wenzel</i>	82
Worldwide Synthetic Gravity Tide Parameters <i>Timmen, L. and H.-G. Wenzel</i>	92
Gravity Anomalies for the Southern Part of Baltic Sea and their Statistics <i>Lyszkowicz, A.</i>	102
 Session 4 Space Gradiometry and Airborne Gravimetry Chairman; R. Rummel	
Global Gravity Field Recovery by Use of STEP Observations (Extended Abstract) <i>Albertella, A., F. Migliaccio, and F. Sansò</i>	111
Solving the STEP-Observation Equation Using Banach's Fixed-Point Principle <i>Keller, W.</i>	117
Some Unsolved Problems in Airborne Gravimetry <i>Schwarz, K.P. and M. Wei</i>	131
State-of-the-Art and Future Sensor Technology for Airborne Gravimetry <i>Neumeyer, J. and K. Hehl</i>	151
Fundamentals and Applications of Digital Filtering in Airborne Gravimetry <i>Hehl, K.</i>	161
GPS Software Development for Airborne Gravimetry and First Results <i>Xu, G., K. Hehl, and D. Angermann</i>	171

Accelerometer/GPS Integration for Strapdown Airborne Gravimetry: First Test Results	177
<i>Boedecker, G., F. Leismüller, T. Spohnholtz, J. Cuno, and K.H. Neumayer</i>	
State-of-the-Art Airborne Gravimetry	187
<i>Brozena, J.M. and M.F. Peters</i>	
A Survey of Worldwide Research Activities on Airborne Gravimetry – Open and Solved Problems – (Extended Abstract)	198
<i>Hein, G.W.</i>	
 Session 5 Geophysical Inversion of Gravity and Geoid	
Chairman, P. Holota	
Two Branches of the Newton Potential and Geoid	205
<i>Holota, P.</i>	
Geodetic and Geophysical Inverse Gravimetric Problem, the Most Adequate Solution and the Information Content	215
<i>Strykowski, G.</i>	
A New Approach to Approximate the Earth's Gravity Field	225
<i>Strakhov, V.N., U. Schäfer, A.V. Strakhov, A.I. Luchitsky, and D.E. Teterin</i>	
The Maximum Entropy Geoid - A Solution for an Internal Level Surface	238
<i>Lehmann, R.</i>	
Upward Continuation to the Brillouin Level of the Romanian Gravity Map	247
<i>Ivan, M.F.</i>	
Geoid Undulation Caused by the Heterogeneity of the Litosphere and Mantle in Qinghai-Xizang Plateau, China	252
<i>Hsu, H.T. and X.L. Li</i>	
Theoretical Background of the Vening Meinesz Isostatic Model	268
<i>Abd-Elmotaal, H.A.</i>	
Computation of the Moho Depths from Gravity Data in the Ross Sea (Antarctica)	278
<i>Coren, F., C. Zanolla, and I. Marson</i>	

Using the Geophysical Inversion of the Gravity Data to Explain the Crustal Structure of South-East China <i>Wang, Q.</i>	286
Covariance Functions Set Derived from Radial Multipoles Potentials: Theory and Some Results for Regional Gravity Field in Central Europe <i>Marchenko, A. and O. Abrikosov</i>	296
Session 6 Altimetry Chairman, F. Sansò	
A Uniform Approach to the Estimation Problems of Satellite Altimetry <i>van Gysen, H. and R. Coleman</i>	307
Gravity Disturbances from GEOSAT Data and Forward Geopotential Models in the Labrador Sea <i>Zhang, C. and M.G. Sideris</i>	317
A New Approach to Sea Surface Topography Estimation <i>Barrile, V., R. Barzaghi, L. Giacobbe, and F. Negrini</i>	329
D-PAF Mean Sea Surfaces and High Resolution Gravity Field Models Based on ERS-1 Altimeter Data <i>Gruber, Th., M. Anzenhofer, and M. Rentsch</i>	347
A Datum Defect and Spectral Analysis in Regional Cross-over Adjustments of Satellite Altimeter Data <i>Lenk, U., K. Seitz, and B. Heck</i>	357
Long-Term Vertical Control in Satellite Altimetry, Deficiencies and Concepts <i>Schmidt, M. and W. Bosch</i>	366
Gravity and Geoid in the Mediterranean from a Common Adjustment of ERS-1 and TOPEX Altimeter Data <i>Arabelos, D. and I.N. Tziavos</i>	376
First Analysis of ERS-1 Altimeter Data in the Red Sea Area <i>Elsayed, M.S. and E. Hoeck</i>	386
The Use of Transponders in Altimetry <i>Pesec, P., H. Sünkel, and N. Windholz</i>	394

