

THE STATE OF THE ENVIRONMENT

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

DETAILED TABLE OF CONTENTS

List of Insets	10
List of Figures	11
List of Tables	12
INTRODUCTION	13

Part I

THE STATE OF THE ENVIRONMENT: PROGRESS AND CONCERNS

Chapter 1: GLOBAL ATMOSPHERIC ISSUES

1. Stratospheric Ozone Depletion	17
Background	17
Global Ozone Trends	17
Antarctic Ozone Trends	19
Causes of the Antarctic Ozone Hole	19
Global Implications	19
Prediction of Ozone Depletion	20
2. The Greenhouse Effect	20
The Greenhouse Gases	22
Global and Regional Climatic Changes	22
Greenhouse Gas Emissions	22
Projected Emissions and Temperature Changes	25
Observed Changes in Globally Averaged Temperature	27
Effects of Global Warming	27
3. Other Global Atmospheric Pollution	29
Conclusions	29

Chapter 2: AIR

1. Local and Urban Air Pollution	33
Traditional Air Pollutants	33
Emissions of Traditional Pollutants	36
Ambient Concentration Levels of Traditional Pollutants	38
Expectations in the 1990s	42
Toxic Trace Pollutants	42
Assessment of Toxic Trace Pollutant Emissions	42
Risk of Human Exposure to Toxic Trace Pollutants	43
Recent Legislation and Regulations to Limit Exposure to Toxic Air Pollutants, and Future Outlook	45
2. Large-Scale Air Pollution	47
Acid Deposition of Sulphates and Nitrates	47
Photochemical Smog Pollution by Ozone and NO _x	48

Deposition of Heavy Metals	48
International Policies for Combating Transboundary Air Pollution – Initiatives and Achievements	48

Conclusions	49
--------------------------	----

Chapter 3: INLAND WATERS

1. Development of Water Resources	53
Water Quantity	53
Floods and Droughts	55
2. Quality of Water Resources	57
Domestic Discharges	57
Industrial Discharges	59
Diffuse Discharges	59
State of Surface Waters	60
State of Ground Water	63
3. Drinking Water	65
Sources and Structure of Distribution Systems	65
Contaminants	65
4. Water Management	65
Integration of Water Quality and Water Quantity Management	65
Interaction Among Inland Waters, Oceans, Land and Air	68
Integration of Environmental Concerns into Economic Sectors	68
Conclusions	68

Chapter 4: MARINE ENVIRONMENT

1. Pressures on the Marine Environment	71
Waste Inputs to the Oceans	71
Nutrients	73
Sewage	73
Oil	73
Synthetic Organic Compounds	73
Metals	77
Radionuclides	77
Persistent Litter and Debris	77
Environmental Restructuring	79
Resource Exploitation	79
Atmospheric Change	79
2. The State of the Marine Environment	81
The North Sea	81
The Baltic Sea	83
The Mediterranean Sea	83
Japan's Marine Environment	85
North America's Marine Environment	86

3. Sustainable Use of Living Marine Resources:		Plant Diseases	126
Fisheries and Aquaculture	90	Changes in Land Use	126
Fisheries	90	5. Consequences for the Rest of the World	127
Aquaculture	90	Trade in Forest Products	127
Conclusions	92	Tropical Deforestation	127
 <i>Chapter 5: LAND</i>		Sustainable Development in Different Regions	129
1. Soils	95	Conclusions	129
Natural Roles	95	 <i>Chapter 7: WILD LIFE</i>	
Soil Loss and Degradation	97	1. Uses and Value of Wild Life	131
Interdependencies with Other Media	100	Biological Diversity	131
2. Land Use	100	Environmental Value	131
Land Use and Land Cover Patterns	100	Economic Value	131
Protected Areas	102	Cultural Value	133
Critical Areas	102	2. Conditions and Trends	133
Mining and Extraction Impacts	104	Wild Life Populations	133
3. Land Use and Natural Disasters	104	Protected Areas	135
Earthquakes	104	Land Use Trends and Wild Life	137
Volcanic Eruptions	104	3. The Impact of Human Activities	137
Landslides	106	Habitat Modification	137
Climatic and Meteorological Disasters	106	Excessive and Illegal Exploitation	139
Land Use and the Management of Natural Disasters	106	Pollution and Climate Change	139
Conclusions	109	Species Introduction	140
 <i>Chapter 6: FOREST</i>		4. Protection and Management	140
Forests as Ecosystem	111	Integration of Conservation and Development	140
Different Methods of Forest Exploitation	111	International Co-operation	142
Economic Uses of Forests	112	Conclusions	142
Social Role of Forests	114	 <i>Chapter 8: SOLID WASTE</i>	
1. Forest Resources in OECD Countries	114	1. Waste Production	145
Wooded Areas	114	Municipal Waste	148
Growing Stock and Annual Increment	114	Industrial Waste	148
Efficient Use of Forest Resources	116	Specific Waste	148
2. Demand for Forest Products	116	2. Waste Disposal	148
Demand for Industrial Roundwood	116	Disposal of Municipal Waste	148
Supply of Industrial Roundwood	118	Disposal of Industrial Waste	150
Industrial Roundwood Balances	118	3. Transfrontier Movements of Waste	151
3. Environmental Effects of Forestry Management	119	A Reality that Must Be Kept under Control ..	151
Effects on the Climate and Atmosphere	119	West-East and North-South Movements	152
Effects on the Soil	119	4. Old Landfill Sites	152
Effects on Water	121	A Plethora of "Problem Sites"	152
Effects on the Diversity of Wild Life	121	The Need to Step Up Remedial Action	152
Effects on Social Uses	123	5. Recovery, Recycling and Prevention	153
Conclusions	123	Recyclable Waste	153
4. External Pressures on the Forest Resources of OECD Countries	124	Recovery and Recycling of Municipal Waste ..	153
Atmospheric Pollution	124	Recovery and Recycling of Industrial Waste ..	153
Climate Change and the Greenhouse Effect ..	124		
Forest Fires	126		

