Proceedings of the Fifth IAA International Conference on Low-Cost Planetary Missions

24-26 September 2003

*ESTEC,
Noordwijk,
The Netherlands*

Contents

Welcome and Opening Speeches

<i>G. Winters, Director of Technical and Operational Support, ESA</i>	xiii
<i>R. Bonnet, Honorary Chairman</i>	xv
<i>C. Stavrinidis, Programme Chairman</i>	xvii

Session 1 - Low Cost Planetary Missions

The Neptune / Triton Explorer Mission: A Concept Feasibility Study	3
<i>J. Esper, NASA Goddard Space Flight Center, Greenbelt, MD, USA</i>	
Low Cost Development for the Rosetta Lander French Subsystems: Lessons Learned.....	11
<i>A. Debus, D. Moura, CNES, France</i>	
Micro-Mars: A Low Cost Mission to Planet Mars with Scientific Orbiter and Lander Applications	17
<i>L. Kerstein, B. Bischof, H Renken, Astrium GmbH, Germany; H. Hoffmann, DLR, Berlin, Germany;</i>	
<i>U. Apel, Hochschule Bremen, Germany</i>	
MUSES-C Its Launch and Early Orbit Operations.....	25
<i>J. Kawaguchi, H. Kuninaka, A. Fujiwara, T. Uesugi, ISAS, Japan</i>	

Session 2a - Mission Categories: Moon, Comets and Asteroids

Polar Night: A Lunar Volatiles Expedition	35
<i>T. Mosher, Utah State University; USA, P. Lucey, University of Hawaii, USA</i>	
Small Spacecraft Exploration of the Moon.....	43
<i>B. Bussey, P. Spudis, The Johns Hopkins University Applied Physics Laboratory, USA</i>	
The Euneos Mission A European Neo Space-Based Observatory.....	47
<i>V. Martinot, Alcatel Space Industries, France; A. Morbidelli, Observatoire de la Côte d'Azur, France</i>	
APIES: A Mission for the Exploration of the Main Asteroid Belt Using a Swarm of Microspacecraft	55
<i>P. D'Arrigo, EADS Astrium Ltd, UK; S. Santandrea, ESA/ESTEC</i>	

Session 2b - Mission Planning and Operations: Mission Design

SIMONE: Interplanetary Microsatellites for NEO Rendezvous Missions	65
<i>N. Wells, R. Walker, QinetiQ, UK; S. Green, A. Ball, The Open University, UK</i>	
Venus Microsat Explorer Programme, an ESA Technology Reference Mission	73
<i>M.L. van den Berg, P. Falkner, A. Atzei, A. Peacock, ESA/ESTEC</i>	
Astrod-I: Mission Concept and Venus Flybys.....	79
<i>W.T. Ni et al., Chinese Academy of Sciences, China</i>	
Analysis and Design of a Friction Brake for Momentum Exchange Propulsion Tethers.....	87
<i>S. Lennert, T.U. Darmstadt, Germany; M.P. Cartmell, University of Glasgow, UK</i>	

Session 3a - Mission Categories: Robotic Missions

Mars Hopper versus Mars Rover	97
<i>E. Shafirovich, M. Salomon, I. Gökalp, CNRS – LCSR, Orleans, France</i>	
ARCHIMEDES (Aerial Robot Carrying High-resolution Imaging, a Magnetometric Experiment and Direct Environmental Sensing instruments)	103
<i>H. Griebel, Mars Society Deutschland, Germany,</i>	
Improved Inflatable Landing Systems for Low Cost Planetary Landers.....	111
<i>D. Northey, C. Morgan, Analyticon Ltd, Stevenage, UK</i>	
Earth-Mars Similarity Criteria for Exploring Martian Vehicles.....	119
<i>G. Savu, COMOTI, Bucharest, Romania</i>	
A Low-Cost Approach to the Exploration of Mars Through a Robotic Technology Demonstrator Mission.....	127
<i>A. Ellery, Kingston University, UK, L. Richter, DLR, Germany, C. Cockell, British Antarctic Survey, UK, J. Parnell, University of Aberdeen, UK, A. Baker, Surrey Satellite Technology Ltd., UK</i>	
Robotics Options for Low-cost planetary Missions.....	135
<i>G. Visentin, M. van Winnendael, ESA/ESTEC</i>	