Session 7 International Projects and Advanced Techniques
Chairman, M.G. Sideris

Comparison of Geopotential Recovery Capabilities of Some Future Satellite Missions <i>Balmino, G. and F. Perosanz</i>	403
A Joint GSFC/DMA Project for Improving the Model of the Earth's Gravitational Field <i>Rapp, R.H. and R.S. Nerem</i>	413
European Gravimetric Geoid: Status Report 1994 <i>Denker, H., D. Behrend, and W. Torge</i>	423
Problems with Geoid Evaluations in South East Asia <i>Kearsley, A.H.W. and Z. Ahmad</i>	433
Height Comparisons on the Australian National GPS Network (ANN): First Results <i>Pearse, M.B., A.H.W. Kearsley, and P. Morgan</i>	439
Geoid Computations in Taiwan <i>Tsuei, G.-C., D. Arabelos, R. Forsberg, M.G. Sideris, and I.N. Tziavos</i>	446
The Local Geoid Determination in China – The Combination of Nation- wide Network of GPS Levelling with that of Astro-Gravimetric Levelling (Abstract) <i>Chen, J.</i>	459
Parallel Line Data Gridding Using Radon Domain Information <i>Zhou, Y. and R. Haagmans</i>	461
A Comparison of Stokes' Numerical Integration and Collocation, and a New Combination Technique (Abstract) <i>de Min, E.</i>	471
Does the Spherical Approximation Affect the Datum Transformation? <i>Abd-Elmotaal, H.A. and M. El-Tokhey</i>	472
Non Tidal Gravity Variations and Geodynamic Processes <i>Stus, Y.F., G.P. Arnautov, E.N. Kalish, and V.Y. Timofeev</i>	484
A Comparison of Geoid and Quasigeoid Modeling Methods in Rough Topography <i>Mainville, A., M. Véronneau, R. Forsberg, and M.G. Sideris</i>	491

Dynamics of the Adriatic Microplate and the Eastern Alps <i>Pesec, P. and N. Windholz</i>	502
Session 8 The Geoid in Europe	
Chairman, M. Vermeer	
Using High Precision GPS to Aid Absolute Geoid Datum Definition <i>Dodson, A.H., R.M. Bingley, and M.P. Stewart</i>	511
Geoid Determination by GPS and Levelling <i>Ihde, J.</i>	519
How Close are we to a Centimetric Geoid? <i>Hipkin, R.G.</i>	529
Basic Relations for Evaluating the Global and Regional Quasigeoid Heights on the Base of Gravity Data and a Global Model of the Geopotential <i>Petrovskaya, M.S.</i>	539
Determination of a Gravimetric Geoid Solution for South Korea <i>Yun, H.S.</i>	550
Geoid Determination and Levelling by GPS: Some Experiments on a Test Network <i>Duquenne, H., Z. Jiang, and C. Lemarié</i>	559
Data Preprocessing toward a South American Geoid <i>Blitzkow, D. and J.D. Fairhead</i>	569
The Hungarian Contribution to the Determination of a Precise European Reference Geoid <i>Ádám, J., H. Denker, A. Sárhidai, and Z. Szabó</i>	579
Test of Collocation Models for the Swiss Geoid Computation <i>Marti, U.</i>	588
Towards a High Precision Geoid for Egypt <i>Hanafy, M.S.A. and M.E.A. El Tokhey</i>	597
Estonian Geodetic and Gravimetric Networks and Geoid Undulation <i>Ostonen, A., J. Randjärv, and H. Sildvee</i>	607

The Total Terrain Effect in the Modified Stokes' Formula <i>Sjöberg, L.E.</i>	616
Geoid in the West Ukraine Area Derived by Means of Non-Central Multipole Analysis Technique <i>Marchenko, A. and O. Abrikosov</i>	624
Tidal Models of the Mediterranean Sea. Main Diurnal and Semidiurnal Constituents <i>de Toro, C., R. Vieira, and M.J. Sevilla</i>	630
Global Geopotential Models and Gravity Data for the Territory of Romania <i>Ioane, D. and I. Radu</i>	640
Gravity Field Determination in Croatia – Status Report <i>Čolić, K., T. Bašić, B. Pribičević, and D. Medak</i>	647
Author Index	655