Towards Preventing the Generation of Waste	153
Prevention Through the Use of "Clean" Technologies	155
Prevention Through the Manufacture of "Clean" Products	155
Conclusions	155
 <i>Chapter 9: NOISE</i>	
1. The Effects of Noise	157
Effects on Health	157
Effects on Communication	158
Psychological Annoyance and Effects on Behaviour	158
Noise Abatement Objectives	158
2. The State of the Noise Environment Since the Early 1970s	160
Exposure to Noise from Surface and Air Transport	160
Main Sources of Traffic Noise	160
Other Sources of Noise and Neighbourhood Noise	160
3. The Noise Environment in the 1990s	162
Noise from Road Transport	162
Noise from Rail Transport	162
Noise from Air Transport	162
New Sources and Sites of Noise, and New Nuisances	164
Population and Industrial Trends, and Multi-Exposure to Noise	164
Conclusions	164

Part II
A CHANGING ECONOMIC CONTEXT

Chapter 10: AGRICULTURE

1. Agriculture-Environment Relations	169
2. Changes in Agriculture: Trends and Prospects	171
Major Changes in Agriculture	171
Structural Changes of Environmental Significance	171
Prospects	173
3. Environmental Impacts of Agricultural Changes	177
Effects on Soil	177
Effects on Foodstuffs	177
Other Effects of Pesticides	179
Effects on Water Systems	179
Effects on Flora and Fauna	182
Effects on Amenity and Life Quality	183
4. Impact of Pollution from other Sources on Agriculture	183
Conclusions	184

Chapter 11: INDUSTRY

1. Industry-Environment Relations	187
Quantitative Impact of Industry on the Environment	188
The Increasing Complexity of Risks	188
2. Changes in Industry: Trends and Prospects	191
De-Industrialisation is Only Relative	194
A Continuous and Radical Redeployment of Structures	194
Development of Worldwide Industrial Markets	194
Transition to a New Technological System	196
Selective Inclusion of Environmental Considerations in Industrial Strategy	198
3. Environmental Impact of Industrial Change: Appraisal and Challenges	198
The Consequences of Old Industrialisation in Declining Regions	199
The Ambivalence of Technological Progress: Opportunities and Risks for the Environment of the Future	199
Increasing Complexity of Risk Management	199
Irreversible Internationalisation of Industrial Environment Problems	203
Conclusions	205

Chapter 12: TRANSPORT

1. The Interface between Transport and the Environment	207
2. Transport Trends of Environmental Significance	210
Importance of Different Transport Modes	210
Transport Infrastructures	210
Increasing Motorisation and Mobility in Road Transport	213
Energy Consumption by Road Transport	213
Emission Control for Motor Vehicles	213
Conclusions	217

Chapter 13: ENERGY

1. Energy Changes: Trends and Projects	221
Growth in Energy Requirements and Indigenous Energy Production	221
The Contribution of Environmental Policies and of Public Awareness	222
Improvement in the Energy Intensity of Economies	225
Structural Changes in Energy Supplies	225
Development of Electricity	228
Energy "Markets"	228

2. Environmental Impacts:	
Appraisal and Challenges	230
Major Achievements	230
Environmental Issues	230
Future Energy Supply and Demand	235
Future Environmental and Energy Policies ...	236
Conclusions	237

Chapter 14: SOCIO-DEMOGRAPHIC CHANGES

1. Socio-Demographic Changes:	
Trends and Prospects	239
Slower Population Growth	239
Ageing of the Population and Changing Household Structure	239
Diverse Trends in Urban Areas	240
Social Values and Attitudes	240
Prospects	242
2. The Environmental Significance of Consumption and Tourism Activities	242
Consumption Patterns: A New Focus for Environmental Protection Policies	242
Tourism: A Need for Sustainable Development	244
Conclusions	249

Part III MANAGING THE ENVIRONMENT: TOWARDS SUSTAINABILITY

Chapter 15: ECONOMIC RESPONSES

1. Measuring Benefits, Costs and Economic Impacts of Environmental Policies	253
Environmental Benefits	253
Environmental Control Costs	255
Indirect Economic Impacts	256
2. Instruments of Environmental Policy	257
Economic Instruments	257
Regulatory Instruments	260
3. Sustainable and Integrated Development	261
Sustainable Development	261
Priority for Sustainable Development in the 1990s	261
Conclusions	264

Chapter 16: INTERNATIONAL RESPONSES

1. Transfrontier Pollution	267
2. Global Commons	271
Atmospheric Issues	271
Marine Environment	272
3. Outlook for International Environmental Law ..	273
4. Trade and the Environment	274
Trade and Environmental Regulations	274
Trade and Sustainable Development	274
Broader Economic Aspects of International Trade and the Environment	276
5. Aid and the Environment	278
The Problems	278
Addressing the Problems: 1970-1990	278
Agenda for the Future	280
Conclusions	282

CONCLUSIONS ON THE STATE OF THE ENVIRONMENT

1. The Environment Today	283
Progress	283
Remaining Problems	284
Atmospheric Problems	284
Water	284
Waste	285
Noise	285
Land	285
Forests	286
Wild Life	286
2. Towards Sustainable Development	287
A New Challenge for Environmental Policies ..	287
Changes in Substances of Concern	287
Better Integration Within Environmental Policies	287
Adjusting Economic Structures	288
Industry	288
Transport	289
Energy	290
Agriculture	290
Forestry	291
Consumption and Time-Use Patterns	294
The International Context	294