Session 3b - Management Approach

System Challenges in the Development of Low-Cost Planetary Missions.....	143
<i>R. Carli, P. Pablos, ESA/ESTEC</i>	
A Proposed Model for Small-World Structural Organization of Mission Teams and Tasks	149
<i>in Order to Optimize Efficiency and Minimize Costs</i>	
<i>A. Ribeiro, Universidade Independente, Lisbon, Portugal, M. Almeida, ESA/ESTEC,</i>	
Planetary Protection: Elements for Cost Minimization	157
<i>A. Debus, CNES, France</i>	
The Effect of Schedule Constraints on the Success of Planetary Missions	165
<i>R. Bitten, D. Bearden, N. Lao, T. Park, The Aerospace Corporation, Los Angeles, USA</i>	

Session 4a - Mission Categories: Mars and Jupiter

Outpost in Jovian System - A Stepwise Long-term Undertaking.....	175
<i>T. Yasaka, Kyushu University, Fukuoka, Japan</i>	
Concepts for a Low-Cost Mars Micro Mission	181
<i>R. Walker, M. Price, N. Wells, QinetiQ Ltd, UK; A. Ball, J. Zarnecki, The Open University, UK; M. Sims, University of Leicester, UK; F. Taylor, University of Oxford, UK</i>	
The Jupiter Microsat Explorer Programme, A Technology Reference Mission.....	189
<i>A. Atzei, P. Falkner, M. van den Berg, A. Peacock, ESA/ESTEC</i>	
Preliminary Studies on the Planetary Entry to Jupiter by Aerocapture Technique.....	195
<i>S. Aso, T. Yasaka, H. Hirayama, R. Eko Poetro, S. Hatta, Kyushu University, Fukuoka, Japan</i>	

Session 4b - Space Technology: Low Cost S/C Concept

OPTIS Satellite Mission for Improved Tests of Special and General Relativity	205
- Concept for a Technology Reference Mission	
<i>H. Dittus, C. Lämmerzahl, ZARM, University of Bremen, Germany;</i>	
<i>A. Peters, Humboldt University, Berlin, Germany;</i>	
<i>S. Schiller, Heinrich-Heine-University, Düsseldorf, Germany,</i>	
Advanced Microsatellite Mission - Deep Space Applications and Constraints.....	213
<i>C. Chaloner, B. Olivier, SEA Ltd, UK; J. Howieson, ESA/ESTEC</i>	
On the Concepts of a Highly Integrated Payload Suite for Use in Future Planetary Missions:	219
the Example of the BepiColombo Mercury Planetary Orbiter	
<i>S. Kraft, M. Collon, J. Montella, E. Buis, M. Beijersbergen, Cosine Research B.V., The Netherlands;</i>	
<i>C. Erd, P. Falkner, R. Schulz, A. Peacock, ESA/ESTEC</i>	
Prometheus: A Low-Cost Microsatellite Flyby Mission of 4179 Toutatis.....	227
<i>F. Kennedy, I. Coxhill, T. Kormos, E. Imre, J. Fielding, S. Atek, V. Lappas, M. Freebody,</i>	
<i>Surrey Space Centre, University of Surrey, UK</i>	

Session 5a - Space Technology: Low Cost S/C Concept

An "Entry Level" Mission to a Near Earth Object	241
<i>A. Phipps, M. Meerman, J. Wilhelm, D. Gibbons, J. Northam, A. da Silva Curriel, J. Ward, M. Sweeting,</i>	
<i>Surrey Satellite Technology Ltd, UK</i>	
Micro, Nano and Pico Satellites Launched from the Romanian Territory	251
<i>G. Savu, COMOTI, Bucharest, Romania</i>	
Design of a Micro-Satellite for Precise Formation Flying Demonstration.....	257
<i>R. Sanchez, P. Renard, EADS-Astrium, Toulouse, France</i>	
The Contribution of the Science Technology Programme to Low-Cost Planetary Missions	265
<i>G. Bagnasco, L. Giulicchi, P. Pablos, S. Airey, G. Boscagli, S. Mancuso, D. Nicolini, P. Plancke,</i>	
<i>P. Rueda-Boldo, M. Schautz, ESA/ESTEC</i>	
The Impact of Advanced Platform and Ion propulsion Technologies on Small Low-Cost	279
Interplanetary Spacecraft	
<i>S. Clark, QinetiQ, UK; D. Fearn, EP Solutions, UK</i>	
Entry Descent and Landing Systems for Small Planetary Missions: Parametric Comparison of	289
Parachutes and Inflatable Systems for the Proposed Vanguard Mars Mission	
<i>E. Allouis, A. Ellery, C. Welch, Kingston University, UK</i>	

Session 5b - Space Technology: Sensor and Instrumentation

Star Tracker Scan Mode Capability for the New Horizons Mission	299
<i>D. Haley, T. Strikwerda, K. Ailinger, The Johns Hopkins University, USA;</i>	
<i>R. Casini, A. Landi, R. Bettarini, Galileo Avionica S.p.A., Italy</i>	
The Autonomous Asteroid Mapping Mission, "Bering"	307
<i>A. Andersen, Nordita, Denmark; R. Michelsen, H. Haack, University of Copenhagen, Denmark;</i>	
<i>J. Joergensen, M. Betto, P. Joergensen, Technical University of Denmark, Denmark,</i>	

A Family of Analog and Mixed Signal VLSI ASICs for NASA Science Missions 313
N. Paschalidis, The Johns Hopkins University, USA

Enhanced Mission Performance from Autonomous Instrument Guidance..... 321
J. Joergensen, P. Joergensen, M. Betto, T. Denver, Technical University of Denmark, Denmark;
L. Jiménez Tuñon, INSA, Madrid, Spain

Miniature Thermal Emission Spectrometer for the Mars Exploration Rover,..... 329
S. Silverman, R. Peralta, Raytheon, SBRS, USA;
P. Christensen, G. Mehall, Arizona State University, USA

Session 6a - Mission Categories: Solar Sail

GEOSAIL: Exploring the Magnetosphere Using a Low Cost Solar Sail 341
M. Macdonald, C. McInnes, University of Glasgow, UK;
D. Alexander, Rice University, Houston, USA;
A. Sandman, Lockheed Martin Advanced Technology Center, Palo Alto, USA

Multiple Rendezvous and Sample Return Missions to Near Earth Objects Using Solar Sailcraft 351
B. Dachwald, W. Seboldt, L. Richter, DLR, Cologne, Germany

Magneto Plasma Sail: An Engineering Satellite Concept and its Application for Outer Planet Missions 359
H. Yamakawa, K. Fujita, H. Ogawa, S. Nonaka, H. Kuninaka, S. Sawai, H. Nishida, ISAS, Japan;
I. Funaki, R. Asahi, University of Tsukuba, Japan; Y. Nakayama, National Defense Academy, Japan;
H. Otsu, Shizuoka University, Japan; H. Nakashima, Kyushu University, Japan

Heliopause Explorer - A Sailcraft Mission to the Outer Boundaries of the Solar System 367
M. Leipold, Kayser-Threde GmbH, Germany; H. Fichtner, Ruhr University, Bochum, Germany;
B. Heber, University of Osnabrück, Germany; P. Groepper, S. Lascar, F. Burger, M. Eiden, ESA/ESTEC;
T. Niederstadt, C. Sickinger, L. Herbeck, B. Dachwald, W. Seboldt, DLR, Germany;

Terrestrial Planet Sample Return Using Solar Sail Propulsion..... 377
G. Hughes, M. Macdonald, C. McInnes, University of Glasgow, UK; A. Atzei, P. Falkner, ESA/ESTEC

Session 6b - Space Technology: Payload

Demonstration of Comet Sample Collection by Penetrator 387
R. Lorenz, W. Boynton, C. Turner, University of Arizona, USA

Telescoping Sample Canister Capture Mechanism (TSCCM) 395
K. Kong, S. Gorevan, S. Mukherjee, J. Wilson, Honeybee Robotics, New York, USA

The Messenger Science Payload..... 399
R. Gold, R. Mc.Nutt, Jr., The Johns Hopkins University, Applied Physics Lab, USA;
S. Solomon, The Johns Hopkins University, Department of Terrestrial Magnetism, USA;
The 'MESSENGER' Team, (various institutions)

Different Drill Tool Concepts 407
P. Magnani, E. Re, S. Senese, G. Cherubini, Galileo Avionica, Italy
A. Olivieri, Italian Space Agency, Italy

Session 7a - Delivery Systems

- The ROCKOT Launch Vehicle - the Successful German/Russian Partnership in Space Transportation 415
Y. Viertel, P. Freeborn, M. Kinnersley, EUROCKOT Launch Services GmbH, Germany
- Flexible Variable-Specific-Impulse Electric Propulsion Systems for Planetary Missions 423
E. Chesta, D. Estublier, B. Fallis, E. Gengembre, J. Gonzalez del Amo, N. Kutufa, D. Nicolini, G. Saccoccia, ESA-ESTEC; L. Casalino, Politecnico di Torino, Italy; G. Noci, LABEN, Italy; P. Dumazert, M. Prioul, SNECMA Moteurs, France; J. Boeuf, CNRS-CPAT, Université P. Sabatier, France; A. Bouchoule, Université d'Orleans, France; A. Cadiou, F. Darnon, L. Jolivet, CNES, France; M. Berti, M. Saverdi, L. Biagioni, S. Marcuccio, ALTA S.p.A, Italy; N. Wallace, QuinetiQ, UK

Session 7b - Mission Planning and Operations: Tracking/Ground Segment

- File-Based Data Processing on MESSENGER..... 435
C. Krupiarz, D. Artis, A. Calloway, C. Frangos, B. Heggstad, D. Holland, W. Stratton, The Johns Hopkins University, Applied Physics Laboratory, USA
- Coordinating UHF Relay Activities at Mars 443
R. Gladden, P. Fieseler, B. Waggoner, M. Thornton, R. Thomas, P. Hwang, NASA/JPL, USA
- Low Cost Relative Navigation Sensing: GNSS-Like Devices Hosted on Deployed Tethers 451
P. Colmenarejo, E. Di Sotto, V. Barrena, GMV S.A., Spain
- Netlander Thermal Control..... 459
O. Romberg, F. Bodendieck, OHB-System AG, Germany; J. Block, DLR, Braunschweig, Germany; R. Nadalini, University of Münster, Germany; N. Schneider, Wacker-Ceramics, Kempten, Germany

Session 8 - Space Technology: Sensors & Instrumentation

- Advanced Stellar Compass Deep Space Navigation, Ground Testing Results..... 469
M. Betto, J. Joergensen, P. Joergensen, T. Denver, Technical University of Denmark, Denmark
- Wide Area MicroProbe Analyser (WAMPA)..... 477
A. Rogoyski, B. Skidmore, V. Maheswaran, ESYS Consulting, UK; I. Wright, J. Zarnecki, C. Pillinger, The Open University, UK
- Successful Mars Remote Sensors, MO THEMIS and MER Mini-TES..... 485
S. Silverman, P. Christensen, Raytheon SBRS, USA

Session 9 - Space Technology: Payload/Miniaturisation

- Challenges and Innovative Technologies for a Low-Cost Lunar Mission..... 495
H-P. Roeser, M. Auweter-Kurtz, H. Wagner, R. Laufer, S. Podhajsky, T. Wegmann, University of Stuttgart, Germany; F. Huber, TZR, Gäufelden, Germany
- Design and Performance of the Payload Instrumentation of the 501
 BepiColombo Mercury Planetary Orbiter
M. Collon, E. Buis, M. Beijersbergen, S. Kraft, Cosine Research B.V., The Netherlands; C. Erd, R. den Hartog, A. Owens, P. Falkner, R. Schulz, A. Peacock, ESA/ESTEC
- Imaging and Localisation Software Demonstrator for Planetary Aerobots 509
D. Barnes, A. Shaw, P. Summers, Universty of Wales, UK; R. Ward, M. Woods, M. Evans, SciSys Ltd, UK; G. Paar, Joanneum Research, Graz, Austria; M. Sims, University of Leicester, UK

Closing Session, Discussion	519
Participants.....	523
